Eleanor Gordon

Conflict, Security and Justice Eleanor

Gordon, 2019-04-26 This path-breaking new textbook provides a broad overview of the core concepts, actors and activities involved in building security and justice after conflict, as well as challenges and lessons learned in this field. Drawing attention to the principles which guide – or should guide – this kind of work, as well as using practical examples throughout, the book covers a uniquely wide range of issues in peacebuilding – from transitional justice and disarmament to security sector reform and human rights. It concludes by considering both the regional and more far-reaching impacts of conflict, including such global phenomena as terrorism, piracy and organised crime. With a decade of experience working in post-conflict zones for the UN and other organisations, and a further 10 years in academia and as a consultant for various international organisations, the author's unparalleled expertise on the topic and her accessible writing style make this book the essential guide to postgraduate and upper-level undergraduate courses on peace and conflict studies. The text is also important supplemental reading for those studying war, peace, development, security or IR in a wider context and for practitioners and policy-makers in the field of peacebuilding.

Handbook of Sexuality Leadership James C. Wadley, 2019-12-06 This interdisciplinary book bridges the gap between sexuality and leadership studies and serves as a blueprint for professionals seeking to understand the rationale behind leadership styles, particularly those which facilitate conversations that educate or liberate individuals, couples, families, and communities. The Handbook of Sexuality Leadership brings together education, clinical, research, and advocacy experts from the field of sexology, who each speak of their unique leadership experiences – with diversity and inclusivity in mind – and

serve as a medium of empowerment and transformational influence. This innovative compendium illuminates strategic planning, community engagement, and the necessity of working with underserved or marginalized communities using a combination of leadership styles. Chapters provide tools for risk taking, organizational improvement, collaborative leadership, and cultural intelligence, as well as strategies to emancipate underrepresented groups and lead systemic change. With questions for further thought included to provoke critical thinking and initiate transformative conversations, this book will be an essential read for anyone interested in becoming a sexuality consultant or serving in a leadership position.

The Hedgehog and the Fox Isaiah

Berlin,2013-06-02 The fox knows many things, but the hedgehog knows one big thing. This ancient Greek aphorism, preserved in a fragment from the poet Archilochus, describes the central thesis of Isaiah Berlin's masterly essay on Leo Tolstoy and the philosophy of history, the subject of the epilogue to War and Peace. Although there have been many interpretations of the adage, Berlin uses it to mark a fundamental distinction between human beings who are fascinated by the infinite variety of things and those who relate everything to a central, all-embracing system. Applied to Tolstoy, the saying illuminates a paradox that helps explain his philosophy of history: Tolstoy was a fox, but believed in being a hedgehog. One of Berlin's most celebrated works, this

extraordinary essay offers profound insights about Tolstoy, historical understanding, and human psychology. This new edition features a revised text that supplants all previous versions, English translations of the many passages in foreign languages, a new foreword in which Berlin biographer Michael Ignatieff explains the enduring appeal of Berlin's essay, and a new appendix that provides rich context, including excerpts from reviews and Berlin's letters, as well as a startling new interpretation of Archilochus's epigram.

At first, it looks like a disease. An epidemic that spreads through no known means, driving its victims mad with memories of a life they never lived. But the force that's sweeping

the world is no pathogen. It's just the first shock wave, unleashed by a stunning discovery—and what's in jeopardy is not our minds but the very fabric of time itself. In New York City, Detective Barry Sutton is closing in on the truth—and in a remote laboratory, neuroscientist Helena Smith is unaware that she alone holds the key to this mystery . . . and the tools for fighting back. Together, Barry and Helena will have to confront their enemy—before they, and the world, are trapped in a loop of ever-growing chaos.
