**Media and Democracy in Africa** Michael Leslie, 2017-07-05 Recent discussion of democratization in Africa has focused primarily on the reform of formal state institutions: the public service, the judiciary, and the legislature. Similarly, both scholars and activists have shown interest in how associational life-and with it a civil society-might be enhanced in the countries of the African continent. Much less concern, however, has been directed to the communications media, although they form a vital part of this process. *Media and Democracy in Africa* provides the first comprehensive and up-to-date assessment of the role of the media in political change in sub-Saharan Africa. The central argument of the volume is that while the media may still be relatively weak compared to their positions in liberal democracies, they have come to play a much more important role than ever before since independence. Although they have not yet demonstrated sufficient effectiveness as public watchdogs and agenda setters, they have succeeded in creating new communicative spaces for people who have previously been intimidated or silent. Building on this the contributors argue that a different conceptualization of democratization than the mainstream currently uses may be necessary to capture the process in Africa where it is characterized by contestation rather than consolidation. This volume shows that the media scene in Africa is diverse. It stretches from the well-developed and technologically advanced situation in South Africa to the still fledgling media operations that are typical in sub-Saharan Africa. In these countries, print media as well as television and radio are just beginning to take their place in society and do so using simple and often outdated technology. The volume also examines how these growing outlets are

supplemented by informal media, the so-called radio trottoir, or rumor mill whereby the autocratic and bureaucratic direction of public affairs are subject to private speculation and analysis. Media and Democracy in Africa is organized to provide a historical perspective on the evolution of the African media, placing the present in the context of the past, including both colonial and post-colonial experiences. It will be of interest to Africa area specialists, students of media and communications, political scientists and sociologists.

**Blink** Malcolm Gladwell, 2007-04-03 From the #1 bestselling author of *The Bomber Mafia*, the landmark book that has revolutionized the way we understand leadership and decision making. In his breakthrough bestseller *The Tipping Point*, Malcolm Gladwell redefined how we understand the world around us. Now, in *Blink*, he revolutionizes the way we understand the world within. *Blink* is a book about how we think without thinking, about choices that seem to be made in an instant--in the blink of an eye--that actually aren't as simple as they seem. Why are some people brilliant decision makers, while others are consistently inept? Why do some people follow their instincts and win, while others end up stumbling into error? How do our brains really work--in the office, in the classroom, in the kitchen, and in the bedroom? And why are the

best decisions often those that are impossible to explain to others? In Blink we meet the psychologist who has learned to predict whether a marriage will last, based on a few minutes of observing a couple; the tennis coach who knows when a player will double-fault before the racket even makes contact with the ball; the antiquities experts who recognize a fake at a glance. Here, too, are great failures of blink: the election of Warren Harding; New Coke; and the shooting of Amadou Diallo by police. Blink reveals that great decision makers aren't those who process the most information or spend the most time deliberating, but those who have perfected the art of thin-slicing--filtering the very few factors that matter from an overwhelming number of variables.

**Favela** Janice Perlman,2010-06-10 Janice Perlman wrote the first in-depth account of life in the favelas, a book hailed as one of the most important works in global urban studies in the last 30 years. Now, in *Favela*, Perlman

carries that story forward to the present. Re-interviewing many longtime favela residents whom she had first met in 1969--as well as their children and grandchildren--Perlman offers the only long-term perspective available on the favelados as they struggle for a better life. Perlman discovers that while educational levels have risen, democracy has replaced dictatorship, and material conditions have improved, many residents feel more marginalized than ever. The greatest change is the explosion of drug and arms trade and the high incidence of fatal violence that has resulted. Yet the greatest challenge of all is job creation--decent work for decent pay. If unemployment and under-paid employment are not addressed, she argues, all other efforts will fail to resolve the fundamental issues. Foreign Affairs praises Perlman for writing with compassion, artistry, and intelligence, using stirring personal stories to illustrate larger points substantiated with statistical analysis.
