Why Are Our Pictures Puzzles? James Elkins, 2004-11-23 With bracing clarity, James Elkins explores why images are taken to be more intricate and hard to describe in the twentieth century than they had been in any previous century. *Why Are Our Pictures Puzzles?* uses three models to understand the kinds of complex meaning that pictures are thought to possess: the affinity between the meanings of paintings and jigsaw-puzzles; the contemporary interest in ambiguity and 'levels of meaning'; and the penchant many have to interpret pictures by finding images hidden within them. Elkins explores a wide variety of examples, from the figures hidden in Renaissance paintings to Salvador Dali's paranoiac meditations on Millet's *Angelus*, from Persian miniature paintings to jigsaw-puzzles. He also examines some of the most vexed works in history, including Watteau's meaningless paintings, Michelangelo's Sistine Ceiling, and Leonardo's *Last Supper*.

The Other End of the Leash Patricia McConnell, Ph.D., 2009-02-19 Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years’ experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man’s best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover: • How you can get your dog to come when called by acting less like a primate and more like a dog • Why the advice to “get dominance” over your dog can cause problems • Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief • How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!” Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

The Byzantine Imperial Acts to Venice, Pisa and Genoa, 10th-12th Centuries Dafni Penna, 2012 For some 1,000 years, the Southeastern part of Europe was under the sway of the Eastern Roman Empire, later also known as Byzantium. A watershed in the history of Byzantium was the legislation of the Emperor Justinian in the 6th century. Under his reign, a codification of Roman law was achieved, which was to remain not only the bedrock of Byzantine law, but which also, after its rediscovery in Italy in the 11th century, was to become the foundation of the continental European legal tradition. During the 10th, 11th, and 12th centuries, the Byzantine emperors issued privilege acts to the Italian city-republics of Venice, Pisa, and Genoa. This doctoral thesis examines these Byzantine imperial acts from a legal perspective. The book examines such questions as: What is the legal information that these acts provide? What law do they presuppose and apply? Did both parties have law in common and if so, of what does it consist? Is Roman law assumed to be binding in these acts as part of that common law, and if so, in which cases and what are the examples given? Investigating the possible genesis of a common legal understanding in Europe before the 11th century may contribute to an explanation of why Justinian's law became prominent in the West. In the last chapter, common legal issues in these acts - such as grants of immovable property, issues dealing with justice, and shipwreck and salvage provisions - have been subjected to a comparative analysis and in their turn compared with other Byzantine or Western sources. The study of legal acts of the medieval period at a European level may help in answering the question of whether, long before the formation of today's Europe, it was already bound by common legal forms. This study brings together a small piece of the puzzle of how a common European legal heritage was formed. Dissertation.

Tintoretto and Architecture, 2019 On the 500th anniversary of the Venetian master's birth, this book shows how Tintoretto used architecture to structure perspective There is no overstating the

long shadow of influence that Jacopo Tintoretto (1519-94) has exerted on the history of Western art. However, in the long historiography devoted to his work, the Venetian master lacks a comprehensive and systematic study of the fundamental question of his relationship with architecture. On the occasion of the 500th anniversary of his birth, *Tintoretto and Architecture* draws on the most up-to-date writings on Tintoretto's work and on the history of Renaissance architecture to present a picture of the connection between the space painted in his pictures and the physical space in which they are located; to investigate the role of architecture as an organizing element of the composition; and to understand the original relationship between the viewer and the space in which the work was seen. This volume includes reproductions of Tintoretto's works in comparison with reproductions of the works of painter and architect contemporaries such as Paolo Veronese, Raphael, Giorgio Vasari and Andrea Palladio. In addition, *Tintoretto and Architecture* draws on emerging technology to present digitally rendered 3-D models of the architecture the figures in Tintoretto's paintings inhabit, underlining the emphasis the Venetian master placed on space and structure. The authors submit such masterworks as *The Finding of the Body of St. Mark* to this innovative treatment, offering new perspectives on well-loved works.

The Complete Book of Numerology David A. Phillips, Ph.D., 2005-11-01 Discover the science of self-discovery To the conventional scientist, numbers are merely symbols of comparative quantities, but in the broader, metaphysical sense, they assume a deeper, more profound significance. The Complete Book of Numerology reveals the underlying meaning behind the numbers in your life and enables you to understand the connection between your numerological patterns and your degree of abundance, health, and general well-being. Overall, delving into the world of numbers will provide you with a simple and accurate way to decipher your experiences in the same manner that a road map helps you navigate a route that you haven't previously traveled.

Double Entry: How the Merchants of Venice Created Modern Finance Jane Gleeson-White, 2012-10 Describes the history of accounting and double-entry bookkeeping from Mesopotamia to the Renaissance to modern finance and explains how a system developed that could work across all trades and nations. 13,000 first printing.

Herod the Great and Jesus: Chronological, Historical and Archaeological Evidence Gerard Gertoux, 2015-11-18 The traditional date of 4 BCE for Herod's death, as set forth by E. Schurer (1896), has been accepted by historians for years without notable controversy. However, according to the texts of Luke and Matthew, Herod died shortly after Jesus' birth, which can be fixed in 2 BCE. Consequently, there is apparently a major chronological contradiction, however Josephus gives a dozen synchronisms that enable us to date his death on 26 January 1 BCE just after a total lunar eclipse (9 January 1 BCE) prior to the Passover. Two important events confirm the dating of Herod's death: the 'census of Quirinius' in Syria which was a part of the 'Inventory of the world' ordered by Augustus when he became 'Father of the Country' in 2 BCE and the 'war of Varus' after Herod's death conducted under the auspices of Caius Caesar, the imperial legate of the East, and dated during the year of his consulship in 1 CE.

Idols Annie Caubet, 2019-01-03 A unique journey through time and space to the origins of the figuration of the human body, from the Neolithic era to the Bronze Age, through works of extraordinary beauty and charm. The dawn of anthropomorphic figurative culture, the founding myths of humanity and the representation of power, whether inseminated by gods or heroes - all these concerns are addressed and embodied in Idols. Edited by Annie Caubet - she being a great archaeologist herself and Emerita of the Louvre - Idols, from the Greek eidolon, or image, invites the reader to embark on an aesthetic journey across time and space, to discover how artists who lived and worked around 4000-2000 BC created three-dimensional images of the human body, from the first ambiguous images of the Neolithic era, which still to this day have no definitive interpretation, to their evolution during the Bronze Age. The vast geographic area extends from West to East, from the Iberian peninsula to the Indus valley, from the gates of the Atlantic to the confines of the Far East. A tribute to Giancarlo Ligabue, whose multicultural interests are reflected in the exhibition, the journey will reveal a surprising number of common traits, shared by distant people and regions, and compare

local variants. A unique journey that climbs mountains, treks through steppes and deserts and braves oceans and seas to reveal networks of connections, a commonality of perception, and contacts between remote lands.

Underwater Puppies Seth Casteel, 2014-09-16 The world fell in love with swimming canines in Seth Casteel's first book, *Underwater Dogs*. Now, in more than 80 previously unpublished portraits of underwater puppies, we see man's best friends at their most playful and exuberant. Each vibrant and colourful underwater image shows off the wild and sublime range of emotions of puppies, cute and irresistible to the very last.

The Cultural Identities of European Cities Katia Pizzi, 2010 Cities are both real and imaginary places whose identity is dependent on their distinctive heritage: a network of historically transmitted cultural resources. The essays in this volume, which originate from a lecture series at the Institute of Germanic & Romance Studies, University of London, explore the complex and multi-layered identities of European cities. Themes that run through the essays include: nostalgia for a grander past; location between Eastern and Western ideologies, religions and cultures; and the fluidity and palimpsest quality of city identity. Not only does the book provide different thematic angles and a variety of approaches to the investigation of city identity, it also emphasizes the importance of diverse cultural components. The essays presented here discuss cultural forms as various as music, architecture, literature, journalism, philosophy, television, film, myths, urban planning and the naming of streets.

Underwater Dogs Seth Casteel, 2012-10-23 The exuberant, exhilarating photographs of dogs underwater that have become a sensation From the water's surface, it's a simple exercise: a dog's leap, a splash, and then a wet head surfacing with a ball, triumphant. But beneath the water is a chaotic ballet of bared teeth and bubbles, paddling paws, fur and ears billowing in the currents. From leaping Lab to diving Dachshund, the water is where a dog's distinct personality shines through; some lounge in the current, paddling slowly, but others arch their bodies to cut through the water with the focus and determination of a shark. In more than eighty portraits, award-winning pet photographer and animal rights activist Seth Casteel captures new sides of our old friends with vibrant underwater photography that makes it impossible to look away. Each image bubbles with exuberance and life, a striking reminder that even in the most loveable and domesticated dog, there are more primal forces at work. In *Underwater Dogs*, Seth Casteel gives playful and energetic testament to the rough-and-tumble joy that our dogs bring into our lives.

Of Comics and Men Jean-Paul Gabilliet, 2013-03-25 Originally published in France and long sought in English translation, Jean-Paul Gabilliet's *Of Comics and Men: A Cultural History of American Comic Books* documents the rise and development of the American comic book industry from the 1930s to the present. The book intertwines aesthetic issues and critical biographies with the concerns of production, distribution, and audience reception, making it one of the few interdisciplinary studies of the art form. A thorough introduction by translators and comics scholars Bart Beaty and Nick Nguyen brings the book up to date with explorations of the latest innovations, particularly the graphic novel. The book is organized into three sections: a concise history of the evolution of the comic book form in America; an overview of the distribution and consumption of American comic books, detailing specific controversies such as the creation of the Comics Code in the mid-1950s; and the problematic legitimization of the form that has occurred recently within the academy and in popular discourse. Viewing comic books from a variety of theoretical lenses, Gabilliet shows how seemingly disparate issues—creation, production, and reception—are in fact connected in ways that are not necessarily true of other art forms. Analyzing examples from a variety of genres, this book provides a thorough landmark overview of American comic books that sheds new light on this versatile art form.

From White to Yellow Rotem Kowner, 2014-12-01 When Europeans first landed in Japan they encountered people they perceived as white-skinned and highly civilized, but these impressions did

not endure. Gradually the Europeans' positive impressions faded away and Japanese were seen as yellow-skinned and relatively inferior. Accounting for this dramatic transformation, *From White to Yellow* is a groundbreaking study of the evolution of European interpretations of the Japanese and the emergence of discourses about race in early modern Europe. Transcending the conventional focus on Africans and Jews within the rise of modern racism, Rotem Kowner demonstrates that the invention of race did not emerge in a vacuum in eighteenth-century Europe, but rather was a direct product of earlier discourses of the Other. This compelling study indicates that the racial discourse on the Japanese, alongside the Chinese, played a major role in the rise of the modern concept of race. While challenging Europe's self-possession and sense of centrality, the discourse delayed the eventual consolidation of a hierarchical worldview in which Europeans stood immutably at the apex. Drawing from a vast array of primary sources, *From White to Yellow* traces the racial roots of the modern clash between Japan and the West.

On Pictures and the Words that Fail Them James Elkins, 2011-02-17 In this innovative, interdisciplinary study, James Elkins argues against the assumption that images can be adequately described in words. In his view, words must always fail because pictures possess a residue of 'meaningless' marks that cannot be apprehended as signs. *On Pictures and the Words that Fail Them* is a 1998 text which provides detailed, incisive critiques of fundamental notions about pictures: their allegedly semiotic structures; the 'rational' nature of realism; and the ubiquity of the figure-ground relation. Elkins then opens the concept of images to non-Western and prehistoric ideas, exploring Chinese concepts of magic, Mesopotamian practices of counting and sculpture, religious ideas about hypostasis, philosophical discussions concerning invisibility and blindness, and questions on the limits of the destruction of meaning.

Apocalypse without God Ben Jones, 2022-04-21 Apocalypse, it seems, is everywhere. Preachers with vast followings proclaim the world's end. Apocalyptic fears grip even the nonreligious amid climate change, pandemics, and threats of nuclear war. As these ideas pervade popular discourse, grasping their logic remains elusive. Ben Jones argues that we can gain insight into apocalyptic thought through secular thinkers. He starts with a puzzle: Why would secular thinkers draw on Christian apocalyptic beliefs – often dismissed as bizarre – to interpret politics? The apocalyptic tradition proves appealing in part because it theorizes a relation between crisis and utopia. Apocalyptic thought points to crisis as the vehicle to bring the previously impossible within reach, offering resources for navigating challenges in ideal theory, which involves imagining the best, most just society. By examining apocalyptic thought's appeal and risks, this study arrives at new insights on the limits of utopian hope. This title is available as open access on Cambridge Core.

How to Ace the Brainteaser Interview John Kador, 2004-09-22 The inside track on how to beat the logic puzzle job interview As if job interviews weren't nerve-wracking enough, many companies, in their pursuit of the brightest and best, have begun beleaguering applicants with tests of logic, creativity, and analytical abilities. Many firms have replaced traditional interview questions such as Tell us about yourself or What's your biggest weakness? with mind-benders such as: Why are beer cans tapered at both ends? How many piano tuners are there in the world? How many Ping-Pong balls can you stuff into a Boeing 747? How would you design a bathroom for the CEO of the company? If you could remove any one of the 50 U.S. states, which one would it be? In *How to Ace the Brain Teaser Interview*, bestselling careers author John Kador gives readers the inside track on this new interview technique. He provides 75 puzzles actually used by HR departments across the nation, and he offers tips on how to solve them and present the solutions so as to make the best possible impression.
