**Guidance Document for Supporting Women in Co-ed Settings** U.S. Department of Health and Human Services, 2019-11-23 The expert panel developed guidance statements to offer a general understanding of the context and why it is important to address the specific needs of women. These guidance statements provide information about sex and gender differences, women's experiences, and delivery of substance use treatment and recovery services. The statements are meant to help providers understand how women's experiences impact their recovery, regardless of service delivery setting. Women are diverse, and their individual cultural backgrounds, family histories, and life experiences influence their treatment and recovery needs. The guidance statements are based on experiences and characteristics frequently seen among women and will help providers better respond to and serve women in their centers. Twelve commonly-used theories are thoroughly explained, with discussion of the strengths and limitations of each, and applied to real work with individuals, groups, families, communities, and organizations. This book looks at risk management under crisis conditions in the COVID-19 pandemic context. The book synthesizes existing concepts, strategies, approaches and methods of risk management and provides the results of empirical research on risk and risk management during the COVID-19 pandemic. The research outcome was based on the authors' study on 42 enterprises of different sizes in various sectors, and these firms have either been negatively affected by COVID-19 or have thrived successfully under the new conditions of conducting business activities.
