3D Printing Richard Sheng,2022-06-04 3D Printing: A Revolutionary Process for Industry Applications examines how some companies have already adopted 3D printing, gives guidance on critical areas such as manufacturing supply, and traces the lifecycle of 3D printing as well as cost drivers and influences. The author leverages his experience in leading engineering firms to bring together an industry-by-industry guide to the potentials of 3D printing for large-scale manufacturing and engineering. The book provides all the skills and insights that a Chief Engineer would need to address complex manufacturing problems in the real-world using 3D printing technology. As 3D printing is a rapidly growing area with the potential to transform industries, the potential for large-scale adoption involves complex systems crossing engineering disciplines. In order to use 3D printing to solve manufacturing problems in this context, an array of expertise and knowledge about technology, suppliers, the uses of 3D printing by industry, 3D printing lifecycle and cost drivers must be assembled. This book accomplishes that by introducing 3D printing technology with specific references to 18 industry sectors. Covers a range of 18 industries in forensic detail, giving the 'what, why, when, who, where and how' of 3D printing technology Discusses how large companies have already adopted 3D printing for the design and production of complex parts Gives guidance on essential issues in industry, including manufacturing supply Details the conversion of traditional design and production processes to 3D printing technology Helps companies lower costs and increase product quality through 3D printing

Handbook on Values for Life in a Democracy Council of Europe,2009 The Council of Europe project Cultural identities, shared values and citizenship (2006-2008) was launched after the Organisation's 3rd Summit (Warsaw, 2005). It was based on the premise that an awareness and appreciation of Europe's rich diversity of cultures and heritages and how they have interacted with each other over time are essential preconditions for mutual respect, peaceful coexistence, intercultural dialogue, a shared attachment to common values and an emerging European cultural citizenship. One of the outcomes of the project was the Handbook on values for life in a democracy which is structured around a series of key questions to promote discussion among young people about universal human rights and the implementation of core European values. The case studies it presents and the discussion cards are designed to promote an approach to discussion where each participant can: develop his or her own point of view in relation to others; think about clashes of values and human rights and how they might be resolved in fair, balanced, proportionate and peaceful ways; empathise with others' points of views (even if not agreeing with them); engage in dialogue over disputed issues rather than in monologues based solely on his or her own point of view or cultural perspective; set particular issues and debates into a wider historical, cultural and global context. These core procedural values need to be practised and upheld not only in the law courts but in our everyday dealings with each other. Otherwise they become meaningless and we will cease to have any real sense of commitment to them. Just as we learn skills by practising them, so we acquire these values by practising them.
