Software and Mind Andrei Sorin,2013-01-01 Addressing general readers as well as software practitioners, *Software and Mind* discusses the fallacies of the mechanistic ideology and the degradation of minds caused by these fallacies. Mechanism holds that every aspect of the world can be represented as a simple hierarchical structure of entities. But, while useful in fields like mathematics and manufacturing, this idea is generally worthless, because most aspects of the world are too complex to be reduced to simple hierarchical structures. Our software-related affairs, in particular, cannot be represented in this fashion. And yet, all programming theories and development systems, and all software applications, attempt to reduce real-world problems to neat hierarchical structures of data, operations, and features. Using Karl Popper's famous principles of demarcation between science and pseudoscience, the book shows that the mechanistic ideology has turned most of our software-related activities into pseudoscientific pursuits. Using mechanism as warrant, the software elites are promoting invalid, even fraudulent, software notions. They force us to depend on generic, inferior systems, instead of allowing us to develop software skills and to create our own systems. Software mechanism emulates the methods of manufacturing, and thereby restricts us to high levels of abstraction and simple, isolated structures. The benefits of software, however, can be attained only if we start with low-level elements and learn to create complex, interacting structures. Software, the book argues, is a non-mechanistic phenomenon. So it is akin to language, not to physical objects. Like language, it permits us to mirror the world in our minds and to communicate with it. Moreover, we increasingly depend on software in everything we do, in the same way that we depend on language. Thus, being restricted to mechanistic software is like thinking and communicating while being restricted to some ready-made sentences supplied by an elite. Ultimately, by impoverishing software, our elites are achieving what the totalitarian elite described by George Orwell in *Nineteen Eighty-Four* achieves by impoverishing language: they are degrading our minds.

Edit Better Jeff Bartsch,2014-05-17 Imagine pushing a magic button in your video editing software labeled BETTER. Any project you edit turns out exactly how you planned, every single time. Your audience is absolutely spellbound, wiping tears from their eyes, laughing out loud, or sitting in stunned silence as they see the world in a different way for the first time. Bad news: that button doesn't exist. Good news: EDIT BETTER shows you how to get there anyway. EDIT BETTER was written for video editors who consider themselves advanced hobbyists or growth-minded professionals, artists who know that the tools of editing matter far less than the knowledge of how to use those tools powerfully. This book does not illuminate the workings of Avid, Final Cut, or Premiere, and is not a meditation on film editing. What it is: a provocative, wide-ranging collection of strategies and tactics for the creative application of TV and video editing, no matter your editing tools. Author Jeff Bartsch lays out both big picture strategies and practical, boots-on-the-ground tactics for powerful communication. Going far beyond mere button pushing, Jeff good-naturedly blends communication theory, marketing, behavioral psychology, neuroscience, and nuts-and-bolts details of editing application from years of experience in Hollywood, the storytelling capital of the world.

The Conversations Michael Ondaatje,2012-12-03 During the filming of his celebrated novel THE ENGLISH PATIENT, Michael Ondaatje became increasingly fascinated as he watched the veteran editor Walter Murch at work. THE CONVERSATIONS, which grew out of discussions between the two men, is about the craft of filmmaking and deals with every aspect of film, from the first stage of script writing to the final stage of the sound mix. Walter Murch emerged during the 1960s at the centre of a renaissance of American filmmakers which included the directors Francis Coppola, George Lucas and Fred Zinneman. He worked on a whole raft of great films including the three GODFATHER films, JULIA, AMERICAN GRAFFITI, APOCALYPSE NOW, THE UNBEARABLE LIGHTNESS OF BEING and many others. Articulate, intellectual, humorous and passionate about his craft and its devices, Murch brings his vast experience and penetrating insights to bear as he explains how films are made, how they work, how they go wrong and how they can be saved. His experience on APOCALYPSE NOW - both originally and more recently when the film was completely re-cut - and his work with Anthony Minghella on THE ENGLISH PATIENT provide illuminating highlights.
