**Control** Kim Curran,2015-03-31 Scott Tyler is not like other teenagers. With a single thought he can alter reality around him. And he can stop anyone else from doing the same. That's why he's so important to ARES, the secret government agency that regulates other kids like him: Shifters. They've

sent him on a mission. To track down the enigmatic Frank Anderson. An ex-Shifter who runs a project for unusual kids – as if the ability to change your every decision wasn't unusual enough. But Anderson and the kids have a dark secret. One that Scott is determined to discover. As his obsession with discovering the truth takes him further away from anyone he cares about, his grip on reality starts to weaken. Scott realizes if he can't control his choices, they'll control him.

**Focus on Colorectal Cancer Research** Julia D. Martinez,2005 In Western countries, cancer of the large intestine and rectum (colorectal cancer) is the second most common type of cancer and the second leading cause of cancer death (after lung cancer). The incidence of colorectal cancer begins to rise at age 40 and peaks between ages 60 and 75. Cancer of the large intestine (colon cancer) is more common in women; rectal cancer is more common in men. About 5 percent of the people with

colon or rectal cancer have more than one cancer of the colorectum at the same time. People with a family history of colon cancer have a higher risk of developing the cancer themselves. A family history of familial polyposis or a similar disease also increases the risk of colon cancer. People with ulcerative colitis or Crohn's disease have a higher risk of developing cancer. The risk is related to the person's age when the condition developed and the length of time the person has had the condition. Diet plays some role in the risk of colon cancer, but exactly how it affects risk is unknown. Throughout the world, people at highest risk tend to live in cities and eat a diet typical of affluent Westerners. Such a diet is low in fibre and high in animal protein, fats, and refined carbohydrates such as sugar. Risk seems to be reduced by a diet high in calcium, vitamin D, and vegetables such as brussel sprouts, cabbage, and broccoli.
