Writing and Publishing a Scientific Research Paper Subhash Chandra Parija,Vikram Kate,2017-07-28 This book covers all essential aspects of writing scientific research articles, presenting eighteen carefully selected titles that offer essential, "must-know" content on how to write high-quality articles. The book also addresses other, rarely discussed areas of scientific writing including dealing with rejected manuscripts, the reviewer's perspective as to what they expect in a scientific article, plagiarism, copyright issues, and ethical standards in publishing scientific papers. Simplicity is the book's hallmark, and it aims to provide an accessible, comprehensive and essential resource for those seeking guidance on how to publish their research work. The importance of publishing research work cannot be overemphasized. Defending Assessment Security in a Digital World Phillip Dawson,2020-10-26 Defending Assessment Security in a Digital World explores the phenomenon of e-cheating and identifies ways to bolster assessment to ensure that it is secured against threats posed by technology. Taking a multi-disciplinary approach, the book develops the concept of assessment security through research from cybersecurity, game studies, artificial intelligence and surveillance studies. Throughout, there is a rigorous examination of the ways people cheat in different contexts, and the effectiveness of different approaches at stopping cheating. This evidence informs the development of standards and metrics for assessment security, and ways that assessment design can help address e-cheating. Its new concept of assessment security both complements and challenges traditional notions of academic integrity. By focusing on proactive, principles-based approaches, the book equips educators, technologists and policymakers to address both current e-cheating as well as future threats.

Thesis Writing for Master's and Ph.D. Program Subhash Chandra Parija,Vikram Kate,2018-11-03 This book on Thesis Writing for Master's and Ph.D. program focuses on the difficulties students encounter with regard to choosing a guide; selecting an appropriate research title considering the available resources; conducting research; and ways to overcome the hardships they face while researching, writing and preparing their dissertation for submission. Thesis writing is an essential skill that medical and other postgraduates are expected to learn during their academic career as a mandatory partial requirement in order to receive the Master's degree. However, at the majority of medical schools, writing a thesis is largely based on self-learning, which adds to the burden on students due to the tremendous amount of time spent learning the writing skills in addition to their exhausting clinical and academic work. Due to the difficulties faced during the early grooming years and lack of adequate guidance, acquiring writing skills continues to be a daunting task for most students. This book addresses these difficulties and deficiencies and provides comprehensive guidance, from selecting the research title to publishing in a scientific journal.

METODOLOGIJA I TEHNOLOGIJA NAUČNOISTRAŽIVAČKOG RADA Ekrem Čolakhodžić,2021-06-15 Knjiga „Metodologija i tehnologija naučnoistraživačkog rada" nastala je kao rezultat dosadašnjeg iskustva i dugogodišnjeg naučnoistraživačkog i nastavnog rada na dodiplomskim, postdiplomskim i doktorskim studijima u Bosni i Hercegovini. Koncipirana je i napisana sa osnovnim ciljem da se široj čitalačkoj publici približe osnove metodologije i tehnologije naučnoistraživačkog rada. S obzirom na to da je metodologija istraživanja veoma složena, multidimenzionalna, ali i dinamična i promjenjiva materija, cilj mi je bio da široj čitalačkoj publici iznesem dosadašnja

saznanja, misli i zapažanja o metodologiji i tehnologiji savremenog naučnoistraživačkog rada. Knjiga je prvenstveno namijenjena studentima dodiplomskih, diplomskih i postdiplomskih studija, mladim istraživačima koji izučavaju metodologiju naučnoistraživačkog rada i koji su zakoračili u neograničeni i beskrajni prostor nauke. Predočena teorijska i praktična znanja, iskustva i misli trebala bi poslužiti čitaocima kao putokaz u koncipiranju i objavljivanju akademskih radova i budućih istraživanja, rješavanju određenih problema, te da im olakšaju prelaženje mukotrpnog puta koji treba da ih dovede do cilja. Sa sigurnošću mogu reći da u ovoj oblasti nema dovoljno napisane literature novijeg datuma, te da starija literatura eminentnih autora ne obuhvata sva područja metodologije i tehnologije naučnoistraživačkog rada. U prva dva poglavlja razmotreni su i kratko pojašnjeni pojmovi nauke, naučnog saznanja, istraživanja i etičnosti u istraživanju, a koji nisu toliko opterećeni materijom filozofskog i logičkog sadržaja, prvenstveno iz razloga što je knjiga zamišljena kao priručnik koji uvodi mlade istraživače u metodologiju i tehnologiju naučnoistraživačkog rada. Na isti način u trećem poglavlju knjige pojašnjen je pojam metodologije, njenog nastanka, razvoja i principa, kao i pojam metoda istraživanja, pojmova koje često neupućeni izjednačavaju mada se radi o različitim ali veoma povezanim i isprepletenim pojmovima. U četvrtom i petom poglavlju ove knjige objašnjene su tehnike prikupljanja podataka i mjerenja, sa posebnim osvrtom na osnove teorije mjerenja, nivoe mjerenja, mjerne skale i mjerne karakteristike mjernih instrumenata. Pošto je ova knjiga prvenstveno namijenjena studentima i/ili mladim istraživačima, u šestom poglavlju prezentovana je tehnologija izrade naučnoistraživačkog rada sa specifičnostima definisanja i pisanja metodološkog okvira u istraživanju i izradi projekta istraživanja. Činjenica da je metodologija naučnoistraživačkog rada nezamisliva bez statističkih analiza, kao i činjenica da je informacijska tehnologija uveliko promijenila obradu dobijenih podataka i tehnologiji naučnoistraživačkog rada dala sasvim novu dimenziju, nagnala me je da učinim dodatni napor i da u sedmom poglavlju knjige ukratko prikažem i objasnim statističke analize koje se koriste za obradu dobijenih podataka i rješavanje problema na univarijantnom i multivarijantnom nivou. Svjesni smo da bez pozgnavanja ovih tehnika nema ni kvalitetnog naučnog istraživanja. Dio knjige koji se odnosi na osmo poglavlje, koje objašnjava pisanje i objavljivanje naučnih i stručnih radova, akademskih radova, kao i citiranja radova i odabir baza podataka, dio je koji je napisan s namjerom da mladim istraživačima i studentima pomognu pri izradi i objavljivanju seminarskog, diplomskog i naučnog rada. U manjoj ili većoj mjeri, koristili smo se teorijom i iskustvima, idejama, podacima drugih eminentnih autora u ovoj oblasti, koji su citirani i navedeni u poglavlju Literatura. Svjestan da ovo djelo predstavlja još jedan pokušaj da se ova složena i dinamična materija približi kroz jedan novi koncept, autor se unaprijed zahvaljuje svima koji su na bilo koji način pomogli da ova knjiga ugleda svjetlo dana, na svim idejama i opravdanim primjedbama i sugestijama, nadajući se da će sljedeće izdanje biti bolje.

Stolen Language? Shelley Angelil-Carter,2014-06-11 Real Language Series General Editors- Jennifer Coates, Jenny Cheshire and Euan Reid This is a sociolinguistic series about the relationships between language, society and social change. Books in the series draw on natural language data from a wide range of social contexts. The series takes a critical approach to the subject, challenging current orthodoxies, and dealing with familiar topics in new ways. The topic of plagiarism is a highly contentious issue and one that is of growing interest and importance in higher education across the world. Stolen Language? Plagiarism in Writing uncovers the reasons why students plagiarize, and explains what can be done about it. It challenges the concepts of original authorship of language, tracing the notion of plagiarism to the introduction of copyright laws in the eighteenth century. The analysis presented in this book explores plagiarism as complex and contested, and suggests that in student academic writing it may be the surface manifestation of learning difficulties related to the educational environment, the nature of academic discourse and the nature of language. Underlying the concept of plagiarism is the premise that meaning is made by the individual, using the system of language at his or her disposal. The words and ideas then belong to the individual who first thought of them, or who first used these words in a particular way. New understandings, that language and cognition are fundamentally social and cultural, contest the idea of 'original thought' or 'original language'. In addition, what constitutes plagiarism differs depending on the genre and context of writing. Stolen Language shows that there is in any good writing an authorial presence, an authorial voice which is particularly difficult for the novice writer to control when constructing an essay based on multiple texts. Written in a unique and accessible way, the book also looks at the particular difficulties experienced by writers of English as an additional language and provides a practical framework for academics and teachers of writing on how to develop authorial voice and critical thinking in the student writer.
