**United States. President's Commission on  
Law Enforcement and Administration of  
Justice**

The Challenge of Crime in a Free Society United States. President's Commission on Law Enforcement and Administration of Justice, 1967 This report of the President's Commission on Law Enforcement and Administration of Justice -- established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal

Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.

*Management of Temporomandibular Disorders and Occlusion* Jeffrey P. Okeson, 1998 Covering both new and proven techniques in this rapidly changing field, this best-selling book helps you provide solutions to many common occlusal and TMD problems. Clear descriptions ensure that you develop a complete understanding of normal occlusion and masticatory function, allowing you to better appreciate and manage abnormal occlusion and masticatory dysfunction. With this book's conservative, cost-effective approach, you'll achieve your treatment goals while keeping the best interests of your patients in mind.--BOOK JACKET.

**The Challenge of Crime** Henry S. Ruth, Kevin R. Reitz, 2003-04-15 Rejecting traditional liberal and conservative outlooks, this book examines the history, scope, and effects of the revolution in America's response to crime since 1970. Henry Ruth and Kevin Reitz offer a comprehensive, long-term, pragmatic approach to increase public understanding of and find improvements in the nation's response to crime.

*The Routledge Handbook of Taxation and Philanthropy* Henry Peter, Giedre Lideikyte

Huber, 2021-12-24 The Routledge Handbook of Taxation and Philanthropy ventures into a territory that is still widely unexplored. It contains 30 academic contributions that aim to provide a better understanding of whether, why, and how philanthropic initiatives, understood as voluntary contributions for the common good, can and should be fostered by states through tax incentives. The topic has been addressed from a multidisciplinary and multicultural perspective – covering neuroeconomics, sociology, political science, psychology, affective sciences, philosophy, behavioral economy, and law – because of its global and multifaceted nature. It also contains the OECD report on Taxation and Philanthropy released in November 2020, which was prepared in this context as a result of a collaboration with the Geneva Centre for Philanthropy of the University of Geneva. The book is divided into four sections, exploring, respectively, the justification of tax incentives for philanthropy, theoretical and empirical insights about taxes, efficiency and donor behavior in that context, and tax incentives for cross-border philanthropy and for hybrid entities and social entrepreneurship. It is believed that this volume will be a landmark yet only the beginning of a journey in which a lot remains to be studied, learned, and said.

**Crowdfunding European Business** Antonella Francesca Cicchiello, 2024-03-14 This book questions the ability of crowdfunding (especially in the lending and equity-based models) to contribute to the development of European

businesses, and therefore, to the relaunch of the European economy. Following a mainly micro (firm-based) approach, the study investigates the advantages of crowd investors' increased role both in making financial resources available to the industrial base, thus reinvigorating economic growth across the European Union. The book reframes contemporary issues surrounding corporate finance and develops relevant knowledge to help companies succeed when it comes to securing the means to grow. It provides new and interesting insights into the alternative finance market, in light of the global financial crisis and the COVID-19 pandemic. The book describes the main alternative finance models which include not only lending and equity-based crowdfunding, but also marketplace lending, balance sheet lending, invoice trading, securities, real estate crowdfunding, and profit-sharing. It also analyses the due diligence process and other value-added services provided by platforms and backers. The book outlines a systematic understanding of crowdfunding as a substitute or complement to other forms of entrepreneurial finance and unpacks some of the misunderstandings surrounding the crowdfunding industry and its future evolution. The conclusions reached can be of help to entrepreneurs who have limited knowledge of the crowdfunding tool and the associated benefits. As such, this book is a valuable resource for students, researchers, professionals, and practitioners interested in discovering or better understanding the crowdfunding process, its characteristics, and the range of players in this

market.

*Environmental Psychology* Linda Steg, 2019-01-22

The updated edition of the essential guide to environmental psychology Thoroughly revised and updated, the second edition, *Environmental Psychology: An Introduction* offers an overview of the interplay between humans and their environments. The text examines the influence of the environment on human experiences, behaviour and well-being and explores the factors influencing environmental behaviour, and ways to encourage pro-environmental behaviour. The revised edition is a state-of-the art review of relevant theories and research on each of these topics. With contributions from an international panel of noted experts, the text addresses a wealth of topics including the main research methods in environmental psychology; effects of environmental stress; emotional impacts and meanings of natural environment experience; aesthetic appraisals of architecture; how to measure environmental behaviour; cognitive, emotional and social factors explaining environmental behaviour; effects and acceptability of strategies to promote pro-environmental factors; and much more. This important book: Discusses the environmental factors that threaten and promote human wellbeing Explores a wide range of factors influencing actions that affect environmental conditions Discusses the effects and acceptability of approaches that aim to encourage pro-environmental behavior Presents research results conducted in different regions in the world Contains contributions from noted experts Written for

scholars and practitioners in the field, the revised edition of *Environmental Psychology* offers a comprehensive review of the most recent research available in environmental psychology.

*Productivity in Higher Education* Caroline M. Hoxby, Kevin Stange, 2020-01-10 How do the benefits of higher education compare with its costs, and how does this comparison vary across individuals and institutions? These questions are fundamental to quantifying the productivity of the education sector. The studies in *Productivity in Higher Education* use rich and novel administrative data, modern econometric methods, and careful institutional analysis to explore productivity issues. The authors examine the returns to undergraduate education, differences in costs by major, the productivity of for-profit schools, the productivity of various types of faculty and of outcomes, the effects of online education on the higher education market, and the ways in which the productivity of different institutions responds to market forces. The analyses recognize five key challenges to assessing productivity in higher education: the potential for multiple student outcomes in terms of skills, earnings, invention, and employment; the fact that colleges and universities are “multiproduct” firms that conduct varied activities across many domains; the fact that students select which school to attend based in part on their aptitude; the difficulty of attributing outcomes to individual institutions when students attend more than one; and the possibility that some of the benefits of higher education may arise from the system as a whole

rather than from a single institution. The findings and the approaches illustrated can facilitate decision-making processes in higher education.

Criminal Finance: The Political Economy of Money Laundering in a Comparative Legal Context Kris Hinterseer, 2002-05-13 As the first cross-disciplinary analysis of money laundering - fully recognizing the activity's economic, political, and juridical dimensions - Criminal Finance clearly identifies a useful array of appropriate criteria that may be used to develop and implement effective control strategies. The book will be of immeasurable and immediate value to bankers, legislators, regulators, law enforcement authorities, and concerned lawyers and academics everywhere.

**Assessing Social Impact of Social Enterprises** Cecilia Grieco, 2015-03-05 This book explores the diversity of Social Impact Assessment (SIA) models and outlines a self-assessment on models to support social entrepreneurs. The chapters trace the concept and origins of social entrepreneurship and elicits current implementation of SIA models by social enterprises. The comprehensive review of over seventy five SIA models will be especially useful for social entrepreneurs and researchers.

**Mirror of the World** Julian Bell, 2010-05-25 "Exuberant, astute, and splendidly illustrated history of world art . . . draws fascinating parallels between artistic developments in Western and non-Western art."—Publishers Weekly In this beautifully written story of art, Julian Bell tells a vivid and compelling history of human

artistic achievements, from prehistoric stone carvings to the latest video installations. Bell, himself a painter, uses a variety of objects to reveal how art is a product of our shared experience and how, like a mirror, it can reflect the human condition. With hundreds of illustrations and a uniquely global perspective, Bell juxtaposes examples that challenge and enlighten the reader: dancing bronze figures from southern India, Romanesque sculptures, Baroque ceilings, and jewel-like Persian manuscripts are discussed side by side. With an insider's knowledge and an unerring touch, Bell weaves these diverse strands into an invaluable introduction to the wider history of world art.

**Advances in Crowdfunding** Rotem Shneor, 2020 This open access book presents a comprehensive and up-to-date collection of knowledge on the state of crowdfunding research and practice. It considers crowdfunding models and their different manifestations across a variety of geographies and sectors, and explores the perspectives of fundraisers, backers, platforms, and regulators. Gathering insights from a wide range of influential researchers in the field, the book balances concepts, theory, and case studies. Going beyond previous research on crowdfunding, the contributors also investigate issues of community, sustainability, education, and ethics. A vital resource for anyone researching crowdfunding, this book offers readers a deep understanding of the characteristics, business models, user-relations, and behavioural patterns of crowdfunding.

**Handbook of Robotic and Image-Guided Surgery**

Mohammad Abedin-Nasab,2019-09-25 Handbook of Robotic and Image-Guided Surgery provides state-of-the-art systems and methods for robotic and computer-assisted surgeries. In this masterpiece, contributions of 169 researchers from 19 countries have been gathered to provide 38 chapters. This handbook is 744 pages, includes 659 figures and 61 videos. It also provides basic medical knowledge for engineers and basic engineering principles for surgeons. ### **Spin Squeezing and Non-linear Atom**

#### **Interferometry with Bose-Einstein Condensates**

Christian Groß,2012-01-12 Interferometry, the most precise measurement technique known today, exploits the wave-like nature of the atoms or photons in the interferometer. As expected from the laws of quantum mechanics, the granular, particle-like features of the individually independent atoms or photons are responsible for the precision limit, the shot noise limit. However this “classical” bound is not fundamental and it is the aim of quantum metrology to overcome it by employing entanglement among the particles. This work reports on the realization of spin-squeezed states suitable for atom interferometry. Spin

squeezing was generated on the basis of motional and spin degrees of freedom, whereby the latter allowed the implementation of a full interferometer with quantum-enhanced precision.

**Kerala Development Report** India. Planning Commission,2008 Full of data on various sectors and issues--among them finance, tourism, foreign trade, agriculture, and governance--this report on the state of Kerala is designed to benefit businesses, NGOs, and policy makers. While Kerala has a strong economy and is India's most literate state, areas such as human rights and the treatment of women and minorities leave room for improvement. This extensive reference discusses the constraints and challenges faced by Kerala and provides a blueprint for its socioeconomic progress.

Integrated approaches to health Simon R. Rüegg,Barbara Häslar,Jakob Zinsstag,2023-09-14 One Health addresses health challenges arising from the intertwined spheres of humans, animals and ecosystems. This handbook is the product of an interdisciplinary effort to provide science-based guidance for the evaluation of One Health and other integrated approaches to health. It guides the reader through a systems approach and framework to evaluate such approaches in a standardised way. It provides an overview of concepts and metrics from health and life sciences, social sciences, economics, and ecology that are relevant for the evaluation of the processes involved, as well as the

characterisation of expected and unexpected outcomes of One Health initiatives. Finally, the handbook provides guidance and practical protocols to help plan and implement evaluations in order to generate new insights and provide meaningful information about the value of One Health. The handbook is intended for practitioners, researchers, evaluators as well as funders of integrated approaches to health and beyond.

### **The Sharing Economy in Europe** Vida

Česnuitytė, Andrzej Klimczuk, Cristina Miguel, Gabriela Avram, 2022-01-21 This open access book considers the development of the sharing and collaborative economy with a European focus, mapping across economic sectors, and country-specific case studies. It looks at the roles the sharing economy plays in sharing and redistribution of goods and services across the population in order to maximise their functionality, monetary exchange, and other aspects important to societies. It also looks at the place of the sharing economy among various policies and how the contexts of public policies, legislation, digital platforms, and other infrastructure interrelate with the development and function of the sharing economy. The book will help in understanding the future (sharing) economy models as well as to contribute in solving questions of better access to resources and sustainable innovation in the context of degrowth and growing inequalities within and between societies. It will also provide a useful source for solutions to the big challenges of our times such as climate change, the loss of biodiversity,

and recently the coronavirus disease pandemic (COVID-19). This book will be of interest to academics and students in economics and business, organisational studies, sociology, media and communication and computer science.

**The Elephant in the Brain** Kevin Simler, Robin Hanson, 2018 Human beings are primates, and primates are political animals. Our brains, therefore, are designed not just to hunt and gather, but also to help us get ahead socially, often via deception and self-deception. But while we may be self-interested schemers, we benefit by pretending otherwise. The less we know about our own ugly motives, the better - and thus we don't like to talk or even think about the extent of our selfishness. This is the elephant in the brain. Such an introspective taboo makes it hard for us to think clearly about our nature and the explanations for our behavior. The aim of this book, then, is to confront our hidden motives directly - to track down the darker, unexamined corners of our psyches and blast them with floodlights. Then, once everything is clearly visible, we can work to better understand ourselves: Why do we laugh? Why are artists sexy? Why do we brag about travel? Why do we prefer to speak rather than listen? Our unconscious motives drive more than just our private behavior; they also infect our venerated social institutions such as Art, School, Charity, Medicine, Politics, and Religion. In fact, these institutions are in many ways designed to accommodate our hidden motives, to serve covert agendas alongside their official ones. The existence of big hidden motives can

upend the usual political debates, leading one to question the legitimacy of these social institutions, and of standard policies designed to favor or discourage them. You won't see yourself - or the world - the same after confronting the elephant in the brain.

**Development Economics** Alain de Janvry, Elisabeth Sadoulet, 2021-05-30 This second edition of *Development Economics: Theory and Practice* continues to provide students and practitioners with the perspectives and tools they need to think analytically and critically about the current major economic development issues in the world. Alain de Janvry and Elisabeth Sadoulet identify seven key dimensions of development—growth, poverty, vulnerability, inequality, basic needs, sustainability, and quality of life—and use them to structure the contents of the text. The book gives a historical perspective on the evolution of thought in development. It uses theory and empirical analysis to present readers with a full picture of how development works, how its successes and failures can be assessed, and how alternatives can be introduced. The authors demonstrate how diagnostics, design of programs and policies, and impact evaluation can be used to seek new solutions to the suffering and violence caused by development failures. In the second edition, more attention has been given to ongoing developments, such as: pursuit of the Sustainable Development Goals continuously rising global and national inequality health as a domestic and international public good cash transfers for social protection carbon trading for

sustainability This text is fully engaged with the most cutting-edge research in the field and equips readers with analytical tools for impact evaluation of development programs and policies, illustrated with numerous examples. It is underpinned throughout by a wealth of student-friendly features, including case studies, quantitative problem sets, end-of-chapter questions, and extensive references. The companion website contains Excel and Stata exercises for students alongside materials for instructors. This unique text is ideal for those taking courses in development economics, economic growth, and development policy, and will provide an excellent foundation for those wishing to pursue careers in development.
