17. [Handbook of Recycled Concrete and Demolition Waste](#) Fernando Pacheco-Torgal, Vivian Tam, João Labrincha, Yining Ding, Jorge de Brito, 2013-09-30 The civil engineering sector accounts for a significant percentage of global material and energy consumption and is a major contributor of waste material. The ability to recycle and reuse concrete and demolition waste is critical to reducing environmental impacts in meeting national, regional and global environmental targets. Handbook of recycled concrete and demolition waste summarises key recent research in achieving these goals. Part one considers techniques for managing construction and demolition waste, including waste management plans, ways of estimating levels of waste, the types and optimal location of waste recycling plants and the economics of managing construction and demolition waste. Part two reviews key steps in handling construction and demolition waste. It begins with a comparison between conventional demolition and construction techniques before going on to discuss the preparation, refinement and quality control of concrete aggregates produced from waste. It concludes by assessing the mechanical properties, strength and durability of concrete made using recycled aggregates. Part three includes examples of the use of recycled aggregates in applications such as roads, pavements, high-performance concrete and alkali-activated or geopolymer cements. Finally, the book discusses environmental and safety issues such as the removal of gypsum, asbestos and alkali-silica reaction (ASR) concrete, as well as life-cycle analysis of concrete with recycled aggregates. Handbook of recycled concrete and demolition waste is a standard reference for all those involved in the civil engineering sector, as well as academic researchers in the field. Summarises key recent research in recycling and reusing concrete and demolition waste to reduce environmental impacts and meet national, regional and global environmental targets Considers techniques for managing construction and demolition waste, including waste management plans, ways of estimating levels of waste, the types and optimal location of waste recycling plants Reviews key steps in handling construction and demolition waste

18. [Dictionary of Steroids](#) R.A. Hill, H.L.J. Makin, D.N. Kirk, G.M. Murphy, 1991-05-23 This dictionary, the first extensive compilation since Fieser's Steroids in 1959, is one of a uniform series derived from the Chapman and Hall Chemical Database. For the first time bibliographic, structural and chemical data on over 10,000 of the most important steroids has been brought together to provide an invaluable reference work for chemists working in this field. The dictionary documents all known naturally occurring steroids (sterols, bile acids, sapogenins, cardanolides, bufanolides, steroidal alkaloids) and an extensive selection of the most important synthetic and semisynthetic steroids. The presentation of data is uniform with the established Dictionary of Organic Compounds, fifth edition, with accurately drawn diagrams showing stereochemistry and comprehensive, labelled bibliographies giving rapid access to primary literature sources. A small proportion of entries are based on entries in the Dictionary of Organic Compounds which have been substantially expanded and brought up to date with references to the recent literature (coverage up to August 1990). The majority are wholly new with particularly strong natural product coverage. Access to this information is provided by name, molecular formula, CAS registry number, type of compound, and species indexes--which comprise Volume 2. 19. [Treaty Series 1634/1635](#) United Nations Office of Legal Affairs, 1995-12-31 In accordance with Article 102 of the Charter and the relevant General Assembly Resolutions, every treaty and international agreement registered or filed and recorded with the Secretariat since 1946 is published in the United Nations Treaty Series. At present, the collection includes about 30,000 treaties reproduced in their authentic languages, together with translations into English and French, as necessary. The Treaty Series, where treaties are published in the chronological order of registration, also provides details about their subsequent history (i.e., participation in a treaty, reservations, amendments, termination, etc.). Comprehensive indices covering 50-volume-lots are published separately.
