Featuring a new chapter on critical theories, and revised to take a less Eurocentric approach to concepts and case studies, this new edition allows you to tackle global politics' important concepts, debates and problems: -How can theories help us to understand the politics of a global pandemic? -Do we live in a 'post-truth' world of 'fake news' and disinformation? -Does international aid work? - Does the United States remain a global hegemon? -What is the Anthropocene and how does it shape global politics? - Are global politics constrained by a 'North-South' divide? -What are the possible futures of global politics – and the politics of outer space? Delving into topics as diverse as anarchy, intersectionality, Confucianism, and neoconservatism, boxed features give you confidence in political analysis: -Focus on: learn more about the global colour line or the tragedy of the commons -Key figures: discuss the ideas of Hans Morgenthau, Frantz Fanon or bell hooks -Debating: argue whether the United Nations are obsolete, or whether nuclear weapons promote peace -Global politics in action: apply your learning to the migration crisis in Europe or the Arab Spring -Approaches to: consider human rights or the Covid-19 pandemic from the perspective of realist, liberal, postcolonial, Marxist, feminist, constructivist and post-structuralist theory -Global actors: understand the significance of Black Lives Matter, Amnesty International or the International Monetary Fund. Spanning the development of global politics, from the early origins of globalization through to the return of multipolarity in the twenty-first century, this is an essential text for undergraduates studying global politics and international relations.

**The Red Circle** Brandon Webb, John David Mann, 2012-04-10 Explosive, revealing, and intelligent, The Red Circle provides a uniquely personal glimpse into one of the most challenging and secretive military training courses in the world. Now including an excerpt from The Killing School: Inside the World's Deadliest Sniper Program BEFORE HE COULD FORGE A BAND OF ELITE WARRIORS... HE HAD TO BECOME ONE HIMSELF. Brandon Webb's experiences in the world's most elite sniper corps are the stuff of legend. From his grueling years of training in Naval Special Operations to his combat tours in the Persian Gulf and Afghanistan, The Red Circle provides a rare and riveting look at the inner workings of the U.S. military through the eyes of a covert operations specialist. Yet it is Webb's distinguished second career as a lead instructor for the shadowy sniper cell and Course Manager of the Navy SEAL Sniper Program that trained some of America's finest and deadliest warriors-including Marcus Luttrell and Chris Kyle-that makes his story so compelling. Luttrell credits Webb's training with his own survival during the ill-fated 2005 Operation Redwing in Afghanistan. Kyle went on to become the U.S. military's top marksman, with more than 150 confirmed kills. From a candid chronicle of his student days, going through the sniper course himself, to his hair-raising close calls with Taliban and al Qaeda forces in the northern Afghanistan wilderness, to his vivid account of designing new sniper standards and training some of the most accomplished snipers of the twenty-first century, Webb provides a rare look at the making of the Special Operations warriors who are at the forefront of today's military.

**How Would You Move Mount Fuji?** William Poundstone,2003-05-01 From Wall Street to Silicon Valley, employers are using tough and tricky questions to gauge job candidates' intelligence, imagination, and problem-solving ability - qualities needed to survive in today's hypercompetitive global marketplace. For the first time, William Poundstone reveals the toughest questions used at Microsoft and other Fortune 500 companies -- and supplies the answers. He traces the rise and controversial fall of employer-mandated IQ tests, the peculiar obsessions of Bill Gates (who plays jigsaw puzzles as a competitive sport), the sadistic mind games of Wall Street (which reportedly led one job seeker to smash a forty-third-story window), and the bizarre excesses of today's hiring managers (who may start off your interview with a box of Legos or a game of virtual Russian roulette). How Would You Move Mount Fuji? is an indispensable book for anyone in business. Managers seeking the most talented employees will learn to incorporate puzzle interviews in their search for the top candidates. Job seekers will discover how to tackle even the most brain-busting questions, and gain the advantage that could win the job of a lifetime. And anyone who has ever dreamed of going up against the best minds in business may discover that these puzzles are simply a lot of fun. Why are beer cans tapered on the end, anyway?

**The Craft of Scientific Presentations** Michael Alley,2006-05-17 This timely and hugely practical work provides a score of examples from contemporary and historical scientific presentations to show clearly what makes an oral presentation effective. It considers presentations made to persuade an audience to adopt some course of action (such as funding a proposal) as well as presentations made to communicate information, and it considers these from four perspectives: speech, structure, visual aids, and delivery. It also discusses computer-based projections and slide shows as well as overhead projections. In particular, it looks at ways of organizing graphics and text in projected images and of using layout and design to present the information efficiently and effectively.
