Open Technical Communication Tamara Powell,Jonathan Arnett,Cassandra Race,Monique Logan,Tiffani Reardon,2020-08-19 Technical communication is the process of making and sharing ideas and information in the workplace as well as the set of applications such as letters, emails, instructions, reports, proposals, websites, and blogs that comprise the documents you write...Specifically, technical writing involves communicating complex information to a specific audience who will use it to accomplish some goal or task in a manner that is accurate, useful, and clear. Whether you write an email to your professor or supervisor, develop a presentation or report, design a sales flyer, or create a web page, you are a technical communicator. (Chapter 1)

Kudo Kids: The Mystery of the Masked Medalist Maia Shibutani,Alex Shibutani,Michelle Schusterman,2021-04-06 From two-time Olympic bronze medalists Maia and Alex Shibutani comes a fun-filled, fast-paced middle-grade mystery set at the 2020 Tokyo Olympics. Andy and Mika are going to Tokyo! The Kudo Kids have never been to Japan before, so they can't believe they get to attend the Summer Olympics there. The siblings plan to eat tons of delicious Japanese food, watch every event they can, and win a super-popular new game called OlympiFan. Developed by a mysterious former medalist, OlympiFan brings players together from all over the world to search Tokyo for virtual medals and clues to the creator's identity. Andy loves puzzles, and he's determined to crack this one, especially since the winning team will get to be beta testers for the Masked Medalist's future games! Mika wants to find as many clues as she can, but she also has a secret goal of her own--one that could get her into big trouble. But when someone sabotages the game, the Kudo Kids have an even bigger mystery to solve than the Masked Medalist's identity. If they want to capture the gold, Mika and Andy have to figure out who's trying to stop their team before someone beats them to the grand prize!

Advanced Machine Learning with Python John Hearty,2016-07-28 Solve challenging data science problems by mastering cutting-edge machine learning techniques in Python About This Book Resolve complex machine learning problems and explore deep learning Learn to use Python code for implementing a range of machine learning algorithms and techniques A practical tutorial that tackles real-world computing problems through a rigorous and effective approach Who This Book Is For This title is for Python developers and analysts or data scientists who are looking to add to their existing skills by accessing some of the most powerful recent trends in data science. If you've ever considered building your own image or text-tagging solution, or of entering a Kaggle contest for instance, this book is for you! Prior experience of Python and grounding in some of the core concepts of machine learning would be helpful. What You Will Learn Compete with top data scientists by gaining a practical and theoretical understanding of cutting-edge deep learning algorithms Apply your new found skills to solve real problems, through clearly-explained code for every technique and test Automate large sets of complex data and overcome time-consuming practical challenges Improve the accuracy of models and your existing input data using powerful feature engineering techniques Use multiple learning techniques together to improve the consistency of results Understand the hidden structure of datasets using a range of unsupervised techniques Gain insight into how the experts solve challenging data problems with an effective, iterative, and validation-focused approach Improve the effectiveness of your deep learning models further by using powerful ensembling techniques to strap multiple models together In Detail Designed to take you on a guided tour of the most relevant and powerful machine learning techniques in use today by top data scientists, this book is just what you need to push your Python algorithms to maximum potential. Clear examples and detailed code samples demonstrate deep learning techniques, semi-supervised learning, and more - all whilst working with real-world applications that include image, music, text, and financial data. The machine learning techniques covered in this book are at the forefront of commercial practice. They are applicable now for the first time in contexts such as image recognition, NLP and web search, computational creativity, and commercial/financial data modeling. Deep Learning algorithms and ensembles of models are in use by data scientists at top tech and digital companies, but the skills needed to apply them successfully, while in high demand, are still scarce. This book is designed to take the reader on a guided tour of the most relevant and powerful machine learning techniques. Clear descriptions of how techniques work and detailed code examples demonstrate deep learning techniques, semi-supervised learning and more, in real world applications. We will also learn about NumPy and Theano. By the end of this book, you will learn a set of advanced Machine Learning techniques and acquire a broad set of powerful skills in the area of feature selection & feature engineering. Style and approach This book focuses on clarifying the theory and code behind complex algorithms to make them practical, useable, and well-understood. Each topic is described with real-world applications, providing both broad contextual coverage and detailed guidance.

Diversity, Equity, and Inclusion in Action Christine Bombaro,2020-10-27 All too often, in a hurried attempt to “catch up,” diversity training can create division among staff or place undue burdens on a handful of employees. Instead, academic libraries need approaches to diversity, equity, and inclusion (DEI) that position these priorities as ongoing institutional and professional goals. This book’s model programs will help academic libraries

do exactly that, sharing a variety of initiatives that possess clear goals, demonstrable outcomes, and reproducible strategies. Librarians, administrators, and directors will all benefit from the programs detailed inside, which include such topics as a university library's community of practice for interactions and learning around DEI; cultural competency training to create more welcoming instruction spaces; student workshops on literature searches that mitigate bias; overcoming the historic tendency to marginalize LGBTQ+ representation in archives; a curriculum and design workshop that moved from discussing social values to embedding them in actions; the founding of a library-led LGBT club for students at a rural community college; a liberal arts college's retention-boosting program for first-generation students; tailoring a collection and library services to the unique needs of student veterans; and a framework for moving from diversity to equity and inclusion, toward a goal of social justice.

Five Days Wes Moore, Erica L. Green, 2020 A kaleidoscopic account of five days in the life of a city on the edge, told through seven characters on the frontlines of the uprising that overtook Baltimore and riveted the world, from the New York Times bestselling author of *The Other Wes Moore*. When Freddie Gray was arrested for possessing an illegal knife in April 2015, he was, by eyewitness accounts that video evidence later confirmed, treated roughly as police loaded him into a vehicle. By the end of his trip in the police van, Gray was in a coma he would never recover from. In the wake of a long history of police abuse in Baltimore, this killing felt like a final straw--it led to a week of protests and then five days described alternately as a riot or an uprising that set the entire city on edge, and caught the nation's attention. Wes Moore is one of Baltimore's most famous sons--a Rhodes Scholar, bestselling author, decorated combat veteran, White House fellow, and current President of the Robin Hood Foundation. While attending Gray's funeral, he saw every strata of the city come together: grieving mothers; members of the city's wealthy elite; activists; and the long-suffering citizens of Baltimore--all looking to comfort each other, but also looking for answers. Knowing that when they left the church, these factions would spread out to their own corners, but that the answers they were all looking for could only be found in the city as a whole, Moore--along with Pulitzer-winning coauthor Erica Green--tells the story of the Baltimore uprising. Through both his own observations, and through the eyes of other Baltimoreans: Partee, a conflicted black captain of the Baltimore Police Department; Jenny, a young white public defender who's drawn into the violent center of the uprising herself; Tawanda, a young black woman who'd spent a lonely year protesting the killing of her own brother by police; and John DeAngelo, scion of the city's most powerful family and owner of the Baltimore Orioles, who has to make choices of conscience he'd never before confronted. Each shifting point of view contributes to an engrossing, cacophonous account of one of the most consequential moments in our recent history--but also an essential *cri de coeur* about the deeper causes of the violence and the small seeds of hope planted in its aftermath.

The War We Never Fought Peter Hitchens, 2012-12-06 Again and again British politicians, commentators and celebrities intone that 'The War on Drugs has failed'. They then say that this is an argument for abandoning all attempts to reduce drug use through the criminal law. Peter Hitchens shows that in Britain there has been no serious 'war on drugs' since 1971, when a Tory government adopted a Labour plan to implement the revolutionary Wootton report. This gave cannabis, the most widely used illegal substance, a special legal status as a supposedly 'soft' drug (in fact, Hitchens argues, it is at least as dangerous as heroin and cocaine because of the threat it poses to mental health). It began a progressive reduction of penalties for possession, and effectively disarmed the police. This process still continues, behind a screen of falsely 'tough' rhetoric from politicians. Far from there being a 'war on drugs', there has been a covert surrender to drugs, concealed behind an official obeisance to international treaty obligations. To all intents and purposes, cannabis is legal in Britain, and other major drugs are not far behind. In *The War We Never Fought*, Hitchens uncovers the secret history of the government's true attitude, and the increasing recruitment of the police and courts to covert decriminalisation initiatives, and contrasts it with the rhetoric. Whatever and whoever is to blame for the undoubted mess of Britain's drug policy, it is not 'prohibition' or a 'war on drugs', for neither exists.

The Ultimate Scanner Bill Cheek, 1995 What's the Ultimate Scanner? A radio receiver with wires, dials, knobs, switches and meters that were never on the manufacturer's plans? A discipline that leads into the next generation of scanning? A way to have it all: to cover all the bands, all the channels and miss nothing but what you choose to exclude? A system that gives you total control over everything that comes out of your speaker? It's this book, which describes the emergence of the scanning hobby into the information and computing era, where automation adds fun, channels and functionality to radio monitoring.

Christmas in Austin Benjamin Markovits, 2019-11-05 'A novel that everyone should read before they face their own family Christmas.' The Times When the four Essinger children gather in Austin for Christmas, they all bring their news. Nathan wants to become a federal judge. Susie's husband has taken a job in England. Jean has asked her boyfriend and (once-married) boss to meet her family. Paul has broken up with Dana, mother of their son Cal. But their parents have plans, too, and Liesel, the matriarch, has invited Dana and Cal to stay, hoping to bring them back together. As the week unfolds, each of the Essingers has to confront the tensions and conflicts between old families and new.

Chemical Proteomics Gerard Drewes, Marcus Bantscheff, 2011-11-08 The multidisciplinary science of chemical proteomics studies how small molecules of synthetic or natural origin bind to proteins and modulate their function. In *Chemical Proteomics: Methods and Protocols*, expert researchers in the field provide key techniques to investigate chemical proteomics focusing on analytical strategies, how probes are generated, techniques for the discovery of small molecule targets and the probing of target function, and small molecule ligand and drug discovery. Written in the highly successful *Methods in Molecular Biology*™ series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and key tips on troubleshooting and avoiding known pitfalls. Authoritative and practical, *Chemical Proteomics : Methods and Protocols* seeks to provide methodologies that will contribute to a wider application of chemical proteomics methods in biochemical and cell biological laboratories.

Jazz in the Key of Light Ken Franckling, George Wein, Gilbert Design Associates, 2014-10-15 JAZZ IN THE KEY OF LIGHT is not your typical fine art photography book. In addition to visually capturing a variety of the world's jazz greats in performance or moments of personal reflection, author Ken Franckling paired the images with essential quotes from interviews he conducted with those same musicians in assignments for a variety of mainstream and music publications. The spotlighted musicians, some captured in historically important images, range from legends Dave Brubeck, Miles Davis and Sarah Vaughan to a variety of today's rising stars, including Nicki Parrott, Gregory Porter and Miguel Zenón.

[How to Pass OSCP Series: Windows Privilege Escalation Step-By-Step Guide](#) Alan Wang, 2020-11-13 This book is the first of a series of *How To Pass OSCP* books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole

process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more.
