**The Dabare Snake Launcher** Joelle Presby,2022-11-01 A RACE TO BUILD THE FIRST SPACE ELEVATOR IN AFRICA New money, old tribes, and international megacorps race to build the first space elevator. With a little Dabare magic, it just might work! The Sadous, an oil-rich West African family, are handed a plum contract as repayment for a decades-old favor that could make the next generation even richer if the family doesn't tear itself apart first. Two engineer daughters of the Sadou family, Pascaline and Maurie, upon whom the burden of success rests, have troubles of their own. One wants nothing more than to leave and make her own name as an engineering prodigy, while the other is troubled by fever dreams and snakes. Ethan Schmidt-Li is an ambitious megacorp executive with eyes on a big promotion—only to get more than he bargained for when put in charge of the company's make-or-break project. These are some of the people that Tchami "Chummy" Fabrice has brought together to an ambitious end—constructing the world's first space elevator in Africa and ensuring the space industry that it catapults will enrich the continent and all involved. They have the carbon nanofiber, prime land around Kilimanjaro, and a captured rock in orbit for the tether. The hard part will be getting all these different people working together long enough to see it built. At the publisher's request, this title is sold without DRM (Digital Rights Management). Praise for *The Dabare Snake Launcher* "Joelle Presby's novel is a fascinating fictional look behind the scenes of the construction of the world's first space elevator in a near-future version of Africa that has enough grounded elements to be thoroughly believable . . . The story maintains a keen eye on the largely larger-than-life characters and respect for the business processes, customs, and beliefs of the people on the ground making things happen." —Wole Talabi, Locus Award–nominated author and editor of *Africanfuturism: An Anthology* You guys should all be on the lookout for Joelle Presby's solo Baen novel *THE DABARE SNAKE LAUNCHER*. It is... remarkable. Just truly, truly remarkable." —David Weber, NYT Bestselling author of the Honorverse series *The Dabare Snake Launcher* is a very believable depiction of when this species decides to do something amazing: backstabbing, plotting, and inflamed passions galore. Presby has created a future that I could easily imagine reading on the news in a few decades, and the novel is all the better for it. —Warped Factor "The Dabare Snake

Launcher takes you on a journey of possibilities, an Africa foremost in groundbreaking technology and not focused on deprivation and poverty. Joelle's writing is nuanced . . . There's family drama . . . romance . . . and laugh-out-loud humour. Writing is vivid and the characters fascinating." —Hannah Onoguwe, author and poet Set in Cameroon, where the author lived for many years, and full of lovely detail about the local cultures, clashes between traditional and modern, and differing expectations. —Jane Lindskold, author of the Star Kingdom series and Over Where series.

**Launchers, Lobbers, and Rockets Engineer** Lance Akiyama,2018-06-19 After the huge successes of Rubber Band Engineer and Duct Tape Engineer, we finally take away the boundaries of a single category and let author Lance Akiyama create twenty devious weapons of backyard warfare. Each of these launchers are made from PVC, soda bottles, rubber bands, hairspray cans, and anything you might find in the junk drawer, and are capable of firing marshmallows, poker chips, tennis balls, sponges, and plenty more. This book is written for adults, but kids and teens can get in on the fun, too. Projects range from simple shooters to be built by novice crafters, to the more complicated Slide

Action Rubber Band Gun, A Wrist-Mounted Crossbow, and even a Desk Drawer Booby Trap.

**AMAZING SOLAR SYSTEM PROJECTS** Delano Lopez,Shawn Braley,2008-01-01 Amazing Solar System Projects You Can Build Yourself introduces readers ages 9 and up to the basic elements of the solar system with over 25 hands-on building projects and activities. Readers learn about the sun, the planets and their moons, meteors and comets, and the amazing tools that astronomers and astronauts have used to study the solar system over the years. Amazing Solar System Projects You Can Build Yourself provides detailed step-by-step instructions and diagrams for creating the projects, which include making a greenhouse to see what happens on Venus and constructing a model of the phases of the moon to demonstrate why the moon has phases. Fascinating facts, anecdotes, biographies, and trivia are interspersed with the fun projects to teach readers all about the solar system.

*With Stars in Their Eyes* Jim Bernard Breckinridge,Alec M. Pridgeon,2022 Aden B. Meinel and wife Marjorie P. Meinel stood at the confluence of several overarching technological developments of the 20th century: postwar aerial surveillance by spy planes and satellites, solar energy, the evolution of telescope design, interdisciplinary optics, and photonics. In 1945 he was a Navy Ensign ordered to find the secret tunnels in Nazi Germany where the V-2 rockets menacing Great Britain and Belgium were being manufactured. After receiving both his B.A. degree and Ph.D. in astronomy from the University of California at Berkeley within three years, Aden was invited to join the scientific staff at Yerkes Observatory/University of Chicago. While there he was selected by the National Science Foundation to manage the development of a new national observatory on Kitt Peak, Arizona, and served as its first Director. In the early 1960s he founded the Optical Sciences Center at the University of Arizona, which

later metamorphosed into the College of Optical Sciences with the doctoral program in interdisciplinary optics. It was here that he also designed the first Multiple Mirror Telescope and with wife Marjorie pioneered the feasibility of solar energy power on a commercial scale. Aden's knowledge and expertise in optics made him invaluable in research on cameras for spy satellites and spy planes overflying the Soviet Union and Southeast Asia. After retirement the Meinels worked for NASA/JPL on the precursor of the James Webb Space Telescope and on the exoplanet program. They also served on the team that corrected spherical aberration in the Hubble Space Telescope--
