Guide to Calculating Ownership and Operating Costs of Department of Transportation Vehicles and Equipment Geoff Morrison, Elise Emil, Henry Canipe, Andy Burnham (Environmental scientist), 2020 A central role of a state Department of Transportation (DOT) fleet manager is to maintain a clear understanding of the fleet's costs. This helps in tracking activities over time, comparing costs with other fleets, communicating with stakeholders, and effectively managing fleet assets. The TRB National Cooperative Highway Research Program's NCHRP Research Report 944: Guide to Calculating Ownership and Operating Costs of Department of Transportation Vehicles and Equipment: An Accounting Perspective provides a practical, logical, and transparent framework for conducting fleet cost accounting in state DOTs. The Guide focuses on the unique aspects of DOT fleets, although the principles in the Guide could be extended to any public fleet. Without a complete understanding of fleet costs, the fundamental functions of fleet managers--such as equipment replacement decisions, outsourcing decisions, and budget requests--are diminished. Ultimately, fleet managers need full confidence in their fleet cost numbers to have credibility with fleet stakeholders. The report is accompanied by a PowerPoint presentation summary.

State Department of Transportation Fleet Replacement Management Practices Paul T. Lauria, Donald T. Lauria, 2014 This report identifies the current state of the practice regarding fleet replacement management and financing methods by departments of transportation (DOTs). A primary objective of this study is to identify methods currently used to manage asset replacement, including the financing of replacement expenditures. The report also provides a discussion of the perceived strengths and weaknesses of different management and financing methods. Information used in this study was acquired through a review of the literature and a survey of DOT representatives in all states. Paul T. Lauria, Mercury Associates, Inc. and Donald T. Lauria, University of North Carolina at Chapel Hill, collected and synthesized the information and wrote the report. The members of the topic panel are acknowledged on the preceding page. This synthesis is an immediately useful document that records the practices that were acceptable with the limitations of the knowledge available at the time of its preparation. As progress in research and practice continues, new knowledge will be added to that now at hand.--Preface.

With that in mind, we've tried to cover as many of the challenges, options, pitfalls, and suggestions any fleet manager may need--from designing to maintaining and repairing vehicle graphics. This short guide wasn't intended to be read from start to finish, but referred to as needed.
