Software Studies Matthew Fuller, 2008 This collection of short expository, critical and speculative texts offers a field guide to the cultural, political, social and aesthetic impact of software. Experts from a range of disciplines each take a key topic in software and the understanding of software, such as algorithms and logical structures.

Processing, second edition Casey Reas, Ben Fry, 2014-12-19 The new edition of an introduction to computer programming within the context of the visual arts, using the open-source programming language Processing; thoroughly updated throughout. The visual arts are rapidly changing as media moves into the web, mobile devices, and architecture. When designers and artists learn the basics of writing software, they develop a new form of literacy that enables them to create new media for the present, and to imagine future media that are beyond the capacities of current software tools. This book introduces this new literacy by teaching computer programming within the context of the visual arts. It offers a comprehensive reference and text for Processing (www.processing.org), an open-source programming language that can be used by students, artists, designers, architects, researchers, and anyone who wants to program

images, animation, and interactivity. Written by Processing's cofounders, the book offers a definitive reference for students and professionals. Tutorial chapters make up the bulk of the book; advanced professional projects from such domains as animation, performance, and installation are discussed in interviews with their creators. This second edition has been thoroughly updated. It is the first book to offer in-depth coverage of Processing 2.0 and 3.0, and all examples have been updated for the new syntax. Every chapter has been revised, and new chapters introduce new ways to work with data and geometry. New “synthesis” chapters offer discussion and worked examples of such topics as sketching with code, modularity, and algorithms. New interviews have been added that cover a wider range of projects. “Extension” chapters are now offered online so they can be updated to keep pace with technological developments in such fields as computer vision and electronics. Interviews SUE.C, Larry Cuba, Mark Hansen, Lynn Hershman Leeson, Jürg Lehni, LettError, Golan Levin and Zachary Lieberman, Benjamin Maus, Manfred Mohr, Ash Nehru, Josh On, Bob Sabiston, Jennifer Steinkamp, Jared Tarbell, Steph Thirion, Robert Winter

Urban Screens Reader Scott McQuire, Meredith Martin, Sabine Niederer, 2009

Digital Art through the Looking Glass Oliver Grau (Hg.), 2019-12-11 Digital art challenges archiving, collecting and preserving methods within and outside of

gallery, library, archive and museum (GLAM) institutions. By its media, art in the digital sphere is processual, contextual, modular and ephemeral, and its creative process is collaborative. From artists, scholars, technicians and conservators—to preserve this contemporary art is a transdisciplinary task. This book brings together leading international experts from digital art theory and preservation, digital humanities, collection management, conservation and media art histories. In a transdisciplinary approach, theoretic and practice-based research from these stakeholders in art, research, education and exhibition are presented to create an overview of present preservation methods and discuss demands and opportunities for the future. Finally, the need for a new appropriate museum and archive infrastructure is shown to preserve the art of our time.

Inner Excellence Jim Murphy, 2020-05 Want More Joy and Confidence? Discover the life guide that has developed world champions, empowered athletes to become world #1, and most importantly, transformed their hearts and minds. This step-by-step training manual from one of the

world's top mental skills coaches will teach you how the mindset of some of the best performers and leaders on the planet allowed them to have freedom and confidence when so much was out of their control. Whether you're an athlete or entrepreneur, single mother or father of five, you'll find exercises, techniques and tools in this book that will improve every area of your life. Your life will take on new meaning as you move beyond the pursuit of happiness to a life of purpose and fulfillment. Jim Murphy's complete program of proven mental techniques is based on the powerful principles of love, wisdom, and courage, that came from over six years of full-time research and writing (after his masters degree in Coaching Science). I read the first version of Inner Excellence six times. I recommend all my clients read it. - Matt Killen, PGA Tour coach to Justin Thomas, Tiger Woods and many others

**INNER EXCELLENCE WILL SHOW YOU HOW TO: DEVELOP SELF-MASTERY-and let go of what you can't control
OVERCOME ANXIETY-and build powerful mental habits
REMOVE MENTAL BLOCKS-and get out of your own way
TRAIN YOUR SUBCONSCIOUS MIND-and release limiting beliefs**

As a professional baseball player in the Chicago Cubs organization, Jim's sense of worth and identity revolved around his performance. He was obsessed with fame but also afraid of failure, and that fear in his heart made him struggle under the pressure to perform. When he started coaching professional and Olympic athletes, he saw the same pattern over and over again: athletes had lost their joy and passion for life as the fear of failure engulfed their lives. This book will share with you how some of the best athletes in the world have learned Inner Excellence, how it propelled them to extraordinary performance even when they were filled with doubt and uncertainty, and how you can excel in the same way in your

life. The insights and exercises within will help you achieve higher levels of performance than you ever thought possible-and bring incredible peace and confidence. Inner Excellence changed how I see the world, how I think, and how I play golf. - Vaughn Taylor, three-time PGA Tour winner Jim Murphy is a Performance Coach (mental skills) to some of the best athletes and leaders in the world. The majority of his clients achieved the best year of their career their first year working with Jim (or their best year in the previous five years)

A Town Called River Igor Rendic, 2021-12-12

Returning to his hometown of Rijeka, Croatia, to wrap things up after his grandmother's passing, Paul gets more than he expected in terms of inheritance-way more than just a stuffy old apartment downtown. The legacy of his grandmother's work as a krsnik-a traditional magic user tasked with keeping the thin line between the humans and the things that prey on them-falls on his shoulders, threatening to change everything he thought he knew about life, the city he left behind so long ago, and himself. As the line keeps getting thinner, it'll soon be up to Paul, with help from some unexpected (and witchy) places, to prove worthy of his legacy while fighting for the city's humanity, and trying not to lose his own along the way.

Relive Sean Cubitt, Paul Thomas, 2013-11-08 Leading historians of the media arts define a new materialist media art history, discussing temporality, geography, ephemerality, and the future. In Relive, leading historians of the media arts grapple with this dilemma: how can we speak of "new media" and at the same time write the histories of these arts? These scholars and practitioners redefine the nature of the field, focusing on the materials of history—the materials through which the past is mediated. Drawing on the tools of media archaeology and

the history and philosophy of media, they propose a new materialist media art history. The contributors consider the idea of history and the artwork's moment in time; the intersection of geography and history in regional practice, illustrated by examples from eastern Europe, Australia, and New Zealand; the contradictory scales of evolution, life cycles, and bodily rhythms in bio art; and the history of the future—how the future has been imagined, planned for, and established as a vector throughout the history of new media arts. These essays, written from widely diverse critical perspectives, capture a dynamic field at a moment of productive ferment. Contributors Susan Ballard, Brogan Bunt, Andrés Burbano, Jon Cates, John Conomos, Martin Constable, Sean Cubitt, Francesca Franco, Darko Fritz, Zhang Ga, Monika Gorska-Olesinska, Ross Harley, Jens Hauser, Stephen Jones, Douglas Kahn, Ryszard W. Kluszczynski, Caroline Seck Langill, Leon Marvell, Rudy Rucker, Edward A. Shanken, Stelarc, Adele Tan, Paul Thomas, Darren Tofts, Joanna Walewska
