Rethinking Genre in Contemporary Global Cinema Silvia Dibeltulo, Ciara Barrett, 2018-08-02 Rethinking Genre in Contemporary Global Cinema offers a unique, wide-ranging exploration of the intersection between traditional modes of film production and new, transitional/transnational approaches to film genre and related discourses in a contemporary, global context. This volume's content—the films, genres, and movements explored, as well as methodologies used in their analysis—is diverse and, crucially, up-to-date with contemporary film-making practice and theory. Significantly, the collection extends existing scholarly discourse on film genre beyond its historical bias towards a predominant focus on Hollywood cinema, on the one hand, and a tendency to treat “other” national cinemas in isolation and/or as distinct systems of production, on the other. In view of the ever-increasing globalisation and transnational mediation of film texts and screen media and culture worldwide, the book recognises the need for film genre studies and film genre criticism to cast a broader, indeed global, scope. The collection thus rethinks genre cinema as a transitional, cross-cultural, and increasingly transnational, global paradigm of film-making in diverse contexts.

Notes from the Hyena's Belly Nega Mezlekia, 2015-04-07 In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, Notes from the Hyena's Belly offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

Hollywood Puzzle Films Warren Buckland, 2014-05-30 From *Inception* to *The Lake House*, moviegoers are increasingly flocking to narratologically complex puzzle films. These puzzle movies borrow techniques—like fragmented spatio-temporal reality, time loops, unstable characters with split identities or unreliable narrators—more commonly attributed to art cinema and independent films. The essays in *Hollywood Puzzle Films* examine the appropriation of puzzle film techniques by contemporary Hollywood dramas and blockbusters through questions of narrative, time, and altered realities. Analyzing movies like *Source Code*, *The Butterfly Effect*, *Donnie Darko*, *Déjà Vu*, and adaptations of Philip K. Dick, contributors explore the implications of Hollywood's new movie mind games.

Building Internet Firewalls Elizabeth D. Zwicky, Simon Cooper, D. Brent Chapman, 2000-06-26 In the five years since the first edition of this classic book was published, Internet use has exploded. The commercial world has rushed headlong into doing business on the Web, often without integrating sound security technologies and policies into their products and methods. The security risks--and the need to protect both business and personal data--have never been greater. We've updated *Building Internet Firewalls* to address these newer risks. What kinds of security threats does the Internet pose? Some, like password attacks and the exploiting of known security holes, have been around since the early days of networking. And others, like the distributed denial of service attacks that crippled Yahoo, E-Bay, and other major e-commerce sites in early 2000, are in current headlines. Firewalls, critical components of today's computer networks, effectively protect a system from most Internet security threats. They keep damage on one part of the network--such as eavesdropping, a worm program, or file damage--from spreading to the rest of the network. Without firewalls, network security problems can rage out of control, dragging more and more systems down. Like the bestselling and highly respected first edition, *Building Internet Firewalls*, 2nd Edition, is a practical and detailed step-by-step guide to designing and installing firewalls and configuring Internet services to work with a firewall. Much expanded to include Linux and Windows coverage, the second edition describes: Firewall technologies: packet filtering, proxying, network address translation, virtual private networks Architectures such as screening routers, dual-homed hosts, screened hosts, screened subnets, perimeter networks, internal firewalls Issues involved in a variety of new Internet services and protocols through a firewall Email and News Web services and scripting languages (e.g., HTTP, Java, JavaScript, ActiveX, RealAudio, RealVideo) File transfer and sharing services such as NFS, Samba Remote access services such as Telnet, the BSD *r* commands, SSH, BackOrifice 2000 Real-time conferencing services such as ICQ and talk Naming and directory services (e.g., DNS, NetBT, the Windows Browser) Authentication and auditing services (e.g., PAM, Kerberos, RADIUS); Administrative services (e.g., syslog, SNMP, SMS, RIP and other routing protocols, and ping and other network diagnostics) Intermediary protocols (e.g., RPC, SMB, CORBA, IIOP) Database protocols (e.g., ODBC, JDBC, and protocols for Oracle, Sybase, and Microsoft SQL Server) The book's complete list of resources includes the location of many publicly available firewall construction tools.
