*Getting the message through: A Branch History of the U.S. Army Signal Corps* Rebecca Robbins Raines, 1996 Getting the Message Through, the companion volume to Rebecca Robbins Raines' Signal Corps, traces the evolution of the corps from the appointment of the first signal officer on the eve of the Civil War, through its stages of growth and change, to its service in Operation DESERT SHIELD/DESERT STORM. Raines highlights not only the increasingly specialized nature of warfare and the rise of sophisticated communications technology, but also such diverse missions as weather reporting and military aviation. Information dominance in the form of superior communications is considered to be sine qua non to modern warfare. As Raines ably shows, the Signal Corps--once considered by some Army officers to be of little or no military value--and the communications it provides have become integral to all aspects of military operations on modern digitized battlefields. The volume is an invaluable reference source for anyone interested in the institutional history of the branch.

*Freedom in the World 2006* Freedom House, 2006 Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 192 countries and a group of select territories are used by policy makers, the media, international corporations, and civic activists and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. Press accounts of the survey findings appear in hundreds of influential newspapers in the United States and abroad and form the basis of numerous radio and television reports. The Freedom in the World political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development.

**A Soldier Supporting Soldiers** Joseph Heiser, Jr., Jr. Joseph Heiser, M.,2005-01-01 A Soldier Supporting Soldiers is the second in a series of works by distinguished U.S. Army logisticians that focus on firsthand experience in the organization of combat service support. These studies seek to describe and analyze problems still familiar to those who provide the materials and other support required by today's Army. Their authors also clearly underscore the challenges that their successors will face in an era of limited resources. With active careers that span the last half century of Army history General Carter B. Magruder, in the recently published *Recurring Logistic Problems As I Have Observed Them* and Lt. Gen. Joseph M. Heiser, Jr., in the pages that follow, have much to say to the student of military operations about what constitutes efficiency and effectiveness in military logistics. General Heiser's study marks a clear departure from the Center of Military History's policy of refraining from publishing biographies or memoirs. Although we believe that the compelling reasons for establishing such a policy fifty years ago still pertain, we also think an exception should be made in this case. General Heiser has a unique skill in conveying important logistical lessons through personal anecdotes. Especially in his early chapters, he uses specific incidents from his own career to illuminate for his reader larger principles of logistics. Thus in this special instance our audience is treated to an extended, personal account that in some ways has just as much to say about military leadership and ethic as it does about logistics. The logistical principles discussed in this study appear especially vital to today's military students, given the recent massive challenges tologisticians posed by operations in the Persian Gulf and possible future contingency operations. I urge them to study and reflect on the insights provided in the engaging chapters that follow. Harold W. Nelson Washington, D.C.Brigadier General, USA December 1990Chief of Milit
