The Iceman and his Natural Environment Sigmar Bortenschlager, Klaus Oegg, 2012-12-06 Before the discovery of the Man in the Ice in temporal context. On the other hand the reconstruction of the Iceman's life-style as derived from data September 1991, little was known about the Neolithic obtained from the site has to be correlated with the period in the Central Alps. Suddenly and without precedent, here was the very well preserved corpse of a prehistoric man. For that purpose pollen analysis was performed on peat-bogs in the vicinity of the find and clothing and equipment almost intact. The discovery further afforded to obtain precise data on the vegetation was not just deservedly a world-wide sensation but a window into the climate in the Neolithic. Pollen analysis was a unique opportunity for the scientific community to be performed for a vertical transect extending from the vegetation to the death of a human from such very close to the timber line almost up to the nival zone. The results of ancient times. Value Creation for a Sustainable World Laszlo Zsolnai, Thomas Walker, Paul Shrivastava, 2023-10-29 The ecological, social and technological challenges of the Anthropocene require developing and implementing new economic, business, and financial models to create sustainable value for a wide range of stakeholders including nature, society, and future generations. This book

defines 'sustainable value creation' as bringing forth products, services, organizational forms, processes, actions, and policies which satisfy real social needs and contribute to the ecological regeneration of nature. The book collects and analyzes innovative economic, business, and social models of sustainable value creation globally. It critically examines the existing mainstream models of business and financial value creation. In reviewing both traditional and sustainability-oriented models, it focuses on both the challenges and opportunities inherent in a possible shift from models based on single-stakeholder wealth creation to models that propagate multidimensional value creation. Part of the Palgrave Studies in Sustainable Business in Association with Future Earth series, this book aims to engage academics, and business and civil society practitioners to discuss innovative value creation models for a sustainable world. Interdisciplinary and intercultural exchange will be facilitated to inspire and cross-fertilize different knowledge and action fields as well as to promote intergenerational dialogue about the prospects of the human-earth system.

When the Crisis Becomes an Opportunity Paola Paoloni, Rosa Lombardi, 2023-03-16 This edited volume analyzes how the COVID-19 crisis could be transformed into opportunities for those organizations that correctly interpret the change, adapt their strategies accordingly, and increase their chances of success in a post-pandemic scenario. Through this lens, the female role and contribution to recovery are analyzed and discussed in the economic, financial and social context. Even if many aspects set the COVID-19 crisis apart from the latest global financial crises - such as the unusual shutdown of businesses in specific sectors, social distancing regulations, and general uncertainty sparked by the pandemic - the challenges facing all organizations

in the current recovery phase can present an opportunity for extraordinary growth and development in Europe. The focus of the contributions gathered here is not on “counting” the damages and losses but rather on monitoring the recovery and on emerging instruments to support national and global economic recovery, while paying special attention to women’s role in it.

Myeloproliferative Neoplasms Tiziano Barbui,Ayalew Tefferi,2012-02-03 This book focuses on three of the main categories of myeloproliferative neoplasm: polycythemia vera, essential thrombocythemia, and primary myelofibrosis. Relevant laboratory and clinical advances are comprehensively covered, and great emphasis is placed on the practical issues that challenge physicians in their daily practice. The main topics considered thus include contemporary diagnostic approaches, the value and limitations of mutation screening for diagnostic and prognostic purposes, risk stratification in terms of both survival and other disease complications such as leukemic transformation and thrombosis, and modern therapeutic strategies, including conventional drugs, allogeneic stem cell transplantation, and experimental drugs still under study. The reader will find Critical Concepts and Management Recommendations in Myeloproliferative Neoplasms to be an invaluable and up-to-date source of information from leading authorities in the field.
