Software by Numbers Mark Denne,Jane Cleland-Huang,2003 - Opens the black box of methodologies and demonstrates that software development is fundamentally a value creation process - Covers new and radical approaches to software development that respond to business demands for shorter investment periods and increased agility - Provides software engineers tools for understanding enterprise-level value creation and managing financial objectives

Agile Methods Graziela Simone Tonin,Bernardo Estácio,Alfredo Goldman,Eduardo Guerra,2019-03-06 This book constitutes revised selected papers from the 9th Brazilian Workshop on Agile Methods, WBMA 2018, held in Campinas, Brazil, in October 2018. The 6 full and 1 short papers presented in this volume were carefully reviewed and selected from 18 submissions. Accepted papers in this edition present empirical results and literature reviews on agile requirements validation in Brazilian software development companies; a survey on Brazilian software processes about to be agile or not; an evaluation of an agile maturity model; strategies to increase customer value in agile software development; an agile development environment and scrum in a strongly hierarchical organization.

Value Creation from E-Business Models Wendy Currie,2004-08-21 Value Creation from E-Business Models provides a thorough analysis of what constitutes an e-business model. Unlike many e-business books available, this text draws together theoretical and empirical contributions from leading academic scholars in the field of management information systems. Divided into four parts, E-Business Models and Taxonomies; E-Business Markets; E-Business Customer Performance Measurement; and E-Business Vendor Applications and Services, this book is the critical dissection of E-Business that today's academic community needs. * World class academic contributors brought together in one volume * Demonstrates that

there are e-business models which create value for customers and vendors alike * Learn from the lessons of the past five years in developing and implementing e-business models

OECD/G20 Base Erosion and Profit Shifting Project Tax Challenges Arising from Digitalisation – Interim Report 2018 Inclusive Framework on BEPS OECD,2018-03-16 This interim report of the OECD/G20 Inclusive Framework on BEPS is a follow-up to the work delivered in 2015 under Action 1 of the BEPS Project on addressing the tax challenges of the digital economy.

OECD/G20 Base Erosion and Profit Shifting Project Aligning Transfer Pricing Outcomes with Value Creation, Actions 8-10 - 2015 Final Reports OECD,2015-10-05 Addressing base erosion and profit shifting (BEPS) is a key priority of governments. Innovation Design Elke den Ouden,2011-10-01 Innovation Design presents an approach to designing shared value for businesses, non-profit organizations, end-users and society. The societal and economic challenges we are currently facing – such as the aging population, energy scarcity and environmental issues – are not just threats but are also great opportunities for organizations. Innovation Design shows how organizations can contribute to the process of generating value for society by finding true solutions to these challenges. And at the same time it describes how they can capture value for themselves in business ecosystems that care for both people and planet. This book covers: creating meaningful innovations that improve quality of life, engage users and provide value for organizations and other stakeholders, guiding the creation of shared value throughout the innovation process, with a practical and integrative approach towards value that connects ideas from economics, psychology, sociology and ecology, designing new business models and

business ecosystems to deliver sustainable benefits for all the involved parties and stakeholders, addressing both tangible and intangible value. Innovation Design gives numerous examples of projects and innovations to illustrate some of the challenges and solutions you may encounter in your journey of designing meaningful innovations and creating shared value. It also offers practical methods and tools that can be applied directly in your own projects. And in a fast-changing world, it provides a context, a framework and the inspiration to create value at every level: for people, for organizations and for the society in which we live.

Value Creation through Executive Development Solomon Akrofi,2018-12-07 The ability of organisations to generate long-term value and growth depends to a very large extent on the capacity of the executive cohort to conceive and implement strategic initiatives through a well-motivated and enabled workforce. However, generating consistent value in today's volatile, uncertain, complex and ambiguous (VUCA) and rapidly evolving digital economic landscape can be challenging and, therefore, executives need to update their capabilities regularly to align with the changing value drivers required for long-term growth. To achieve the expected value and growth at a more sustainable level, executive development must be managed as a strategic asset and optimised through effective design and implementation and the effects must be proactively evaluated through meaningful leading indicators and actual 'hard' measures. Value Creation through Executive Development, therefore, offers a well-supported and clearly structured approach to address the gap between executive development initiatives and the creation of long-term organisational value and growth. This book provides a valuable resource to executives and management development professionals who have experienced frustration about the lack of non-value-adding executive development programmes. It also serves as a professional resource for managers of executive and management

development programmes, organisational development departments and organisational development consultants, allowing them to integrate this material into existing programmes to achieve value-centric outcomes and to achieve long-term performance targets. Additionally, it serves as a teaching resource for participants in executive/management development courses or seminars globally; offering them the capacity to conduct value-centric initiatives and gain the capacity to influence the tactical, operational and strategic dimensions of their organisational performance.

Co-creating for Context in the Transfer and Diffusion of IT Amany Elbanna,Shane McLoughlin,Yogesh K. Dwivedi,Brian Donnellan,David Wastell,2022-10-01 This volume, IFIP AICT 660, constitutes the refereed proceedings of the IFIP WG 8.6 International Working Conference Co-creating for Context in Prospective Transfer and Diffusion of IT on Transfer and Diffusion of IT, TDIT 2022, held in Maynooth, Ireland, during June 15–16, 2022. The 19 full papers and 10 short papers presented were carefully reviewed and selected from 60 submissions. The papers focus on the re-imagination of diffusion and adoption of emerging technologies. They are organized in the following parts:

Reusing Open Source Code Manuel Sojer,2010-11-04 The reuse of existing code through their software developers is critical for firms to ensure efficient development of high-quality software. Manuel Sojer empirically investigates which factors influence software developers to reuse open source code and what causes them to comply with the resulting license obligations or not.

Value Dominant Logic Gautam Mahajan,2018-12-07 Increasing disruption, diminishing returns, and demanding customers require business leaders to create more value, remain relevant, and stay ahead of competition. CEOs must evolve a value creation culture for the company in order to properly balance the interests of customers, employees, investors, and the marketplace. People who succeed, succeed because they create value, but they do so unconsciously. Creating value consciously makes you create more value and destroy less value. Doing something good or improving the well-being of someone creates

value. You buy and re-buy a product on a value basis. Value dominant logic is relevant to all of us. Value creation is used in all fields, but is not well understood. This book takes value creation to the next level, showing how value is basic to human endeavor and is not focused on enough even when we try to create value. Most books on value creation focus on creating monetary value for companies. This book suggests that value is greatly created and enhanced by creating value for others. To create value for customers, one must first create value for the providers, including employees, suppliers, and the society at large. The goal is to improve the quality of life and well-being. This book provides ways of implementing these thoughts and educates readers about value and how to create it.

Functional Thinking for Value Creation Jürgen Hesselbach,Christoph Herrmann,2011-03-18 After the IPS2 conferences in Cranfield and Linköping in 2009 and 2010 the 3rd CIRP International Conference on Industrial Product Service Systems (IPS2) 2011 takes place in Braunschweig, Germany. IPS2 itself is defined as "an integrated industrial product and service offering that delivers value in use". The customers expect comprehensive solutions, which are adapted to their individual needs. IPS2 offers the possibility to stand out from competition and for long-term customer loyalty. Particularly in times of economic crisis it becomes apparent which producing companies understand to satisfy the needs and requirements of their customers. Especially in this relatively new domain IPS2 it will be important to keep track of the whole context and to seek cooperation with other research fields and disciplines. The 3rd CIRP International Conference on Industrial Product Service Systems (IPS2) 2011 serves as a platform for such collaborations and the discussion of new scientific ideas.

Value Creation Gautam Mahajan,2016-06-20 This book is about giving the CEO what he wants to know about Value creation and success.

FinTech Strategy Pável Reyes-Mercado,2021-07-08 This book

explores how new and small ventures with comparatively fewer financial resources have been able to compete with big banks and financial institutions. It discusses entry, competition, and growth strategies based on new business models enacted by current FinTech ventures. An analysis of strategies for Fintech and of cases from banked as well as non-banked and underbanked customer segments produces a framework based on effectuation, resulting in a final discussion of the broad societal outcomes of FinTech related to financial inclusion, the digital divide, and the UN's Sustainable Development Goals. This book, linking theory with practical application, offers scholars a comprehensive strategic view on FinTech from effectual, causal, and entrepreneurial innovation standpoints.

How Incumbent Firms Navigate Nascent Digital Platform Ecosystems in the Internet of Things Daniel Hodapp,2021-03-17 This thesis is focusing on three little-explored contextual conditions that are important for a better understanding of digital platform ecosystems: digital platforms in a nascent stage of maturity, digital platforms built by incumbents, and digital platforms embedded in the IoT phenomenon. Thus, the thesis contributes to the question of how established companies navigating nascent digital platform ecosystems in the IoT. The work builds and contributes to the literature on digital platform ecosystems. Three main contributions are made through explorative qualitative research in the form of Delphi and case studies as well as through systematic literature research on the above-mentioned themes: First, the thesis synthesizes important knowledge about the nascent stage of digital platform ecosystems and identifies value co-creation challenges specific to this early maturity stage. Second, given the increasing importance of established companies in the platform discourse, this thesis identifies the intra- and inter-organizational challenges that incumbent organizations face in building digital platform ecosystems, emphasizing the importance of the organizational

type in building a platform ecosystem. Third, the dissertation positions platforms in the IoT as a new digital platform instantiation within the scholarly platform discourse and outlines important phoneme-related characteristics that determine value creation.

New Frontiers in Open Innovation Henry Chesbrough,Wim Vanhaverbeke,Joel West,2014-11-06 Companies have to innovate to stay competitive, and they have to collaborate with other organizations to innovate effectively. Although the benefits of open innovation have been described in detail before, underlying mechanisms how companies can be successful open innovators have not be understood well. A growing community of innovation management researchers started to develop different frameworks to understand open innovation in a more systematic way. This book provides a thorough examination of research conducted to date on open innovation, as well as a comprehensive overview of what will be the most important, most promising and most relevant research topics in this area during the next decade. Open Innovation: Researching a new paradigm (OUP 2006) was the first initiative to bring open innovation closer to the academic community. Open innovation research has since then been growing in an exponential way and research has evolved in different and unexpected directions. As the research field is growing, it becomes increasingly difficult for young (and even experienced scholars) to keep an overview of the most important trends in open innovation research, of the research topics that are most promising for the coming years, and of the most interesting management challenges that are emerging in organizations practicing open innovation. In the spirit of an open approach to innovation, the editors have engaged other scholars and practitioners to contribute some of their interesting insights in this book.Companies have to innovate to stay competitive, and they have to collaborate with other organizations to innovate effectively. Although the benefits of open innovation have been

described in detail before, mechanisms underlying how companies can be successful open innovators have not be understood well. A growing community of innovation management researchers started to develop different frameworks to understand open innovation in a more systematic way.
