The Fifth Doctrine Karen Robards, 2019-03-19 With her back against the wall, everything’s on the line for Bianca St. Ives. She’s either going to save the world—or die trying. It took one hell of an effort for the authorities to finally get the jump on master manipulator Bianca St. Ives, but now that they have, it’s far from the capture she expected. Instead of taking her in, there’s an offer on the table, a one-shot deal that would allow Bianca to walk away scot-free as if they’d never found her. And all she has to do is run one last mission—the kind she might never return from. But if Bianca wants to go back to her normal life in Savannah, it’s not like she has a choice. An intelligence operation is already under way in North Korea, one that’s poised to end the country’s existing tyrannical regime for good. But first, the US need one of their own to go undercover as the female hacker who recently stole top secret intel from NORAD. Enter Bianca. After everything she’s seen, Bianca knows feeding fake information directly into the belly of the beast is about as dangerous as it gets. It could mean torture or endless imprisonment—assuming she survives. But it might also ignite the kind of chaos that forces a revolution. It might just change the world. Besides, if Bianca has to go down, she’s gonna go down swinging...

Dissecting the Hack Jayson E Street, 2015-07-20 Dissecting the Hack: The V3rb0t3n Network ventures further into cutting-edge techniques and methods than its predecessor, Dissecting the Hack: The F0rb1dd3n Network. It forgoes the basics and delves straight into the action, as our heroes are chased around the world in a global race against the clock. The danger they face will forever reshape their lives and the price they pay for their actions will not only affect themselves, but could possibly shake the foundations of an entire nation. The book is divided into two parts. The first part, entitled The V3rb0t3n Network, continues the fictional story of Bob and Leon, two hackers caught up in an adventure in which they learn the deadly consequence of digital actions. The second part, Security Threats Are Real (STAR), focuses on these real-world lessons and advanced techniques, as used by characters in the story. This gives the reader not only textbook knowledge, but real-world context around how cyber-attacks may manifest. The V3rb0t3n Network can be read as a stand-alone story or as an illustration of the issues described in STAR. Scattered throughout The V3rb0t3n Network are Easter eggs—references, hints, phrases, and more that will lead readers to insights into hacker culture. Drawing on The V3rb0t3n Network, STAR explains the various aspects of reconnaissance; the scanning phase of an attack; the attacker’s search for network weaknesses and vulnerabilities to exploit; the various angles of attack used by the characters in the story; basic methods of erasing information and obscuring an attacker’s presence on a computer system; and the underlying hacking culture. All new volume of Dissecting the Hack by Jayson Street, with technical edit by Brian Martin Uses actual hacking and security tools in its story – helps to familiarize readers with the many devices and their code features cool new hacks and social engineering techniques, in real life context for ease of learning

Seen, Heard, and Paid Alan Henry, 2022-06-07 The real tools for career success and work satisfaction for anyone feeling undermined or marginalized at their job, from a productivity expert and editor at Wired. “Alan Henry doesn’t just illuminate the invisible barriers that often stand in the way of success—he shines a light on what you can do to break through them.”—Adam Grant, #1 New York Times bestselling author of Think Again and host of the TED podcast WorkLife For over twenty years, Alan Henry has written about using technology and productivity techniques to work and live better for publications such as Lifehacker, The New York Times, and Wired. But he found that as a Black man he didn’t have access to some of the more powerful ways to hack your job—like only checking email once a day or blocking out time on your calendar to do deep work. In fact, he found that even when he landed a prestigious title at the Times, there were moments when he was still overlooked and excluded from the most interesting and career-boosting work. This led him to first explore these struggles in a Times piece titled “Productivity Without Privilege.” Now he goes even deeper, interviewing experts across multiple fields to come up with powerful tools to overcome the forces of marginalization. In Seen, Heard, and Paid, Henry shares the new work rules that may finally allow people of color, women, and LGBTQ+ folks to have the same access to career advancement and rewarding work as those with more privilege, including: How to Be Seen: Only spend time on work that gets you attention. How to Be Heard: Figure out your unique contribution. How to Get Paid: Data is power and power is money. Whether you’re dealing with microaggressions, trying to get the glamour work instead of the office housework, weighing the pluses and minuses of working remotely, or deciding it’s time to look for a new opportunity, Seen, Heard, and Paid will help you feel informed, supported, and empowered.

Would You Baptize an Extraterrestrial? Guy Consolmagno, SJ, Paul Mueller, SJ, 2014-10-07 Witty and thought provoking, two Vatican astronomers shed provocative light on some of the strange places where religion and science meet. “Imagine if a Martian showed up, all big ears and big nose like a child’s drawing, and he asked to be baptized. How would you react?” —Pope Francis, May, 2014 Pope Francis posed that question—without insisting on an answer!—to provoke deeper reflection about inclusiveness and diversity in the Church. But it’s not the first time that question has been asked. Brother Guy Consolmagno and Father Paul Mueller hear questions like that all the time. They’re scientists at the Vatican Observatory, the official astronomical research institute of the Catholic Church. In Would You Baptize an Extraterrestrial? they explore a variety of questions at the crossroads of faith and reason: How do you reconcile the The Big Bang with Genesis? Was the Star of Bethlehem just a pious religious story or an actual description of astronomical events? What really went down between Galileo and the Catholic Church—and why do the effects of that confrontation still reverberate to this day? Will the universe come to an end? And... could you really baptize an extraterrestrial? With disarming humor, Brother Guy and Father Paul explore these questions and more over the course of six days of dialogue. Would You Baptize an Extraterrestrial will make you laugh, make you think, and make you reflect more deeply on science, faith, and the nature of the universe.

Bootstrapping Trust in Modern Computers Bryan Parno, Jonathan M. McCune, Adrian Perrig, 2011-08-27 Trusting a computer for a security-sensitive task (such as checking email or banking online) requires the user to know something about the computer’s state. We examine research on securely capturing a computer’s state, and consider the utility of this information both for improving security on the local computer (e.g., to convince the user that her computer is not infected with malware) and for communicating a remote computer’s state (e.g., to enable the user to check that a web server will adequately protect her data). Although the recent Trusted Computing Initiative has drawn both positive and negative attention to this area, we consider the older and broader topic of bootstrapping trust in a computer. We cover issues ranging from the wide collection of secure hardware that can serve as a foundation for trust, to the usability issues that arise when trying to convey computer state information to humans. This approach unifies disparate research efforts and highlights opportunities for additional work that can guide real-world improvements in computer security.
