Twenty Years After the Iowa Gambling Task: Rationality, Emotion, and Decision-Making Jong-Tsun Huang, Yao-Chu Chiu, Ching-Hung Lin, Jeng-Ren Duann, 2018-08-21 The world is full of uncertainty. In unpredictable circumstances, can emotions facilitate advantageous decision-making? A neuroscience team, led by Antonio Damasio, explored this question using the Iowa Gambling Task (IGT). To the present day, the findings of numerous IGT-related investigations strongly influence clinical and interdisciplinary research, for example, in neuroeconomics and neuromarketing. This special issue examines IGT-based research progress over the past 20 years through literature reviews, clinical examinations, model construction, theoretical integration, and brain imaging technology. Both supportive and opposing viewpoints are provided to frame correlations between rationality, emotion, decision-making, and IGT. Potential future directions for IGT studies are discussed

Engaging Virtual Environments Joanne Ricevuto, Laura McLaughlin, 2023-07-03 In a classroom setting interaction among students is the norm. How do you replicate that informality, spontaneity, and focus online? This book provides you with a framework to think about the different kinds of engagement you want to foster -- whether participation, collaboration, or quick feedback -- and then introduces you to available online tools, some of which may be in your LMS, offers practical tips, and guides you to how make the most of commonly available technologies to achieve your goals. Within the context and progression of a course -- from developing a welcome page, presenting yourself and the purpose of your course, to icebreakers, assignments, and alternative forms of assessment -- the authors introduce you to a range of easy-

to-use online tools that they have introduced to the faculty and teachers in their classes, and that foster active learning and student engagement. In doing so they provide a checklist that you can also access and print from the Web, to help you review additional tools from the wide and ever-growing range of tools that are available online and determine whether they are appropriate for what you want to accomplish. This book will help you connect with students, whether you're teaching synchronously or asynchronously, regardless of the devices students may be using; develop community; and introduce you to gamification to add enjoyment and variety to your students' experience of your class. Recognizing that using new tools with confidence requires practice, the authors offer ideas for implementing them in private online spaces. Each chapter concludes with reflection questions that can be addressed individually by the reader or within a learning community to encourage faculty to work together and support each other in virtual teaching and learning. This book addresses the challenge of embracing new models of course offerings to students in the evolving landscape of virtual learning.
