The Latvian Language in the Digital Age Georg Rehm,Hans Uszkoreit,2012-08-30 This white paper is part of a series that promotes knowledge about language technology and its potential. It addresses educators, journalists, politicians, language communities and others. The availability and use of language technology in Europe varies between languages. Consequently, the actions that are required to further support research and development of language technologies also differ for each language. The required actions depend on many factors, such as the complexity of a given language and the size of its community. META-NET, a Network of Excellence funded by the European Commission, has conducted an analysis of current language resources and technologies. This analysis focused on the 23 official European languages as well as other important national and regional languages in Europe. The results of this analysis suggest that there are many significant research gaps for each language. A more detailed expert analysis and assessment of the current situation will help maximise the impact of additional research and minimize any risks. META-NET consists of 54 research centres from 33 countries that are working with stakeholders from commercial businesses, government agencies, industry, research organisations, software companies, technology providers and European universities. Together, they are creating a common technology vision while developing a strategic research agenda that shows how language technology applications can address any research gaps by 2020.

The Routledge Handbook of Sociolinguistics Around the World Martin J Ball,2009-12-16 Drawing on examples from a wide range of languages and social setting, The Routledge Handbook of Sociolinguistics Around the World is the first single-volume collection surveying current and recent research trends in international sociolinguistics. With over 30 chapters written by leading authorities in the region concerned, all continents and their respective regions are covered. The book will serve as an important tool to help widen the perspective on sociolinguistics to readers of English. Divided into sections covering: The Americas, Asia, Australasia, Africa and the Middle East, and Europe, the book provides readers with a solid, up-to-date appreciation of the interdisciplinary nature of the field of sociolinguistics in each area. It clearly explains the patterns and systematicity that underlie language variation in use, as well as the ways in which alternations between different language varieties mark personal style, social power and national identity. The Routledge Handbook of Sociolinguistics around the World is the ideal resource for all students on undergraduate sociolinguistics courses and researchers involved in the study of language, society and power. Trauma, Cultural Complexes, and Transformation Evija Volfa Vestergaard,2018-06-28 Trauma, Cultural Complexes, and Transformation: Folk Narratives and Present Realities contributes to our understanding of how culturally traumatic events affect present day realities, and suggests the potential for healing by combining theories on psychological trauma, cultural complexes, and transformations. It draws on insight from a range of disciplines, including Jungian psychology, literary criticism, folkloristics, neurosciences, quantum physics, and social studies. Evija Volfa Vestergaard maps folk narratives of human encounters with extra-human entities as communications of cultural traumas suffered by tellers who are embedded in particular historical and geographical settings, focusing on the little-explored globally emerging cultures of Latvia and South Africa, alongside the United States of America. These cultural narratives form a bridge to a discourse on the social, political, and economic issues faced by these countries and the world at large. Vestergaard outlines the parallels between dreams and visions of individuals essential in healing, and the mythological legend genre serving the same function for groups and cultures, demonstrating that the aim of these open-ended communications is not only to reveal hidden truth, but also to stir our imagination about potentialities. Healing of traumas demands a world of global relatedness based on nurturing kinship, and such a transformation begins with imagining. Trauma, Cultural Complexes, and Transformation represents essential reading for academics and students of Jungian and post-Jungian studies, folklore, psychology, cultural studies and anthropology, as well as Jungian analysts and psychotherapists.

Problems of and Perspectives on Language Acquisition Diāna Laiveniece,2019-01-15 This volume brings together a selection of articles about research conducted on language acquisition in the Baltic States, in Latvia and Lithuania; a field which has witnessed massive growth in recent years. It will stimulate the reader to ask questions, think of solutions, argue and propose counterarguments with regards to language acquisitions in this region. The driving force in this field is dialogue and argumentative discussion, not utilitarian notes and advice, and, through detailing a range of views on language acquisition problems and perspectives, this volume achieves that aim.

Persuasion Jane Austen,2008-04-17 'She had been forced into prudence in her youth, she learned romance as she grew older - the natural sequel of an unnatural beginning.' Anne Elliot seems to have given up on present happiness and has resigned herself to living off her memories. More than seven years earlier she complied with duty: persuaded to view the match as imprudent and improper, she broke off her engagement to a naval captain with neither fortune, ancestry, nor prospects. However, when peacetime arrives and brings the Navy home, and Anne encounters Captain Wentworth once more, she starts to believe in second chances. Persuasion celebrates romantic constancy in an era of turbulent change. Written as the Napoleonic Wars were ending, the novel examines how a woman can at once remain faithful to her past and still move forward into the future. ABOUT THE SERIES: For over 100 years Oxford World's Classics has made available the widest range of literature from

A Typological Perspective on Latvian Grammar Andra Kalnaca,2014-01-01 Theoretical studies of Latvian grammar have a great deal to offer to contemporary linguistics. Although traditionally Lithuanian has been the most widely studied Baltic language in diachronic and synchronic linguistics alike, Latvian has a number of distinctive features that can prove valuable both for historical, and perhaps even more so, for synchronic language research. Therefore, at the very least, contemporary typological, areal, and language contact studies involving Baltic languages should account for data from Latvian. Typologically, Latvian grammar is a classic Indo-European (Baltic) system with well-developed inflection and derivation. However, it also bears certain similarities to the Finno-Ugric languages, which can be reasonably explained by its areal and historical background. This applies, for example, to the mood system and its connections with modality and evidentiality in Latvian, also to the correlation between aspect and quantity as manifested in verbal and nominal (case) forms. The relations between debitive mood, certain constructions with reflexive verbs, and voice in Latvian are intriguing examples of unusual morphosyntactic features. Accordingly, the book focuses on the following topics: case system and declension (with emphasis on the polyfunctionality of case forms), gender, conjugation, tense and personal forms, aspect, mood, modality and evidentiality, reflexive verbs, and voice. The examples included in this book have been taken from the Balanced Corpus of Modern Latvian (Līdzsvarots musdienu latviešu valodas tekstu korpuss, available at www.korpuss.lv), www.google.lv, mass media, and fiction texts (see the List of language sources) without regard to relative frequency ratios.
