Smartbomb Heather Chaplin, Aaron Ruby, 2006-01-01 Ranges from the hackers at MIT in the 1960s to professional cyberathletes, in an up-close and personal look at the egos, battles, and one-upmanship of the mavericks, geniuses, and geeks behind the videogame revolution. Reprint.

A History of Irish Autobiography Liam Harte, 2018-03-01 A History of Irish Autobiography is the first ever critical survey of autobiographical self-representation in Ireland from its recoverable beginnings to the twenty-first century. The book draws on a wealth of original scholarship by leading experts to provide an authoritative examination of autobiographical writing in the English and Irish languages. Beginning with a comprehensive overview of autobiography theory and criticism in Ireland, the History guides the reader through seventeen centuries of Irish achievement in autobiography, a category that incorporates diverse literary forms, from religious tracts and travelogues to letters, diaries, and online journals. This ambitious book is rich in insight. Chapters are structured around key subgenres, themes, texts, and practitioners, each featuring a guide to recommended further reading. The volume's extensive coverage is complemented by a detailed chronology of Irish autobiography from the fifth century to the contemporary era, the first of its kind to be published.

Modernism and Autobiography Maria DiBattista, Emily O. Wittman, 2014-09-15 This is the first book of its kind to address modernist autobiography in a comprehensive manner.

The Origins of the University Stephen C. Ferruolo, 1985-06 The University of Paris is generally regarded as the first true university, the model for others not only in France but throughout Europe, including Oxford and Cambridge. This book challenges two prevailing myths about the university's origins: first, that the university naturally developed to meet the utilitarian and professional needs of European society in the late Middle Ages, and second, that it was the product of the struggle by scholars to gain freedom and autonomy from external authorities, most notably church officials. In the twelfth century, Paris was the educational center of Europe, with a large number of schools and masters attracting and competing for students. Over the decades, the schools of Paris had many critics--monastic reformers, humanists, satirists, and moralists--and the focus of this book is the role such critics played in developing the schools into a university. Ferruolo argues that it was the educational values and ideas promoted by the critics--ideas of the unity of knowledge, the need to share learning freely and willingly, and the higher purposes and social importance of education--that first inspired the scholars of Paris to join together to form a single guild. Their programs for educational reforms can be seen in the first set of statutes promulgated for the nascent University of Paris in 1215.

The Christianization of the Anglo-Saxons C.597-c.700 Marilyn Dunn, 2010-09-27 Draws on historical, ethnographical and anthropological studies to create a fresh understanding of Christianization in medieval Europe.

Furta Sacra Patrick J. Geary, 2011-06-27 To obtain sacred relics, medieval monks plundered tombs, avaricious merchants raided churches, and relic-mongers scoured the Roman catacombs. In a revised edition of *Furta Sacra*, Patrick Geary considers the social and cultural context for these acts, asking how the relics were perceived and why the thefts met with the approval of medieval Christians.

Mother of the Redeemer Catholic Church, Pope John Paul II, 2012 Commemorate the 25th Anniversary of Pope John Paul II's encyclical *Mother of the Redeemer*. This expanded edition offers a rich commentary and invites us to reflect on the Blessed Virgin Mary as a model of faith. In three sections, readers are guided through Mary's place in the mystery of Christ, the Church, and humanity through her exceptional pilgrimage of faith. Readers are engaged through reflection questions, ideas to ponder, prayers, and actions in a warm and

inviting style.

What Every Conservative Should Know About Communism Lyndon LaRouche, "The Communist Party, U.S.A. is right on one, and perhaps only one, point: the first true, leading communist in the United States was Thomas Jefferson, atheism and all. . . . " 'Communism' . . . is the deployment of anticapitalist rabble, such as the . . . 'environmentalists,' together with doctrines of 'free trade,' to wreck both high-technology capital formation and the essentially 'dirigist' institutions of credit, banking, and protectionism of technologically progressive enterprise which are the essential institutions of a capitalist republic in general, and the American System of Hamilton, the Careys, List, and Abraham Lincoln most emphatically." —from *What Every Conservative Should Know About Communism*

Universities, Academics and the Great Schism R. N. Swanson, 1979-05-03 The election of both Urban VI and Clement VII to the papacy in 1378, by the same body of cardinals, presented the church with an apparently insoluble constitutional difficulty. Dr Swanson examines the reaction to this situation from a hitherto unconsidered perspective: that of the universities to whom Europe turned to formulate the theories which would solve the problem. He examines the attempts by the academics to gain support for their various schemes and shows how these produced conflict at various levels: locally, between factions within individual universities; nationally, between rival universities, and between universities and their ecclesiastical and secular superiors; and internationally, as the universities adopted mutually exclusive attitudes and sometimes clashed with their own popes. The concluding chapters show how the academics finally devised the conciliarist formula which led to the convocation of the Council of Pisa in 1409.

Strange Beauty Cynthia Jean Hahn, 2012 A study of reliquaries as a form of representation in medieval art. Explores how reliquaries stage the importance and meaning of relics using a wide range of artistic means from material and ornament to metaphor and symbolism--Provided by publisher.

So You Wish To Learn All About Economics? Lyndon H. LaRouche, Jr., 2015-09-02 Down with Adam Smith! Away with the foolish professors who claim economics is the dismal science, chained to a calculus of scarce resources! The only economics worth knowing is the science of increasing mankind's power over nature at increasing rates, in accordance with natural law as expressed in the Book of Genesis. LaRouche puts economics back where it belongs, so that every citizen can master for himself the fundamental principles that made the United States an industrial and agricultural superpower--from the advanced standpoint required to run a 21st-century fusion-power economy. The present Second Great Depression is completely unnecessary. There is no need for the 1931-style financial collapse that faces the Trans-Atlantic region today. The rapidly developing nations of the world are using the ideas in this book to create, spread and share a prosperous future. Should the United States decide to join them in applying the ideas in this book, the future of civilization will be of unlimited potential.

The Music Industry Patrik Wikström, 2013-04-25 The music industry is going through a period of immense change brought about in part by the digital revolution. What is the role of music in the age of computers and the internet? How has the music industry been transformed by the economic and technological upheavals of recent years, and how is it likely to change in the future? This is the first major study of the music industry in the new millennium. Wikström provides an international overview of the music industry and its future prospects in the world of global entertainment. They illuminate the workings of the music industry, and capture the dynamics at work in the production of musical culture between the transnational media conglomerates, the independent music companies and the public. *The Music Industry* will become a standard work on the music industry at the beginning of the 21st century. It will be of great interest to students and scholars of media

and communication studies, cultural studies, popular music, sociology and economics. It will also be of great value to professionals in the music industry, policy makers, and to anyone interested in the future of music.

We've Got Blog Editors Of Perseus Publishing, 2009-04-29 Instantaneous and raw, unedited and uncensored, Weblogs are self-publishing at its best and its worst--occasionally brilliant but often pretentious, sometimes shocking but always fascinating. We've Got Blog is the first book to explore this phenomenon, which has been quickly rising from obscure Webpages to national attention in the Wall Street Journal and USA Today. Weblogs are free, searchable journals of opinions and links updated daily by an individual or a group and they have become some of the hottest Websites. We've Got Blog has pulled together some of the best writing explaining their history, the mavericks who created them, and how they are changing the way we use the Internet.

Blogging America Aaron Barlow, 2007-11-30 As blogs have evolved over the last few years, they have begun to take on distinct characteristics depending on audience and purpose. Though political blogs remain the most high profile (and most read), other types of blogs are gaining in strength and visibility. This book—a follow-up volume to Barlow's *Rise of the Blogosphere*, which examined the historical context for the modern blog—provides an examination of the many current aspects of the blogosphere, from the political to the professional to the personal, with many stops in between. Given that millions of blogs have been created over the past five years and yet more come online at an undiminished rate, and given that enthusiasm for both reading them and writing them has yet to wane, it is likely that the blog explosion will continue indefinitely. Inside the Music Industry Michael Fink, 1996 This book is a solid introduction to the music industry for students with no prior experience, offering a comprehensive overview of the people, technologies, and law that impact on all aspects of the music business. *Inside the Music Industry* focuses primarily on popular/rock music and how it is created, marketed, recorded, and packaged, as well as the various media in which music plays apart, from radio to video, television, print, and film. The second edition has been thoroughly updated to take into account new developments over the last five years, including digital recording and broadcasting technology, changes in the copyright laws, and legal issues raised by new technologies, such as the controversy over sampling existing recordings. Throughout the text, new examples, photographs, and charts have been added to enhance the timeliness of the work.

Design And Development Of A Wiki-based Collaborative Process Writing Pedagogy: Putting Technological, Pedagogical, And Content Knowledge (Tpack) In Action

Xuanxi Li, 2022-01-05 This book provides an example of the capitalization of computer and wiki technology to support collaborative writing among Mainland Chinese upper primary school students. It presents the results of a study showing the application of the Design-Based Research (DBR) methodology to design a Wiki-based Collaborative Process Writing Pedagogy (WCPWP) to help students with their writing in the Chinese context. The WCPWP is designed and developed based on social constructivist theory and the social view of writing process theory, as well as in consideration of the Technological, Pedagogical, and Content Knowledge (TPACK) framework. Primarily aimed at researchers and practitioners in the fields of collaborative learning, TPACK, and Chinese writing, as well as Chinese language educators, this book will also deepen primary educators' understanding of the links among technology, pedagogy and content, and guide educators in the integration of social media, as well as the design of effective matching pedagogic strategies, in their teaching of writing.

The Future of Music David Kusek, Gerd Leonhard, 2005 From the Music Research Institute at Berklee College of Music comes a manifesto for the ongoing music revolution. Today the record companies may be hurting, but the music making business is booming, using non-traditional digital methods and distribution models. This book explains why we got where we are and where we are heading. Kusek and Leonhard foresee the disappearance of CDs and record stores as we know them in the next decade. For the iPod, downloading market, this book will explain new ways of discovering music, new ways of acquiring it and how technology trends will make music flow like water, benefiting the people who love music and make music.
