Not a Box Board Book Antoinette Portis, 2011-09-27 A box is just a box . . . unless it's not a box. From mountain to rocket ship, a small rabbit shows that a box will go as far as the imagination allows. Inspired by a memory of sitting in a box on her driveway with her sister, Antoinette Portis captures the thrill when pretend feels so real that it actually becomes real—when the imagination takes over and inside a cardboard box, a child is transported to a world where anything is possible.

Not a Stick Antoinette Portis, 2011-02-22 A celebration of the power of imagination from the Theodor Seuss Geisel Honor Award-winning creator of Not a Box Experience the thrill of the moment when pretend feels so real that it actually becomes real! Following the critically acclaimed Not a Box, this book proves that a stick is not always just a stick. Whether it's conducting an orchestra, painting a masterpiece, or slaying a dragon—give a child a stick and let imagination take over and the magic begin.

The Crayon Box that Talked , 2011-10-26 Yellow hates Red, so does Green, and no one likes Orange! Can these crayons quit arguing and learn to cooperate? Shane DeRolf's deceptively simple poem celebrates the creation of harmony through diversity. In combination with Michael Letzig's vibrant illustrations, young readers will understand that when we all work together, the results are much more colorful and interesting.

Teaching and Learning Online Franklin S. Allaire, Jennifer E. Killham, 2022-04-01 Science is unique among the disciplines since it is inherently hands-on. However, the hands-on nature of science instruction also makes it uniquely challenging when teaching in virtual environments. How do we, as science teachers, deliver high-quality experiences in an online environment that leads to age/grade-level appropriate science content knowledge and literacy, but also collaborative experiences in the inquiry process and the nature of science? The expansion of online environments for education poses logistical and pedagogical challenges for early childhood and elementary science teachers and early learners. Despite digital media becoming more available and ubiquitous and increases in online spaces for teaching and learning (Killham et al., 2014; Wong et al., 2018), PreK-12 teachers consistently report feeling underprepared or overwhelmed by online learning environments (Molnar et al., 2021; Seaman et al., 2018). This is coupled with persistent challenges related to elementary teachers' lack of confidence and low science teaching self-efficacy (Brigido,

Borrachero, Bermejo, & Mellado, 2013; Gunning & Mensah, 2011). Teaching and Learning Online: Science for Elementary Grade Levels comprises three distinct sections: Frameworks, Teacher's Journeys, and Lesson Plans. Each section explores the current trends and the unique challenges facing elementary teachers and students when teaching and learning science in online environments. All three sections include alignment with Next Generation Science Standards, tips and advice from the authors, online resources, and discussion questions to foster individual reflection as well as small group/classwide discussion. Teacher's Journeys and Lesson Plan sections use the 5E model (Bybee et al., 2006; Duran & Duran, 2004). Ideal for undergraduate teacher candidates, graduate students, teacher educators, classroom teachers, parents, and administrators, this book addresses why and how teachers use online environments to teach science content and work with elementary students through a research-based foundation.

The Routledge Companion to Copyright and Creativity in the 21st Century Michelle Bogue, Nancy Wolff, 2020-11-25 These collected chapters and interviews explore the current issues and debates about how copyright will or should adapt to meet the practices of 21st-century creators and internet users. The book begins with an overview of copyright law basics. It is organized by parts that correspond to creative genres: Literary Works, Visual Arts, Fine Art, Music, Video Games and Virtual Worlds, Fashion, and Technology. The chapters and interviews address issues such as copyright ownership in work created by Artificial Intelligence (AI), the musical remix market, whether appropriation is ever a fair use of a copyrighted work or if it is always theft, and whether internet-based platforms should do more to deter piracy of creators' works. Each part ends with an essay explaining the significance of one or two landmark or trendsetting cases to help the reader understand the practical implications of the law. Written to be accessible to both lay and legal audiences, this unique collection addresses contemporary legal issues that all creators need to understand and will be essential reading for artists, designers, and musicians as well as the lawyers who represent them.
