Automotive Global Value Chain Wilson Kia Onn Wong, 2017-08-09 Today, some suppliers have grown increasingly powerful and in certain cases, earn revenues that rival or even exceed that of their automaker clients. In the pre-globalisation period, automakers wielded absolute power over their significantly smaller suppliers. This book reveals the upending of this relationship, with the gradual shift in the balance of power from automakers to their suppliers in this era of globalisation. The book examines how suppliers in the global tyres, seats, constant velocity joints (hereafter 'CVJs'), braking systems and automotive semiconductor industries have evolved into powerful oligopolies through a mix of acquisition and organic growth strategies. It also highlights how joint ventures could be strategically deployed as springboards to acquisition, as they enable firms to familiarise themselves with their partners' markets and operations. Moreover, the book analyses the disruption stirred by the entry of well-resourced technology titans into this industry and their inevitable clash with the traditional incumbents. This book is an invaluable reference for anyone interested in learning more about the automakers' and now their suppliers' relentless quest to create market-dominating intelligent driving systems.

Sustainable Value Chain Management Michael D'heur,2015-02-28 This book introduces the integrated management concept of Sustainable Value Creation, which delivers sustainability 'inside-out' from the core business. It is based on the premise that sustainability can provide a platform for growth, if it is implemented in a company's products, services and supply chains (combined also known as the 'Value Chain'). Managing the Value Chain from the outset with a sustainability mindset subsequently allows profitable economical, ecological and societal growth. It combines the need for increased sustainability and its implementation in the operations of a company. The book addresses the following issues: How do economic, environmental and societal factors impact the value-creation process of a company? What requirements and expectations need to be met to balance economic, ecologic and societal value creation? What are the building blocks and measures that can be utilized on the journey towards building a sustainable value chain? What benefits can be achieved through sustainable value chains? What are the practical examples of sustainable value chains in leading companies that can inspire others to follow? The book includes contributions from the following organisations and companies: Beiersdorf, SAP, Klenk und Hoursch, VAUDE, Infineon Technologies, Independent Capital Management, BASF, Nanogate, the Federal German Council for Sustainable Development, Henkel, Symrise, shared.value.chain, Siemens, Fairphone and Thin Air Factory

A New Dawn for Global Value Chain Participation in the Philippines Guillermo Arenas, Souleymane Coulibaly, 2022-11-14 A New Dawn for Global Value Chain Participation in the Philippines provides policy recommendations to increase the Philippines' global value chain (GVC) participation in a post-COVID-19 (coronavirus) world. The Philippines could indeed benefit from the shifting dynamics of GVCs by attracting more investments as investors look for alternative production sources less sensitive to trade tensions. The book uses up-to-date trade data, analysis of megatrends affecting selected value chains, and interviews with multinational companies and their local suppliers to inform a strategic approach to rethink, diversify, and reorient the country's GVC participation. The main finding is that the crisis can help strengthen the country's foreign direct investment attractiveness and motivate operators in GVCs to develop the domestic skills they need for more advantageous GVC participation. The book also explores policies to mobilize key stakeholders (government, lead firms, and domestic suppliers) and to foster participation in three strategic GVC clusters: industrial, manufacturing, and transportation; technology, media, and telecommunications; and health and life sciences.

The author has pooled the knowledge of many experts and practitioners in the field of agriculture and allied sectors. The main Aims and Objectives covered in the book are: 1) Enhance Production and Productivity for food and nutritional security, 2) Improve profitability through agro-processing and value addition and 3) Sustainability through training, skill development, entrepreneurship and communication. Stagnation in productivity, shrinking farm size, inadequate market

There is need to pay attention to rural non-farm enterprises. All these issues in-depth have been covered under 40 chapters in the book. Leadership and Management in the 21st Century Cary L. Cooper, 2004-11-11 Business has changed dramatically over the last two decades: Globalization, cross-national strategic alliances and mergers, privatizations, outsourcing, information technology innovations, and the increasing short term contract culture have all influenced this. In turn, the role of managers has had to adapt and change. The organizations they work in have changed in size and organizational structure. Their management style has had to adapt, as the workforce they manage has become more dispersed and come to live in a state of permanent job insecurity. Moreover, the demands placed on managers by change seem a prerequisite, as business continues to develop as rapidly as ever. This volume brings together the thoughts of leading figures from industry, academia, the public sector, professional bodies, and the media, to reflect on what the twenty-first century may mean for businesses and their leaders. The contributors examine what trends mark the global economy in the twenty-first century, how this will affect businesses, and what will be required in terms of leadership and management to manage effectively? In doing so they cover such topics as leadership, corporate culture, organizational structures, innovation, working life, and management education and the business school.

The Law and Governance of Mining and Minerals Ana Elizabeth Bastida, 2020-12-10 This book explores a disciplinary matrix for the study of the law and governance concerning mining and minerals from a global perspective. The book considers the key challenges of achieving the goals of Agenda 2030 and the transition to low-carbon circular economies. The perspective encompasses the multi-faceted and highly complex interaction of multiple fields of international law and policy, soft law and standards, domestic laws and regulations as well as local levels of ordering of social relations. What emerges is a largely neglected, unsystematised and under-theorised field of study which lies at the intersection of the global economy, environmental sustainability, human rights and social equity. But it also underlies the many loopholes to address at all levels, most notably at the local level – land and land holders, artisanal miners, ecosystems, local economies, local linkages and development. The book calls for a truly cosmopolitan academic discipline to be built and identifies challenges to do so. It also sets a research agenda for further studies in this fast-changing field.
