Emerging Solutions for Musical Arts Education in Africa Pan African Society for Musical Arts Education,2005 Emerging Solutions for Musical arts Education in South Africa offers peer-reviewed articles prepared for the 2003 Conference of the Pan African Society for Musical Arts Education in Africa held in Kisumu, Maseno, Kenya. Not only does this publication voice the solutions offered by 31 authors from the African continent and beyond, but it presents in a unique and highly accessible fashion the collective voice of the conference participants. True to the spirit of ubuntu - an individual is only a person through other people (their communities) - this publication is a reflection of the essence of an overarching sub-Saharan philosophy; the contents represents a conference where papers were not presented, but where conference participants engaged to discuss solutions for the musical arts on the African continent. While the individual voice has been given its rightful place, the collective voice represents an emergent song composed by the scholarly community in oral fashion. This publication provides insight into the problems of musical arts education in Africa; and solutions for musical arts education.

Affective Health and Masculinities in South Africa Hans Reihling, 2020-04-03 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Of Moths and Men Judith Hooper, 2002 In this revelatory work, Judith Hooper uncovers the intellectual rivalries, petty jealousies, and flawed science behind one of the most famous experiments in evolutionary biology. Bernard Kettlewell's 1953 experiment on the peppered moths of England made him a media star on the order of Jonas Salk -- but also an unlikely tragic hero. As Hooper recounts in this rollicking scientific detective story, the truth can be subverted when the stakes are

very high. Book jacket.

Terrorism and the Electric Power Delivery System National Research Council, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee on Enhancing the Robustness and Resilience of Future Electrical Transmission and Distribution in the United States to Terrorist Attack, 2012-11-25 The electric power delivery system that carries electricity from large central generators to customers could be severely damaged by a small number of well-informed attackers. The system is inherently vulnerable because transmission lines may span hundreds of miles, and many key facilities are unguarded. This vulnerability is exacerbated by the fact that the power grid, most of which was originally designed to meet the needs of individual vertically integrated utilities, is being used to move power between regions to support the needs of competitive markets for power generation. Primarily because of ambiguities introduced as a result of recent restricting the of the industry and cost pressures from consumers and regulators, investment to strengthen and upgrade the grid has lagged, with the result that many parts of the bulk high-voltage system are heavily stressed. Electric systems are not designed to withstand or quickly recover from damage inflicted simultaneously on multiple components. Such an attack could be carried out by knowledgeable attackers with little risk of detection or interdiction. Further well-planned and coordinated attacks by terrorists could leave the electric power system in a large region of the country at least partially disabled for a very long time. Although there are many examples of terrorist and military attacks on power systems elsewhere in the world, at the time of this study international terrorists have shown limited interest in attacking the U.S. power grid. However, that should not be a basis for complacency. Because all parts of the economy, as well as human health

and welfare, depend on electricity, the results could be devastating. Terrorism and the Electric Power Delivery System focuses on measures that could make the power delivery system less vulnerable to attacks, restore power faster after an attack, and make critical services less vulnerable while the delivery of conventional electric power has been disrupted.

Bad Boys, Bad Times Scott Longert, 2019 In 1937, the Great Depression was still lingering, but at baseball parks across the country there was a sense of optimism. Major League attendance was on a sharp rise. Tickets to an Indians game at League Park on Lexington and East 66th were \$1.60 for box seats, \$1.35 for reserve seats, and \$.55 for the bleachers. Cleveland fans were particularly upbeat-- Bob Feller, the teenage phenomenon, was a farm boy with a blistering fast ball. Night games were an exciting development. Better days were ahead. But there were mounting issues facing the Indians. For one thing, it was rumored that the team had illegally signed Feller. Baseball Commissioner Judge Kenesaw Mountain Landis was looking into that matter and one other. Issues with an alcoholic catcher, dugout fights, bats thrown into stands, injuries, and a player revolt kept things lively. In *Bad Boys, Bad Times: The Cleveland Indians and Baseball in the Prewar Years, 1937-1941*--the follow-up to his *No Money, No Beer, No Pennants: The Cleveland Indians and Baseball in the Great Depression*--baseball historian Scott H. Longert writes about an exciting period for the team, with details and anecdotes that will please fans all over.

Muslim Girl Amani Al-Khatahtbeh,2017-09-12 At nine years old, Amani Al-Khatahtbeh watched from her home in New Jersey as two planes crashed into the World Trade Center on September 11, 2001. That same year, she heard her first racial slur. *Muslim Girl: A Coming of Age* is the extraordinary account of Amani's coming of age in a country that too often seeks to marginalize women like her. Her spirited voice and unflinching honesty offer a fresh, deeply necessary counterpoint to current rhetoric about the place of Muslims in American life.
