The Future of Identity in the Information Society Kai Rannenberg, Denis Royer, André Deuker, 2009-09-29 Digitising personal information is changing our ways of identifying persons and managing relations. What used to be a natural identity, is now as virtual as a user account at a web portal, an email address, or a mobile phone number. It is subject to diverse forms of identity management in business, administration, and among citizens. Core question and source of conflict is who owns how much identity information of whom and who needs to place trust into which identity information to allow access to resources. This book presents multidisciplinary answers from research, government, and industry. Research from states with different cultures on the identification of citizens and ID cards is combined towards analysis of HighTechIDs and Virtual Identities, considering privacy, mobility, profiling, forensics, and identity related crime. FIDIS has put Europe on the global map as a place for high quality identity management research. -V. Reding, Commissioner, Responsible for Information Society and Media (EU)

Celebrity Protection and Touring Elijah Shaw,Dale June,2018 Introduction to Celebrity Protection and Touring offers a peek behind the scenes of the close protection industry, more commonly known as the bodyguard business. More than the stereotypical “bullet blocker,” the modern protection specialist is a skilled practitioner who utilizes verbal judo much more than its physical counterpart. This book, written by industry experts, Elijah Shaw and Dale June, also narrows the focus, centering in on an exciting, but misunderstood, sector that involves working with celebrities ranging from actors to musicians and entering into their world of touring, filming and promotional appearances. While many may think that celebrity protection is “one size fits all,” nothing could be further from the truth, as you are not only dealing with the protection of the client, but the client’s reputation. All this with the added pressure of the entire world looking over your shoulder, just waiting for a misstep. With real-world advice, tactics and techniques on how to identify and defeat potential attackers, as well as covering everything from dealing with overzealous fans, to hyper-aggressive paparazzi, this book offers proven solutions from two experts that have covered the gambit from the Grammy Awards to the White House.

Proceedings of the Eighth International Symposium on Human Aspects of Information Security & Assurance (HAISA 2014) Nathan Clarke,Steven Furnell,2014 The Human Aspects of Information Security and Assurance (HAISA) symposium specifically addresses information security issues that relate to people. It concerns the methods that inform and guide users' understanding of security, and the technologies that can benefit and support them in achieving protection. This book represents the proceedings from the 2014 event, which was held in Plymouth, UK. A total of 20 reviewed papers are included, spanning a range of topics including the communication of risks to end-users, user-centred security in system development, and technology impacts upon personal privacy. All of the papers were subject to double-blind peer review, with each being reviewed by at least two members of the international programme committee.
