**Alive at the End of the World** Saeed Jones, 2022-09-13 Pierced by grief and charged with history, this new poetry collection from the award-winning author of *Prelude to Bruise* and *How We Fight for Our Lives* confronts our everyday apocalypses. In haunted poems glinting with laughter, Saeed Jones

explores the public and private betrayals of life as we know it. With verve, wit, and elegant craft, Jones strips away American artifice in order to reveal the intimate grief of a mourning son and the collective grief bearing down on all of us. Drawing from memoir, fiction, and persona, Jones confronts the everyday perils of white supremacy with a finely tuned poetic ear, identifying moments that seem routine even as they open chasms of hurt. Viewing himself as an unreliable narrator, Jones looks outward to understand what's within, bringing forth cultural icons like Little Richard, Paul Mooney, Aretha Franklin and Diahann Carroll to illuminate how long and how perilously we've been living on top of fault lines. As these poems seek ways to love and survive through America's existential threats, Jones ushers his readers toward the realization that the end of the world is already here—and the apocalypse is a state of being.

The Road Not Taken: Edward Lansdale and the American Tragedy in Vietnam Max Boot, 2018-01-09 Finalist for the Pulitzer Prize (Biography) A New York Times bestseller, this "epic and elegant" biography (Wall Street Journal) profoundly recasts our understanding of the Vietnam War. Praised as a "superb scholarly achievement" (Foreign Policy), *The Road Not Taken* confirms Max Boot's role as a "master chronicler" (Washington Times) of American military affairs. Through dozens of interviews and never-before-seen documents, Boot rescues Edward Lansdale (1908–1987) from historical ignominy to "restore a sense of proportion" to this "political Svengali, or 'Lawrence of Asia' " (The

New Yorker). Boot demonstrates how Lansdale, the man said to be the fictional model for Graham Greene's *The Quiet American*, pioneered a "hearts and minds" diplomacy, first in the Philippines and then in Vietnam. Bringing a tragic complexity to Lansdale and a nuanced analysis to his visionary foreign policy, Boot suggests Vietnam could have been different had we only listened. With contemporary reverberations in Iraq, Afghanistan, and Syria, *The Road Not Taken* is a "judicious and absorbing" (New York Times Book Review) biography of lasting historical consequence.

**Oxygen Transport to Tissue-V** D. W. Lubbers,2012-12-06 On the understanding that few people ever read the preface to any book and also on the understanding that even those few people who do read the preface realize that virtually nothing of any substance is ever said, I shall write at such length as will be proportional to my expected readership. The meetings of the International Society on Oxygen Transport to Tissue provide a forum for discussion amongst scientists who, although being from very diverse and specialized backgrounds, have tissue oxygenation as a unifying theme of interest. The wide variety of research material presented in this volume and the multiplicity of the experimental techniques described, should serve as an adequate gauge to the range of expertise and knowledge of the society's members. Such diversity should also stress the importance of the need for multidisciplinary approaches to complex biological problems. In attempting a fundamental characterization of a biological process such as tissue oxygenation, the application of very many separate research skills are necessary, such as mathematics, engineering, biophysics, biochemistry, physiology, histology and clinical medicine. The success of the ISOTT has - and we hope - will continue to be causing a combination of individuals to direct their specialized knowledge to the many facets of a single process - tissue oxygenation.

**How We Fight for Our Lives** Saeed Jones,2020-07-07 From award-winning poet

Saeed Jones, *How We Fight for Our Lives*—winner of the Kirkus Prize and the Stonewall Book Award—is a “moving, bracingly honest memoir” (The New York Times Book Review) written at the crossroads of sex, race, and power. One of the best books of the year as selected by The New York Times; The Washington Post; NPR; Time; The New Yorker; O, The Oprah Magazine; Harper’s Bazaar; Elle; BuzzFeed; Goodreads; and many more. “People don’t just happen,” writes Saeed Jones. “We sacrifice former versions of ourselves. We sacrifice the people who dared to raise us. The ‘I’ it seems doesn’t exist until we are able to say, ‘I am no longer yours.’” Haunted and haunting, *How We Fight for Our Lives* is a stunning coming-of-age memoir about a young, black, gay man from the South as he fights to carve out a place for himself, within his family, within his country, within his own hopes, desires, and fears. Through a series of vignettes that chart a course across the American landscape, Jones draws readers into his boyhood and adolescence—into tumultuous relationships with his family, into passing flings with lovers, friends, and strangers. Each piece builds into a larger examination of race and queerness, power and vulnerability, love and grief: a portrait of what we all do for one another—and to one another—as we fight to become ourselves. An award-winning poet, Jones has developed a style that’s as beautiful as it is powerful—a voice that’s by turns a river, a blues, and a nightscape set ablaze. *How We Fight for Our Lives* is a one-of-a-kind memoir and a book that cements Saeed Jones as an essential writer for our time.

**Practical Statistics for Data Scientists** Peter Bruce, Andrew Bruce, 2017-05-10 Statistical methods are a key part of data science, yet very few data scientists have any formal statistics training. Courses and books on basic statistics rarely cover the topic from a data science perspective. This practical guide explains how to apply various statistical methods to data science, tells you how to avoid their misuse, and gives you advice on what's important and what's not. Many data science resources incorporate statistical methods but lack a deeper statistical perspective. If you're familiar with the R programming language, and have some exposure to statistics, this quick reference bridges the gap in an accessible, readable format. With this book, you'll learn: Why exploratory data analysis is a key preliminary step in data science How random sampling can reduce bias and yield a higher quality dataset, even with big data How the principles of experimental design yield definitive answers to questions How to use regression to estimate outcomes and detect anomalies Key classification techniques for predicting which categories a record belongs to Statistical machine learning methods that "learn" from data Unsupervised learning methods for extracting meaning from unlabeled data
