High Efficiency Video Coding (HEVC) Vivienne Sze, Madhukar Budagavi, Gary J. Sullivan, 2014-08-23 This book provides developers, engineers, researchers and students with detailed knowledge about the High Efficiency Video Coding (HEVC) standard. HEVC is the successor to the widely successful H.264/AVC video compression standard, and it provides around twice as much compression as H.264/AVC for the same level of quality. The applications for HEVC will not only cover the space of the well-known current uses and capabilities of digital video – they will also include the deployment of new services and the delivery of enhanced video quality, such as ultra-high-definition television (UHDTV) and video with higher dynamic range, wider range of representable color, and greater representation precision than what is typically found today. HEVC is the next major generation of video coding design – a flexible, reliable and robust solution that will support the next decade of video applications and ease the burden of video on world-wide network traffic. This book provides a detailed explanation of the various parts of the standard, insight into how it was developed, and in-depth discussion of algorithms and architectures for its implementation.

Coding Architecture Pierpaolo Ruttico, 2024-01-30 This book provides a clear picture of how computational processes are gradually permeating and innovating the Architecture, Engineering, and Construction sector, contributing to sustainability and aesthetic evolution. It achieves that by gathering a collection of accounts shared by pioneering professionals involved in this innovation, drawing from recent academic studies, ongoing experimental processes conducted in cutting-edge architectural and engineering offices, as well as innovative industrial applications. The covered subjects span a wide range, including artificial intelligence and robotic manufacturing, the metaverse and 3D printing, strategies to counter CO2 consumption through plug-ins, as well as emerging materials and construction techniques. The chapters feature authors who are pioneers and embrace roles like software developers, architects, process engineers, academics, and forward-thinking entrepreneurs. They represent authoritative references within a broader interconnected cultural and technological system; an eclectic system that finds in computational processes the key to addressing the new challenges of contemporary architecture.

This collection evaluates the methods and results of the famous, and even infamous, Vicos Project.

The New Science of Giambattista Vico Giambattista Vico, 2016-04-15 A pioneering treatise that aroused great controversy when it was first published in 1725, Vico's *New Science* is acknowledged today to be one of the few works of authentic genius in the history of social theory. It represents the most ambitious attempt before Comte at comprehensive science of human society and the most profound analysis of the class struggle prior to Marx.

New Science Giambattista Vico, 1999-04-29 Barely acknowledged in his lifetime, the *New Science* of Giambattista Vico (1668-1744) is an astonishingly perceptive and ambitious attempt to decipher the history, mythology and laws of the ancient world. Discarding the Renaissance notion of the classical as an idealised model for the modern, it argues that the key to true understanding of the past lies in accepting that the customs and emotional lives of ancient Greeks and Romans, Egyptians, Jews and Babylonians were radically different from our own. Along the way, Vico explores a huge variety of topics, ranging from physics to poetics, money to monsters, and family structures to the Flood. Marking a crucial turning-point in humanist thinking, *New Science* has remained deeply influential since the dawn of Romanticism, inspiring the work of Karl Marx and even influencing the framework for Joyce's *Finnegan's Wake*.

On the Most Ancient Wisdom of the Italians Giambattista Vico, 2010-01-01 In an illuminating introduction to the volume, Robert Miner elucidates Vico's short but difficult work; at the same time, he allows the reader to assess the importance of that work, in absolute terms as well as relative to Vico's other writings and the work of his numerous interlocutors in the republic of letters. --

Technopoly Neil Postman, 2011-06-01 In this witty, often terrifying work of cultural criticism, the author of *Amusing Ourselves to Death* chronicles our transformation into a Technopoly: a society that no longer merely uses technology as a support system but instead is shaped by it—with radical consequences for the meanings of politics, art, education, intelligence, and truth.

Philosophy of the Novel Barry Stocker,2018-11-02 This book explores the aesthetics of the novel from the perspective of Continental European philosophy, presenting a theory on the philosophical definition and importance of the novel as a literary genre. It analyses a variety of individuals whose work is reflected in both theoretical literary criticism and Continental European aesthetics, including Mikhail Bakhtin, Georg Lukács, Theodor Adorno, and Walter Benjamin. Moving through material from eighteenth century and ancient Greek philosophy and aesthetics, the book provides comprehensive coverage of the major positions on the philosophy of the novel. Distinctive features include the importance of Vico's view of the epic to understanding the novel, the importance of Kierkegaard's view of the novel and irony along with his other aesthetic views, the different possibilities associated with seeing the novel as 'mimetic' and the importance of Proust in understanding the genre in all its philosophical aspects, relating the issue of the philosophical aesthetics of the novel with the issue of philosophy written as a novel and the interaction between these two alternative positions.

Places of Mind Timothy Brennan,2021-03-23 A New York Times Book Review Editors' Choice The first comprehensive biography of the most influential, controversial, and celebrated Palestinian intellectual of the twentieth century As someone who studied under Edward Said and remained a friend until his death in 2003, Timothy Brennan had unprecedented access to his thesis adviser's ideas and legacy. In this authoritative work, Said, the pioneer of postcolonial studies, a tireless champion for his native Palestine, and an erudite literary critic, emerges as a self-doubting, tender, eloquent advocate of literature's dramatic effects on politics and civic life. Charting the intertwined routes of Said's intellectual development, *Places of Mind* reveals him as a study in opposites: a cajoler and strategist, a New York intellectual with a foot in Beirut, an orchestra impresario in Weimar and Ramallah, a raconteur on national television, a Palestinian negotiator at the State Department, and an actor in films in which he played himself. Brennan traces the Arab influences on Said's thinking along with his tutelage under Lebanese statesmen, off-beat modernist auteurs, and New York literati, as Said grew into a scholar whose influential writings changed the face of university life forever. With both intimidating brilliance and charm, Said melded these resources into a groundbreaking and influential countertradition of radical humanism, set against the backdrop of techno-scientific dominance and religious war. With unparalleled clarity, Said gave the humanities a new authority in the age of Reaganism, one that continues today. Drawing on the testimonies of family, friends, students, and antagonists alike, and aided by FBI files, unpublished writings, and Said's drafts of novels and personal letters, *Places of Mind* synthesizes Said's intellectual breadth and influence into an unprecedented, intimate, and compelling portrait of one of the great minds of the twentieth century.

Peace by Peaceful Means Johan Galtung,1996-04-28 Johan Galtung, one of the founders of modern peace studies, provides a wide-ranging panorama of the ideas, theories and assumptions on which the study of peace is based. The

book is organized in four parts, each examining the one of the four major theoretical approaches to peace. The first part covers peace theory, exploring the epistemological assumptions of peace. In Part Two conflict theory is examined with an exploration of nonviolent and creative handling of conflict. Developmental theory is discussed in Part Three, exploring structural violence, particularly in the economic field, together with a consideration of the ways of overcoming that violence. The fourth part is devoted to civilization theory. This involves an

Finding Cholita Billie Jean Isbell,2010-10-01 Finding Cholita is fictionalized ethnography of the Ayacucho region of Peru covering a thirty-year period from the 1970s to today. It is a story of human tragedy resulting from the region's long history of discrimination, class oppression, and then the rise and fall of the communist organization Shining Path. The story's narrator, American anthropologist Dr. Alice Woodsley, attempts to locate her goddaughter, Cholita, who is known to have joined Shining Path and to have murdered her biological father, who fathered her through rape. Searching for Cholita, Woodsley devotes herself to documenting the stories of the countless Andean peasant women who were raped by soldiers, often going beyond witnessing as she helps the women relieve the pain of their sexual horror.

Traffic Tom Vanderbilt,2009-08-11 Driving is a fact of life. We are all spending more and more time on the road, and traffic is an issue we face everyday. This book will make you think about it in a whole new light. We have always had a passion for cars and driving. Now Traffic offers us an exceptionally rich understanding of that passion. Vanderbilt explains why traffic jams form, outlines the unintended consequences of our attempts to engineer safety and even identifies the most common mistakes drivers make in parking lots. Based on exhaustive research and interviews with driving experts and traffic officials around the globe, Traffic gets under the hood of the quotidian activity of driving to uncover the surprisingly complex web of physical, psychological and technical factors that explain how traffic works.

Pereira Declares: A Testimony Antonio Tabucchi,1997-06-17 One of the most intriguing and appealing character studies in recent European fiction, and easily the best work of Tabucchi's to have appeared in English translation.—Kirkus Reviews Dr. Pereira is an aging, overweight journalist who has failed to notice the menacing cloud of fascism over Salazarist Portugal, until one day he meets an aspiring young writer and anti-fascist. Breaking out of his apolitical torpor, Pereira reluctantly rises to heroism.

Deep Learning Techniques for Music Generation Jean-Pierre Briot,Gaëtan Hadjeres,François-David Pachet,2019-11-08 This book is a survey and analysis of how deep learning can be used to generate musical content. The authors offer a comprehensive presentation of the foundations of deep learning techniques for music generation. They also develop a conceptual framework used to classify and analyze various types of architecture, encoding models, generation strategies, and ways to control the generation. The five dimensions of this framework are: objective (the kind of musical content to be generated, e.g., melody, accompaniment); representation (the musical elements

to be considered and how to encode them, e.g., chord, silence, piano roll, one-hot encoding); architecture (the structure organizing neurons, their connexions, and the flow of their activations, e.g., feedforward, recurrent, variational autoencoder); challenge (the desired properties and issues, e.g., variability, incrementality, adaptability); and strategy (the way to model and control the process of generation, e.g., single-step feedforward, iterative feedforward, decoder feedforward, sampling). To illustrate the possible design decisions and to allow comparison and correlation analysis they analyze and classify more than 40 systems, and they discuss important open challenges such as interactivity, originality, and structure. The authors have extensive knowledge and experience in all related research, technical, performance, and business aspects. The book is suitable for students, practitioners, and researchers in the artificial intelligence, machine learning, and music creation domains. The reader does not require any prior knowledge about artificial neural networks, deep learning, or computer music. The text is fully supported with a comprehensive table of acronyms, bibliography, glossary, and index, and supplementary material is available from the authors' website.

Mute Speech Jacques Rancière, 2011 Jacques Rancière has continually unsettled political discourse, particularly through his questioning of aesthetic distributions of the sensible, which configure the limits of what can be seen and said. Widely recognized as a seminal work in Rancière's corpus, the translation of which is long overdue, *Mute Speech* is an intellectual tour de force proposing a new framework for thinking about the history of art and literature. Rancière argues that our current notion of literature is a relatively recent creation, having first appeared in the wake of the French Revolution and with the rise of Romanticism. In its rejection of the system of representational hierarchies that had constituted belles-lettres, literature is founded upon a radical equivalence in which all things are possible expressions of the life of a people. With an analysis reaching back to Plato, Aristotle, the German Romantics, Vico, and Cervantes and concluding with brilliant readings of Flaubert, Mallarmé, and Proust, Rancière demonstrates the uncontrollable democratic impulse lying at the heart of literature's still-vital capacity for reinvention.--Publisher description.

Rhythm Science Paul D. Miller, 2004-03-19 The art of the mix creates a new language of creativity. Once you get into the flow of things, you're always haunted by the way that things could have turned out. This outcome, that conclusion. You get my drift. The uncertainty is what holds the story together, and that's what I'm going to talk about.—Rhythm Science The conceptual artist Paul Miller, also known as Dj Spooky that Subliminal Kid, delivers a manifesto for rhythm science—the creation of art from the flow of patterns in sound and culture, the changing same. Taking the Dj's mix as template, he describes how the artist, navigating the innumerable ways to arrange the mix of cultural ideas and objects that bombard us, uses technology and art to create something new and expressive and endlessly variable. Technology provides the method and model; information on the web, like the elements of a mix, doesn't stay in one place. And technology is the medium, bridging the artist's consciousness and the outside world. Miller constructed his Dj Spooky persona (spooky from the eerie sounds of hip-hop, techno, ambient, and the other music that he plays) as a conceptual art project, but then came to see it as the opportunity for coding a

generative syntax for new languages of creativity. For example: Start with the inspiration of George Herriman's Krazy Kat comic strip. Make a track invoking his absurd landscapes...What do tons and tons of air pressure moving in the atmosphere sound like? Make music that acts a metaphor for that kind of immersion or density. Or, for an online remix of two works by Marcel Duchamp: I took a lot of his material written on music and flipped it into a DJ mix of his visual material—with him rhyming! Tracing the genealogy of rhythm science, Miller cites sources and influences as varied as Ralph Waldo Emerson (all minds quote), Grandmaster Flash, W. E. B Dubois, James Joyce, and Eminem. The story unfolds while the fragments coalesce, he writes. Miller's textual provocations are designed for maximum visual and tactile seduction by the international studio COMA (Cornelia Blatter and Marcel Hermans). They sustain the book's motifs of recontextualizing and relayering, texts and images bleed through from page to page, creating what amount to 2.5 dimensional vectors. From its remarkable velvet flesh cover, to the die cut hole through the center of the book, which reveals the colored nub holding in place the included audio CD, Rhythm Science: Excerpts and Allegories from the Sub Rosa Archives, this pamphlet truly lives up to Editorial Director Peter Lunenfeld's claim that the Mediawork Pamphlets are theoretical fetish objects...'zines for grown-ups.
