Love Bites Joan Booth,2017-10-30 Love is one of the most profound, mysterious, and complicated emotions known to human beings. There are many types of love, which can be expressed in numerous ways. We seek to establish a means of relating to another to achieve deep and meaningful fulfillment that nurtures and sustains us. Love is commonly experienced by way of a romantic relationship with a partner with whom we feel compatible. Loving another has many events that can affect us several ways. We can experience joy, anguish, longing, desperation, and confusion. Love Bites illustrates the story of emotions experienced by two people who share a connection unlike any they have ever known and provides a visual perspective to explain feelings that can be difficult to express in words.

Rick Sammon's Creative Visualization for Photographers Rick Sammon,2015-01-09 The difference between seeing and looking is essential—much like the difference, in music, between hearing and listening. In Creative Visualization, master photographer, photo educator and photo instructor Rick Sammon presents his proven methodology for creative digital photography. His signature inspiring and motivating approach opens creative avenues for photographers in a variety of genres. With easy-to-follow examples, Sammon shows you how simple changes—with visualization, composition, post-processing, and more—can mean the difference between a snapshot and a great shot. This book, illustrated with more than 300 of Rick’s photographs, includes invaluable information about exposure, composition, subject choice, lighting, mood, and depth. In the Food for Thought section, Rick offers guidelines for setting goals, getting motivated, connecting with a subject, learning, painting with light, thinking like a painter and more. In Develop Your Creative Vision, Rick takes you on an exploration of composition, exposure, making images with impact, creating a mood, altering reality, and pursuing your passion. Corrective and creative image processing techniques, as well as HDR, EDR, panoramas and black-and-white imaging, are covered in the Image Processing Specialties section. Rick also shares a chapter on self-assignments – photo challenges – that you can use to expand your photographic horizons. Canon Explorer of Light and master photographer Rick Sammon shares the secrets behind learning to see photographically, to make the necessary changes that will have a noticeable impact on your photographs. Includes easy-to-follow instruction for post-processing techniques in Lightroom and Photoshop. Tips for making the best HDR and EDR images are also included, as well as illustrations of how plug-ins can help photographers awaken the artist within. Uses clear, visual examples of photo failures photographs side-by-side with successful ones, outlining the small, but important changes—to composition, framing, exposure, etc.—that can immediately make a significant difference.

Photography and Its Origins Tanya Sheehan,Andres Zervigon,2014-11-20 Recent decades have seen a flourishing interest in and speculation about the origins of photography. Spurred by rediscoveries of 'first' photographs and proclamations of photography's death in the digital age, scholars have been rethinking who and what invented the medium. Photography and Its Origins reflects on this interest in photography's beginnings by reframing it in critical and specifically historiographical terms. How and why do we write about the origins of the medium? Whom or what do we rely on to construct those narratives? What's at stake in choosing to tell stories of photography's genesis in one way or another? And what kind of work can those stories do? Edited by Tanya Sheehan and Andrés Mario Zervigón, this collection of 16 original essays, illustrated with 32 colour images, showcases prominent and emerging voices in the field of photography studies. Their research cuts across disciplines and methodologies, shedding new light on old questions about histories and their writing. Photography and Its Origins will serve as a valuable resource for students and scholars in art history, visual and media studies, and the history of science and technology.
