**The Blue Line Imperative** Kevin Kaiser, S. David Young, 2013-01-28 A groundbreaking guide to making profitable business decisions Do you wonder why your value initiatives aren't providing the payoff you'd hoped for? Could it be because you've been thinking about value all wrong? According to the authors of this groundbreaking guide, there's a very good chance that you have. Using examples from leading companies worldwide, they explain why every decision a company makes either creates value or detracts from it, and why, if they hope to survive and thrive in today's increasingly competitive global marketplace, company leaders must make value-creation the centrepiece of every business decision. Authors Kaiser and Young have dubbed this approach Blue-Line Management, (BLM), and in this entertaining, highly accessible book, they delineate BLM principles and practices and show you how to implement them in your company. Explains why the failure to properly define and assess value often makes it difficult for the people who manage businesses to effect long-term success Offers guidelines for making the satisfaction of customer needs and wants—i.e. value creation—the driver of all business activities The authors are respected academics at INSEAD, the world's largest and most respected graduate business school, with campuses in Europe, Asia and the Middle East

In this heart-warming and thought-provoking story you will learn: proven strategies to foster a culture of ownership; Why a culture of ownership requires people who are emotionally positive, self empowered, and fully engaged; How to use a construction metaphor to create a blueprint for your organization's ownership architecture; The 8 essential characteristics of a culture of ownership; How to use the pickle pledge to help people confront toxic emotional negativity and promote a more positive and productive workplace attitude; and how the 7 promises of self-empowerment can help foster a more empowering culture. -- From publisher description

**Protest Public Relations** Ana Adi,2018-10-09 Global movements and protests from the Arab Spring to the Occupy Movement have been attributed to growing

access to social media, while without it, local causes like #bringbackourgirls and the ice bucket challenge may have otherwise remained unheard and unseen. Regardless of their nature – advocacy, activism, protest or dissent – and beyond the technological ability of digital and social media to connect support, these major events have all been the results of excellent communication and public relations. But PR remains seen only as the defender of corporate and capitalist interests, and therefore resistant to outside voices such as activists, NGOs, union members, protesters and whistle-blowers. Drawing on contributions from around the world to examine the concepts and practice of activist, protest and dissent public relations, this book challenges this view. Using a range of international examples, it explores the changing nature of protest and its relationship with PR and provides a radical analysis of the communication strategies and tactics of social movements and activist groups and their campaigns. This thought-provoking collection will be of interest to researchers and advanced students of public relations, strategic communication, political science, politics, journalism, marketing, and advertising, and also to PR professionals in think tanks and NGOs.

**Building a Culture of Ownership in Healthcare, Third Edition** Joe Tye, Bob Dent, 2024-02-21 "The 'Invisible Architecture' is built on knowing, and acting on, what research tells us creates a great employee experience. Thank you, Joe and Bob, for writing a book whose time has come—and for your efforts to make healthcare better and better." -Quint Studer, MSE Co-author, The Human Margin: Building the Foundations of Trust A must read and a great resource for every leader in today's transforming work environment. -Tim Porter-O'Grady, DM, EdD, APRN, FAAN, FACCWS Senior Partner, Health Systems, TPOG Associates Clinical Professor, Emory University, SON Registered Mediator In the aftermath of the pandemic, preexisting challenges in healthcare organizations have intensified. Stress, burnout, staffing shortages, and even the erosion of trust in organizational leadership are pressing issues that need solutions. In this third edition of Building a Culture of Ownership in Healthcare, readers will learn how investing in their organization and their people can enable a significant, successful change in productivity; employee engagement; nurse satisfaction, recruitment, and retention; quality of care; patient satisfaction; and positive financial outcomes. **Future Directions for the National Healthcare Quality and Disparities Reports** Institute of Medicine, Board on Health Care Services, Committee on Future Directions for the National Healthcare Quality and Disparities Reports, 2010-08-10 As the United States devotes extensive resources to health care, evaluating how successfully the U.S. system delivers high-quality, high-value care in an equitable manner is essential. At the request of

Congress, the Agency for Healthcare Research and Quality (AHRQ) annually produces the National Healthcare Quality Report (NHQR) and the National Healthcare Disparities Report (NHDR). The reports have revealed areas in which health care performance has improved over time, but they also have identified major shortcomings. After five years of producing the NHQR and NHDR, AHRQ asked the IOM for guidance on how to improve the next generation of reports. The IOM concludes that the NHQR and NHDR can be improved in ways that would make them more influential in promoting change in the health care system. In addition to being sources of data on past trends, the national healthcare reports can provide more detailed insights into current performance, establish the value of closing gaps in quality and equity, and project the time required to bridge those gaps at the current pace of improvement.
