The Solotype Catalog of 4,147 Display Typefaces Dan X. Solo,2014-05-05 The author of many books on typography, Dan X. Solo was also the proprietor of his own typography shop in Oakland, California — an establishment dedicated to unusual typography and special effects. This comprehensive catalog offers graphic designers a dazzling selection of over 4,000 typefaces and optical effects available from Solotype Typographers. Here, in Solo's words, is a great cast of characters — the alphabet — abetted by a cornucopia of typographical ideas and an endless resource of letters, words, phrases, slogans, logos, humorous comments, headlines, and graphic symbols. Individual sections of the book display a rich variety of typefaces in categories such as Condensed, Victorian, Art Nouveau, Art Deco, Rustic, Thick-and-tin, Calligraphic, Uncials, Latins, and Blackletter. Samples are imaginatively presented. Stagecoach, for example, is printed in Fargo typeface, evoking dusty trails, rawhide, and ten-gallon hats, while Sizzling summer savings appears appropriately in the flamboyant Firebug typeface. All typefaces are indexed for quick and easy reference. As entertaining as it is practical and useful, this impressive treasury of versatile typefaces and optical effects will be indispensable to busy commercial artists as an inexhaustible source of typographic ideas and a swipe file of words, phrases, and letters for use in graphic art projects.

Awesome Alphabets Mike Artell,2004-05 Can you draw letters that look like bones, pencils, or tools? What about broken, slimy, or fuzzy letters? Kids will love copying these wacky alphabets, and will be inspired to create their own fonts. The book includes examples of 17 different alphabets, followed by sections on cartoon words (such as drawing words in the shape of the things they describe), special effects (such as loops), and ideas for what to do with these newly learned skills. Use this resource to encourage students to be imaginative and to make lettering that can enhance school projects of all kinds. Grades 2-8. Illustrated.

**Adrian Frutiger - Typefaces** Heidrun Osterer,Philipp Stamm,2014-05-08 The international creation of typefaces after 1950 was decisively influenced by the Swiss type designer Adrian Frutiger. His Univers typeface and the machine-readable font OCR-B, which was adopted as an ISO standard, are milestones, as is his type for the Paris airports, which set new standards for signage types and evolved into the Frutiger typeface. With his corporate types, he helped to define the public profiles of companies such as the Japanese Shiseido line of cosmetics. In all he created some fifty types, including Ondine, Méridien, Avenir, and Vectora. Based on conversations with Frutiger himself and on extensive research in France, England, Germany, and Switzerland, this publication provides a highly detailed and accurate account of the type designer's artistic development. All of his types – from the design phase to the marketing stage – are illustrated and analyzed with reference to the technology and related types. Hitherto unpublished types that were never realized and more than one hundred logos complete the picture. This second, revised and expanded study edition, which now has an index, makes Frutiger's achievement even more accessible.

**Studio Handbook: Lettering & Design** Samuel Welo,2017-01-18 This beautifully designed little book reflects the elegance of the Art Deco period and will prove a useful and entertaining resource for modern typographers and graphic artists. In addition to demonstrating the appeal and effectiveness of great lettering, it abounds in material that designers can adapt — borders, ribbons, dingbats, rules, and more. Like the 1931 first edition, it is printed in two colors and graced with a decorative hardcover binding.

Transitional Faces Alastair Johnston,2013 Literary Nonfiction. Biography. Art. Publishing History & Typography. Long thought to be one person, Richard Austin turns out to be a father and son who shared the same name. Although Austin's importance to the history of typography was never in question, his (or rather their) dates and final resting place were forgotten. After a decade of research, printing historian Alastair Johnston has written a biography of the Austin family in which he assesses their contributions to the development of book design and typography at a crucial time in British publishing history. Richard Austin (1756-1832) took the innovations of John Baskerville and, through the sharpness and delicacy of his type cutting, perfected the typefaces of the period between the Old Face of Caslon and the Modern faces of the Didots and Bodoni, an era

described as 'Transitional' by Updike, which saw the first flowering of the British fine press. In his later work, Austin pulled back from the impractical hair-lines of the Modern style to a workable type now known as Scotch Roman which became the workhorse of many sensible printers in Britain and North America. Austin's son and namesake Richard Turner Austin (1781-1842) was a commercial wood-engraver, producing blocks for scores of works in the first three decades of the nineteenth century. He was not a Bewick pupil but did learn by copying the work of John & Thomas Bewick, working alongside his father in Paul's Alley, St Giles Cripplegate, London (that's St Giles at left, on the cover). He also exhibited paintings at the Royal Academy. In 1819, Austin Jr relocated to Edinburgh and began illustrating children's books for the house of Oliver & Boyd.

**ABC 3D** Marion Bataille,2008 'S' spins, 'V' becomes 'W' via a mirrored page and other letters reveal themselves in pop-ups and sliding panels. All in simple black, white and red tones.  
**Circus Alphabets** Dan X. Solo,Solotype Typographers,1989-11-01 Attractive sourcebook of royalty-free, immediately usable typefaces recalls old-fashioned print styles found on posters and broadsides. Includes eerie Monster Outline, Raindrops, and Wilcox Initials; the glamorous Diamond Inlay, Startime, Golden Era, and much more. Varied sizes; mostly tall, fat and bold shapes.
