TRANSBALTICA XII: Transportation Science and Technology Olegas Prentkovskis,Irina Yatskiv (Jackiva),Paulius Skačkauskas,Raimundas Junevičius,Pavlo Maruschak,2022-01-24 This book reports on innovative research and developments in the broad field of transportation. It covers solutions relating to intelligent vehicles and infrastructure, energy and combustion management, vehicle dynamics and control, as well as research on human factors, logistics and security. Contributions are based on peer-reviewed papers presented at the 12th international scientific conference Transbaltica: Transportation Science and Technology, held virtually from Vilnius Gediminas Technical University, Lithuania, on September 16-17, 2021. All in all, this book offers extensive information on modern transport systems, with a good balance of theory and practice.

The Secret of Running Hans van Dijk,Ron van Megen,2017-05-01 How much power does your human engine have? How much power do you need for running in different conditions? How can you optimize your training and racing performance? How can you use power meters to improve your results? What are the ultimate limits of human performance? The Secret of Running answers all of these questions. All factors determining the performance in running (from 800-meter race to marathon) are explained step by step: training, nutrition, body weight, running form, wind, hills, temperature, running gear, power meters and much more. Written in a crystal-clear and lively style, this book is a wealth of information for every ambitious runner. This title also contains brand new insights on how the balance of the power of your human engine and the power requirement for running in different conditions determines your performance. It shows how power meters can be used to optimize your training, running economy and race result. This book is lavishly illustrated and packed with useful data. Being already a bestseller in the Netherlands and Belgium, The Secret of Running can be considered the ultimate textbook for all serious runners and their coaches.

High-performance Cycling Asker E. Jeukendrup,2002 High-Performance Cycling is all about going faster and pushing the limits of your ability. If you want the latest training, equipment, and technique used by the best cyclists in the world, then this is the book for you. High-Performance Cycling presents the latest applied research on cycling biomechanics, aerodynamics, testing, training, injuries, nutrition, equipment, and racing from top cycling experts from Europe, North America, and Australia. Everything in the book will have a direct effect on your performance. You'll learn how to - test your potential, - design a program to meet your racing goals, - monitor your training progress and program effectiveness, - improve the aerodynamics of your riding position, - fuel your body properly for better racing performance, and - stay-injury free and avoid the pitfalls of overtraining. You'll also learn which aspects of cycling are most important--and which improvements will most directly affect your cycling performance. High-Performance Cycling gives you a better idea of what the pro teams do so that you can improve your own performance!
