Space Applications and Policies for the New Century Volker Liebig,Kai-Uwe Schrogl,2000 <B>This book was awarded the Social Sciences Book Award of the International Academy of Astronautics 2001.<BR> This book provides an in-depth account of the contribution of space applications for global development and an assessment of the policies which are required for realizing their enormous potentials. It takes the Third United Nations Conference on the Exploration and Peaceful Uses of Outer Space (UNISPACE III), which took place from 19 to 30 July 1999 in Vienna, as starting point

to assess the state and future development of space activities. As UNISPACE I and II, which had been convened in 1968 and 1982, respectively, UNISPACE III was a landmark in discussing all aspects of space utilization and policy as well as regulatory matters on a global scale. The book critically evaluates the results of UNISPACE III and proposes a realistic agenda for developing space activities into an efficient instrument for the solution of the problems and challenges modern society is facing in areas like science and technology development, communication information and resource management, mobility and environmental protection.

Aeronautics and Space Report of the President United States. President, *The Oxford Handbook of Space Security* Saadia M. Pekkanen, 2024 The Oxford

Handbook of Space Security focuses on the interaction between space technology and international and national security processes. Saadia M. Pekkanen and P.J. Blount have gathered a group of key scholars who bring a range of analytical and theoretical perspectives to take an analytically-eclectic approach to assessing space security from an international relations (IR) theory perspective. Bringing together scholarship from a group of leading experts, this volume explains how these contemporary changes will affect future security in, from, and through space.
