100 Time Savers Robert Plank,2012-12-22 Choose one of these 100 ways to save time and you could save 60 seconds (1 minute) of busy time today. Then you'll save 1 minute tomorrow, 1 minute from the day after and so on. But wait! 60 seconds doesn't seem like a lot of time. How much is 60 seconds really going to add up to? A lot, when you consider there are 365 days in the year. Save an hour a day and you're by yourself an extra 2 weeks at the end of the year and then even if you get to the point where you use every single one of these 100 tips, and I'm not saying that you will use them all out of the get, you'll master one or two and you'll master another couple, master another couple. Save a minute 100 times every day, and you save over an hour and a half every day. Guess how much that is? Not a week, two weeks, or even three weeks, that's 25 days, almost an entire month. 600 hours a year! Time management and productivity expert Robert Plank will break down, in easy to follow, simple to duplicate, step by step instructions on how to: * 10 ways to save time before work * 10 ways to do it after work * 10 office skills to make yourself more productive * 10 ways to make your day job go by faster * 10 ways to use outsourcing to save a minute a day * 10 interruptions you can use to save a minute a day * 10 ways you can learn faster to save a minute a day * 10 ways you can use technology for you instead of against you * 10 ways to manage your email better * and finally 10 long-term habits to save 10 minutes a day 100 Time Savers will show you right away how to reclaim your life, do what makes you happy, and get more out of every single day with a few simple tweaks.

Major sections of this volume include: Historical and Theoretical Foundations Instructor Characteristics and

The Fundamentals of Figure Drawing Barrington Barber,2017-06-13 The ability to draw the human form accurately and competently is a primary goal for many aspiring artists, despite the current trend in the art establishment away from figurative subjects. The book is intended for anyone who wants to discover every aspect of what for centuries was regarded as the real test of an artist's mettle. Renowned teacher and artist Barrington Barber begins his exploration with anatomy, an understanding which is vital if the artist is to handle form and translate what he sees into a believable representation of life. He goes on to look at the whole figure: clothed, drawn from life, in action and in detail. Supported by sections on composition, styles and a step-by-step guide to a final composition, he has once again achieved a brilliantly inspirational art book. Comprehensive, easy to follow and packed with over 300 of Barrington Barber's illustrations, *The Fundamentals of Figure Drawing* is a must for artists of all abilities.

The ASTD E-learning Handbook Allison Rossett,2002 The entire training industry is undergoing dramatic change, as training is moved out of traditional classrooms and onto the Web. Training publications and conferences are now dominated by speakers, writers, and vendors talking about e-Learning. The e-Learning revolution is forcing companies to spend millions on new technology and new web-based courseware, threatening the role of traditional classroom trainers, and saving companies millions of dollars in housing and travel costs because trainees no longer need a plane ticket and 3 nights' accommodation to attend a corporate training program - the training can be delivered to each learner's desktop over the Web. But because e-Learning is still in the revolution stage, there are no clear standards and models for how to create and deliver e-Learning successfully. Everyone is asking the same questions: how does web-based training fit in with traditional classroom based training? What are the standards for designing high-quality e-Learning? How much interaction with an instructor do e-Learning participants need? What is the role of the instructional designer in online learning? The ASTD e-Learning Yearbook will be the first annual refe
