## **Disseminating Behavioral Research** Annette K.

Griffith, Tyler C. Ré, 2023-12-09 Dissemination is a key component of the research process. While several fields have developed resources dedicated to training and supporting their scientists and practitioners as they are encouraged to disseminate within their fields and to the larger public audience, there has been a lack of formal guidance for dissemination within the behavioral sciences. *Disseminating Behavioral Science* aims to fill that gap, providing guidance across modalities for topics ranging from the peer-review process to conference presentation to nontraditional avenues for dissemination. The contents of this edited text, divided across six sections, serves as a roadmap for students, junior researchers, and senior scholars. The first section includes types of academic scholarship, types of dissemination, and strategies to ensure ethical dissemination. The second reviews traditional publication preparation, including tips for the writing process and key components to include in each section of a scientific manuscript. Section Three explores publication within a traditional peer reviewed journal. Section Four outlines additional strategies to get research publicly recognized through conference presentations, social media and popular media sources, and white and grey literature. Sections Five and Six offer a consolidated glossary of all key terms in the text and combined reference list.

*The New York Yankees in Popular Culture* David

Krell, 2019-05-17 How did Reggie Jackson go from superstar to icon? Why did Joe DiMaggio's nickname change from Deadpan Joe to Joltin' Joe? How did Seinfeld affect public perception of George Steinbrenner? The New York Yankees' dominance on the baseball diamond has been lauded, analyzed and chronicled. Yet the team's broader impact on popular culture has been largely overlooked--until now. From Ruth's called shot to the Reggie! candy bar, this collection of new essays offers untold histories, new interpretations and fresh analyses of baseball's most successful franchise. Contributors explore the Yankee mystique in film, television, theater, music and advertising.

Rank Ladies M. Alison Kibler, 2005-10-12 A disrobing acrobat, a female Hamlet, and a tuba-playing labor activist--all these women come to life in *Rank Ladies*. In this comprehensive study of women in vaudeville, Alison Kibler reveals how female performers, patrons, and workers shaped the rise and fall of the most popular live entertainment at the turn of the century. Kibler focuses on the role of gender in struggles over whether high or low culture would reign in vaudeville, examining women's performances and careers in vaudeville, their status in the expanding vaudeville audience, and their activity in the vaudevillians' labor union. Respectable women were a key to vaudeville's success, she says, as entrepreneurs drew women into audiences that had previously been dominated by working-class men and recruited female artists as performers. But although theater managers publicly celebrated the cultural uplift of vaudeville and its popularity among women, in reality their houses were often hostile both to female performers and to female patrons and home to women who challenged conventional understandings of respectable behavior. Once a sign of vaudeville's refinement, Kibler says, women became associated with the decay of vaudeville and were implicated in broader

attacks on mass culture as well.

*The Art of Playing Cards* Rob Beattie, 2018-10-30 The Art of Playing Cards is your tour guide to a standard deck. This handbook covers the classic games, tricks, and skills you'll need to become an expert card shark. There's something about opening a new pack of cards. It doesn't matter whether you buy them at a filling station to while away a few hours on the road or if they're a classic deck of Bicycle cards bought specifically for a poker night—they smell the same. There's the same whiff of possibility, of hands to play or chances to take, of bets to win and of fun just waiting to be had. THE GAMES: There are thousands of games we could have included, but along with some of the most popular, we've also chosen those we think are the most fun, the most challenging, and the most exasperating. Also, much of the beauty of card games is that they vary so much, and we've included plenty of tips for trying something a bit different. Of course, when faced with so many variations and different games, it would be impossible to include them all here; we only hope that you like the ones we have squeezed in. THE SKILLS: Shuffles, cuts, ribbon spreads, fans, flourishes, false cuts, forces, false shuffles, finger lifts, double lifts... they're all here, explained in a simple step-by-step fashion that makes it easy for anyone to pick them up. THE TRICKS: Here we've concentrated on tricks we think are easy and approachable because there are few things more frustrating than trying to do something that's simply out of your league or utterly beyond your physical abilities. Thus, you won't find any magician's glue or funny specialized decks of cards; there are few props, and no fiendishly complex sleights and palms... and there are definitely no cards up anyone's sleeves. We hope the result is a book that you'll be able to come back to again and again, whether it's to brush up on your shuffling or because

you want to learn a new game or a new trick for the holidays. If you do that, then this book has served its purpose. Oh, and always remember, it's not the cards in your hand that count, it's how you play them.

**Neuroeconomics** Paul W. Glimcher, Ernst Fehr, 2013-08-13

In the years since it first published, *Neuroeconomics: Decision Making and the Brain* has become the standard reference and textbook in the burgeoning field of neuroeconomics. The second edition, a nearly complete revision of this landmark book, will set a new standard. This new edition features five sections designed to serve as both classroom-friendly introductions to each of the major subareas in neuroeconomics, and as advanced synopses of all that has been accomplished in the last two decades in this rapidly expanding academic discipline. The first of these sections provides useful introductions to the disciplines of microeconomics, the psychology of judgment and decision, computational neuroscience, and anthropology for scholars and students seeking interdisciplinary breadth. The second section provides an overview of how human and animal preferences are represented in the mammalian nervous systems. Chapters on risk, time preferences, social preferences, emotion, pharmacology, and common neural currencies—each written by leading experts—lay out the foundations of neuroeconomic thought. The third section contains both overview and in-depth chapters on the fundamentals of reinforcement learning, value learning, and value representation. The fourth section, “The Neural Mechanisms for Choice,” integrates what is known about the decision-making architecture into state-of-the-art models of how we make choices. The final section embeds these mechanisms in a larger social context, showing how these mechanisms function during social decision-making in both humans and animals. The book provides a historically rich exposition in each of its chapters and emphasizes both the accomplishments and the controversies in the field. A clear explanatory style and a single expository voice

characterize all chapters, making core issues in economics, psychology, and neuroscience accessible to scholars from all disciplines. The volume is essential reading for anyone interested in neuroeconomics in particular or decision making in general. Editors and contributing authors are among the acknowledged experts and founders in the field, making this the authoritative reference for neuroeconomics Suitable as an advanced undergraduate or graduate textbook as well as a thorough reference for active researchers Introductory chapters on economics, psychology, neuroscience, and anthropology provide students and scholars from any discipline with the keys to understanding this interdisciplinary field Detailed chapters on subjects that include reinforcement learning, risk, inter-temporal choice, drift-diffusion models, game theory, and prospect theory make this an invaluable reference Published in association with the Society for Neuroeconomics—[www.neuroeconomics.org](http://www.neuroeconomics.org) Full-color presentation throughout with numerous carefully selected illustrations to highlight key concepts
