**Viper Pilot (Enhanced Edition)** Dan Hampton, 2012-10-02 Get inside the cockpit with Dan Hampton, the military's most decorated F-16 pilot, in this enhanced e-book edition of *Viper Pilot*. Exclusive to this edition are 11 video interviews, where Hampton talks candidly about his time as a Wild Weasel and about the fighter jet that kept him alive through so many dangerous skirmishes. In addition, an interactive "first-person" cockpit diagram lets you get deeper into the action, providing a visual companion to the book that leaves you feeling like you're sitting in the iconic F-16 itself. 151 combat missions 21 hard kills on surface-to-air-missile sites 4 Distinguished Flying Crosses with Valor 1 Purple Heart Sure to rank as one of the greatest aviation memoirs ever written, *Viper Pilot* is an Air Force legend's thrilling eyewitness account of modern air warfare. From 1986 to 2006, Lt. Col. Dan Hampton was a leading member of the Wild Weasels, the elite Air Force fighter squadrons whose mission is recognized as the most dangerous job in modern air combat. Weasels are the first planes sent into a war zone, flying deep behind enemy lines purposely seeking to draw fire from surface-to-air missiles and artillery. They must skillfully evade being shot down—and then return to destroy the threats, thereby making the skies safe for everyone else to follow. Today these vital missions are more hazardous than direct air-to-air engagement with enemy aircraft. Hampton's record number of strikes on high-value targets make him the most lethal F-16 Wild Weasel pilot in American history. This is his remarkable story. Taught to fly at an early age by his father, Hampton logged twenty years and 608 combat hours in the world's most iconic fighter jet: the F-16 Fighting Falcon, or Viper as its pilots call it. Hampton spearheaded the 2003 invasion of Iraq, leading the first flight of fighters over the border en route to strike Baghdad. In the war that followed, he engaged in a series of brilliantly executed missions that earned him three Distinguished Flying Crosses with Valor; he notably saved a U.S. Marine unit from certain death by taking out the surrounding enemy forces near Nasiriyah. Two years earlier, on 9/11, Hampton's father was inside the Pentagon when it was attacked; with his dad's fate unknown, Hampton was scrambled into American skies and given the unprecedented orders to shoot down any unidentified aircraft. Hampton also flew critical missions in the first Gulf War, served on the Air Combat Command staff during the Kosovo War, and was injured in the 1996 Khobar Towers terrorist attack. With manned missions rapidly giving way to remote-controlled UAV drones, *Viper Pilot* may be the last memoir by a true hero of the skies. Gripping and irreverently humorous, it is an unforgettable look into the closed world of fighter pilots and modern air combat. Please note that due to the large file size of these special features this enhanced e-book may take longer to download than a standard e-book.

Now for the first time, a Blackbird pilot shares his unique experience of what it was like to fly this legend of aviation history. Through the words & photographs of retired Major Brian Shul, we enter the world of the Sled Driver. Major Shul gives us insight on all phases of flying, including the humbling experience of simulator training, the physiological stresses of wearing a space suit for long hours, & the intensity & magic of flying 80,000 feet above the Earth's surface at 2000 miles per hour. **SLED DRIVER** takes the reader through riveting accounts of the rigors of initial training, the gamut of emotions experienced while flying over hostile territory, & the sheer joy of displaying the jet at some of the world's largest airshows. **Soul Survivor** Andrea Leininger,Bruce Leininger,2009-08-03 James Leininger was just two years old when he began having disturbing nightmares that would not stop. He screamed out in the night: 'Plane on fire! Little man can't get out!' While nightmares are common among children, what happened next shocked those around him... James began to reveal details of planes and war tragedies that no two-year-old boy could know. His desperate parents were at a loss to help him until he said three things: 'Corsair', 'Natoma' and 'Jack Larsen'. From these tantalising clues, James's parents travelled thousands of miles and spent many long years piecing together these facts to try and find an answer that could end his torment. Finally, despite his mother's fears and his father's staunch Christian beliefs, they found only one possibility to the endless coincidences that surrounded every detail in James's life – that their son was reliving the past life of a World War II fighter pilot. Their touching story is one that will challenge sceptics and confirm the beliefs of those who already believe in life after death.

**The Right It** Alberto Savoia,2019-02-26 In this accessible, prescriptive, and widely applicable manual, Google's first engineering director and current Innovation Agitator Emeritus provides critical advice for rethinking how we launch a new idea, product, or business, insights to help successfully beat the law of market failure: that most new products will fail, even if competently executed. Millions of people around the world are working to introduce new ideas. Some will turn out to be stunning successes and have a major impact on our world and our culture: The next Google, the next Polio vaccine, the next Harry Potter, the next Red Cross, the next Ford Mustang. Others successes will be smaller and more personal, but no less meaningful: A restaurant that becomes a neighborhood favorite, a biography that tells an important story, a local nonprofit that cares for abandoned pets. Simultaneously, other groups are working equally hard to develop new ideas that, when launched, will fail. Some will fail spectacularly and publicly: New Coke, the movie John Carter, the Ford Edsel. Others failures will be smaller and more private, but no less failure: A home-based business that never takes off, a children's book that neither publishers nor children have any interest in, a charity for a cause too few people care about. Most people believe that their venture will be successful. But the law of market failure tells us that up to 90 percent of most new products, services, businesses, and initiatives will fail soon after launch—regardless of how promising they sound, how much we commit to them, or how well we execute them. This is a hard fact to accept. Combining detailed case studies with personal insight drawn from his time at Google, his experience as an entrepreneur and consultant, and his lectures at Stanford University and Google, Alberto Savoia offers an unparalleled approach to beating the beast that is market failure: "Make sure you are building The Right It before you build It right," he advises. In *The Right It*, he provides lessons on creating your own hard data, a strategy for market engagement, and an introduction to the concept of a pretotype (not a prototype). Groundbreaking, entertaining, and highly practical, this essential guide delivers a proven formula for ensuring ideas, products, services, and businesses succeed.

*Pilot Judgment and Crew Resource Management* Richard S. Jensen,2017-03-02 This is the first comprehensive book on pilot judgment. It provides a clear understanding of pilot judgment emphasizing how it can be applied to improving safety in aviation. The author brings together a rich store of personal flying experiences combined with a strong base of personal academic research to support the concepts presented. The book gives not only a strong emphasis to the application of judgment to aviation but also lays particular stress on the principles needed in how to learn, teach and evaluate judgment. For pilots, the main benefits to be gained from the book will be a foundation of knowledge and teaching to enable them to make better, safer decisions. For flight instructors, it teaches how to teach and evaluate judgment in flight students. In addition to pilots and flight instructors, the readership obviously includes aviation classroom instructors, scientists doing aviation-related research and aviation safety specialists.
