Wozny,2013-11-11 The International PROLAMAT Conference is an internationally well known event for demonstrating and evaluating activities and progress in the field of discrete manufacturing. Sponsored by the International Federation for Information Processing (IFIP), the PROLAMAT is traditionally held every three years and it includes the whole area of advanced software technology for Design and Manufacturing in Discrete Manufacturing. Past editions of the International PROLAMA T Conference have explored: -Manufacturing Technology, -Advances in CAD/CAM, -Software for Discrete Manufacturing, -Software for Manufacturing. The Eight International PROLAMAT held in 1992 (Tokyo), focused on the theme of Man in CIM. The 1995 PROLAMAT (Berlin), featured the theme of Life Cycle Modelling for Innovative Products and Processes. This past emphasis on human aspects and innovation provides a strong foundation for the next PROLAMAT. Under the title: The globalization of manufacturing in the digital communications era of the 21th century: innovation, agility and the virtual enterprise, the 1998 conference expands the PROLAMAT scope to include teams and virtual enterprises which come together across space and time to develop new products and bring them to global markets. Manufacturing issues and information models have long been part of concurrent engineering; they are increasingly important in new product innovation and in the development of manufacturing plans and processes which span multiple companies along with multiple time zones.

Online Language Education Fatemeh Nami,2023-12-28 This book addresses the gap between Computer-Assisted Language Learning (CALL) materials development and its theoretical considerations by offering a comprehensive look into theory, practice, and research on materials development and content authoring for language instruction/practice, drawing on the author's personal experiences along with previous empirical/theoretical research in CALL materials development, content authoring, language teacher education, and e-learning. The book features four sections. In addition to highlighting related theoretical underpinnings, key concepts, linguistic-didactic functionalities and interaction scenarios in materials development, the volume will address the practical issues and considerations not only in the design, development, integration, and evaluation of the technology-enhanced materials development for language instruction but also the protection, usability, and access in authored and/or co-authored content. Furthermore, previous research findings and foci are addressed to highlight the research gaps and pedagogical implications for materials developers, policy makers, and language teachers. The book can help teachers, educators, and researchers overcome the aforementioned problem by providing a step-by-step guideline on how to effectively integrate technology and design and develop instructional materials for online language instruction and practice.
