**Laboratory Techniques in Thrombosis - A Manual** J. Jespersen,R.M. Bertina,F. Haverkate,2000-06-30 The first edition of this manual appeared in 1992 and was entitled ECAT Assay Procedures. This completely revised new edition combines the strengths of the first edition with new and useful features. Laboratory Techniques in Thrombosis - a Manual still gives detailed descriptions of the recommended assays and their alternatives. However, the manual now has a broader scope because it is no longer limited by the frontiers of ECAT. Experts all over the world have contributed to this edition. Furthermore, new assays have been introduced, improvements have been suggested for other assays, while a few others have become redundant or no longer available. The list of manufacturers is fully updated and a list of the recommended nomenclature of quantities in thrombosis and haemostasis is new to this edition, further facilitating the use of this manual. Laboratory Techniques in Thrombosis - a Manual will contribute to furthering the much needed harmonization and standardization of tests within the field and should have a place in all working haemostasis laboratories.

**Democratic Citizenship Education in Non-Western Contexts** Serhiy Kovalchuk,Anatoli Rapoport,2020-06-09 This book examines the issues of theorizing citizenship education research in non-Western societies that have embarked on democratic development after the fall of authoritarianism and colonialism. Despite a proliferation of studies on citizenship and citizenship education in non-Western contexts, there has been limited theorization of this research and little discussion of the applicability to such contexts of Western theoretical frameworks. This volume addresses these issues through empirical case studies of citizenship conceptions, practices, and education in South and West Africa, Latin America, Central Europe, and the Middle East. The contributors to the volume call into question the uncritical application of Western theoretical frameworks to non-Western societies and advocate for the development and wider application of new paradigms rooted in local processes and indigenous knowledge to better understand and theorize citizenship and citizenship education in such societies. This volume will be of interest to scholars, researchers, and practitioners working in the field of comparative and international citizenship education. It was originally published as a special issue of Compare: A Journal of Comparative and International Education.

**Financial Soundness Indicators** International Monetary Fund,2006-04-04 Financial Soundness Indicators (FSIs) are measures that indicate the current financial health and soundness of a country's financial institutions, and their corporate and household counterparts. FSIs include both aggregated individual institution data and indicators that are representative of the markets in which the financial institutions operate. FSIs are calculated and disseminated for the purpose of supporting macroprudential analysis--the assessment and surveillance of the strengths and vulnerabilities of financial systems--with a view to strengthening financial stability and limiting the likelihood of financial crises. Financial Soundness Indicators: Compilation Guide is intended to give guidance on the concepts, sources, and compilation and dissemination techniques underlying FSIs; to encourage the use and cross-country comparison of these data; and, thereby, to support national and international surveillance of financial systems.
