The Last Lecture Randy Pausch, 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Universal Access in Human-Computer Interaction. Users and Context Diversity Margherita Antona, Constantine Stephanidis, 2016-07-04 The three-volume set LNCS 9737-9739 constitutes the refereed proceedings of the 10th International Conference on Universal Access in Human-Computer Interaction, UAHCI 2016, held as part of the 10th International Conference on Human-Computer Interaction, HCII 2016, in Toronto, ON, Canada in July 2016, jointly with 15 other thematically similar conferences. The total of 1287 papers presented at the HCII 2016 conferences were carefully reviewed and selected from 4354 submissions. The papers included in the three UAHCI 2016 volumes address the following major topics: novel approaches to accessibility; design for all and inclusion best practices; universal access in architecture and product design; personal and collective informatics in universal access; eye-tracking in universal access; multimodal and natural interaction for universal access; universal access to mobile interaction; virtual reality, 3D and universal access; intelligent and assistive environments; universal access to education and learning; technologies for ASD and cognitive disabilities; design for healthy aging and rehabilitation; universal access to media and games; and universal access to mobility and automotive.

Interactive Visual Ideas for Musical Classroom Activities Catherine Dwinal, 2020-07 The digital interactive projection system is a staple of nearly every music classroom in the United States. By allowing teachers to show students methods and outcomes from a computer, these systems have become a necessity for reaching students who grew up as digital natives. But, as author and distinguished music educator Catherine Dwinal demonstrates, such systems can be much more meaningful pedagogical tools than simple replacements for chalkboards. In this book, she offers practical tips, tricks, resources, and 50 activities ideal to use alongside classroom projection systems. She focuses especially on tips and activities for beginning teachers, giving them the confidence to take a step out of their comfort zone and learn new ways of engaging students with technology. More than this, she provides reference materials that will serve as a trusted reference resource for years to come.

Health Literacy R.A. Logan, E.R. Siegel, 2017-10-18 While health literacy is a relatively new multidisciplinary field, it is vital to the successful engagement with and communication of health with patients, caregivers, and the public. This book 'New Directions in Health Literacy Research, Theory, and Practice' provides an introduction to health literacy research and practice and highlights similar scholarship in related disciplines. The book is organized as follows: the first chapter explains the still-evolving definition of health literacy; the next three chapters discuss developments and new directions in health literacy research, then a further two chapters are devoted to developments and new directions in health literacy theory. Two chapters explore health literacy interventions for vulnerable populations; four chapters cover health literacy leadership efforts; six chapters describe developments and new directions in disciplines that are similar to health literacy; and six chapters portray diverse health literacy practices. A preface from Richard Carmona M.D., the former U.S. Surgeon General, is included in the book. Although the book is intended primarily for health literacy researchers, practitioners and students, the diverse topics and approaches covered will be of interest to all healthcare and public health researchers, practitioners, and students, as well as scholars in related fields, such as health communication, science communication, consumer health informatics, library science, health disparities, and mass communication. As Dr. Carmona concludes in his preface: 'This is essential reading for all health practitioners.'

Design for Learning Jenae Cohn, Michael Greer, 2023-07-25 Online learning can be so dull—or not! Enter Jenae Cohn and Michael Greer, experienced authors and teachers, who decided it was time to take on the challenge of making online learning more interesting and compelling for students. So, they met in a Zoom call, contacted Rosenfeld Media, and wrote this book, Design for Learning: User Experience in Online Teaching and Learning (many Zoom calls later). The book is structured to teach online learning in such a way that anyone can follow its practices and create a dynamic educational presentation. Chapters cover everything from learning about your learners and setting learning goals to building connections with learners and giving them feedback. In addition, the authors dive into the nitty-gritty details of creating online courses, including takeaways at the end of each chapter and easy-to-follow examples throughout. "I particularly appreciate how thoughtful Jenae and Michael are about considering the experience from the learner's point of view and the emphasis they put on learner agency." —Julie Dirksen, Author, Design for How People Learn Together, Jenae Cohn and Michael Greer have years of experience designing and producing online courses for students. They wanted the tone of their book to be friendly, supportive, engaging, empathetic, and thoughtful. With that in mind, they chose examples that reflected what an ordinary user might encounter on a day-to-day basis, highlighting everything from complex skills (accessibility) to the most minute details, such as "smile when you talk" for a friendlier tone. Takeaways Writing compelling content and instructional text Designing interesting text and visuals Planning and producing videos Recording sound and voice-overs Creating and facilitating live website presentations Designing surveys for class feedback Rating whether your presentation was successful Who This Book Is For Teachers, learning development professionals, and anyone tasked with designing an online course or a one-off workshop Content creators, instructional designers, user experience designers, and others who care about the experience of online learning Whether you're a novice or experienced online instructional designer, this book will show you how to apply industry best practices, and provide how-to examples, powerful templates, and activities to craft compelling instructional content—whether text, audio, or video. Best of all—your course will never be called dull again. Frequently Asked Questions Q: How do I design a course that really keeps people's attention online? A: When it comes to online learning, distraction is a huge concern, and engagement metrics are a big part of how designers can tell if a course is really engaging. We believe that the more targeted a course is to your specific learners and their needs, the better you'll be able to serve them. (See Chapter 2, "Learning About Your Learners," to understand where your learners might be coming from.) We also have specific strategies for keeping learners' attention once the course is running (see Chapters 8, "Facilitating Live Webinar Presentations," and 9, "Building Connections Among Learners"). Q: Is it really possible to create an online course or training that's just as good as an on-site one? A: We think so! But it's important for readers to recognize that an online learning experience is really different than an on-site course. Comparing the two experiences is (forgive the cliché) like comparing apples and oranges. You have to have different expectations up front—and so do your learners. In Chapter 4, "Building a Space for Online Learning," we explore what unique advantages and limitations there are around building a course in an online space and consider how the lessons from UX research can inform quality experiences online. Q: I've been asked to design a course in just a month. Will this book help me design something quickly? A: A lot of designers have tight turnarounds, so you'll find advice that could be applied on a shorter timeline. Specifically, you can modify some of the design approaches in

Chapters 2, “Learning About Your Learners,” and 3, “Setting the Foundation.” In the chapters about video planning and production (Chapters 6, “Planning Videos, and 7, “Producing Videos”), you’ll learn tips to make simpler videos in case you don’t have time for an extensive video planning and editing process.

Teaching Psychology Online Kelly S. Neff, Stewart Ian Donaldson, 2013 Intended as a resource for psychology educators ranging from teaching assistants to experienced faculty, this book shows readers how to effectively create and manage an online psychology course. Guidelines for preparing courses, facilitating communication, and assigning grades are provided along with activities and assessments geared specifically towards psychology. Pedagogical theories and research are fused with the authors' teaching experiences to help maximize the reader's abilities as an online psychology instructor. The book focuses on psychology education at the undergraduate level but it also includes material appropriate for graduate students and professionals. Readers will find helpful examples from all the major content areas including introductory, social, developmental, biological, abnormal, and positive psychology, and human sexuality. Every chapter is organized around 3 sections. The Purpose part introduces the key concepts, theory, and research. The Implementation section reviews the 'nuts and bolts' of online teaching, and the Troubleshooting section addresses key problems and

potential solutions. 'Text boxes' highlight important tips. The website <http://www.TeachingPsychologyOnline.com> provides additional tips, links to related articles and other resources, and examples of online psychology assignments from across the discipline. The book addresses: launching your online course; enhancing student/instructor communication; modes of multimedia and how to integrate them into your course including lecture videos, podcasting, blogging, wikis, and social networking sites; creating activities for online courses; assessment and grading; and online education trend including doctoral level education. Ideal for instructors teaching ANY psychology course, from introductory to upper-level undergraduate to graduate courses, this text can be used for developing on line courses in applied areas such as counseling, health, and industrial psychology as well as for courses in social, cognitive, and developmental psychology. Instructors of any technical skill level can use this book, including those familiar with Blackboard to those who are just getting started. Whether you are a seasoned pro or new to teaching psychology online, the tips in this book can help improve your instruction, reduce your prep time, and enhance your students' success.
