*Dog Zen* Mark Vette,2017-09-18 World-renowned dog behaviourist and psychologist Mark Vette (of Driving Dogs and Flying Dogs fame) shows you how to transform your dog and create a harmonious life-long bond. This book looks at how the dog evolved from the wolf, and the ancient co-evolved bond that exists between humans and dogs, before explaining how to get your dog into a fundamental calm 'learning state' so you can encourage the behaviours you want from your pet. Mark then explains how to train your new puppy, and if you have an older dog that wasn't trained properly at that crucial early stage, how to correct each of the top ten behavioural problems that occur. Drawing from Mark's own life and experiences there are case studies throughout with beautiful photographs of these amazing animals. The top ten problems are: 1. Hyperactivity 2. Phobias 3. Excessive submission 4. Dog-to-dog aggression 5. Dog-to-human aggression 6. Barking 7. Separation distress 8. House training 9. Destructive behaviours 10. Recall This book is absolutely packed with information. It is a comprehensive practical guide combining the latest cognitive science with modern, loving, training techniques.

Mark's first book Dog Zen had just 40 pages on puppies - this book goes into full detail about all ages and stages, and how to do the right thing at the right time. Following a quick look at the role of pups within the wolf pack, and how dogs evolved from wolves, this book gives a day-by-day, week-by-week guide to the fundamentals of training your puppy and building a happy lifelong bond between the two of you. Mark stresses the importance of the formative period (1-4 months) to instill good habits in your puppy, then shows you exactly how to do so and when to teach each skill. Includes chapters on choosing a puppy, forming a bond with your pup, training foundations (equipment and techniques), basic commands (like sit, heel and stay), what to train in which weeks of age, house training, socialisation, teaching them not to bite or indulge in continual barking, jumping up or other anti-social behaviours. It is a detailed and practical guide combining the latest cognitive science with modern, loving, training techniques. **Zen Heart** Mark Vette, 2020-11-03 A cheeky baboon, a cockatoo sending a heading dog out to round up sheep, a family of pukekos crossing the road, a dog saying 'bugger', an octopus taking a photo. Think of an ad you love, or a New Zealand-made movie, and if it has an animal in it chances are Mark Vette was behind it. He's trained almost every species you can think of. But the famous animal behaviourist and trainer who captured global attention with 'Dogs Who Drive Cars' and 'Dogs Who Fly Planes' is not just an animal maestro. He's a long-time Buddhist, who brings to his relationships with animals a true emotional bond, enormous respect, and the sure knowledge that we humans are just one piece of this great, interconnected puzzle we call Life on Earth. This is his story, and the stories of the animals he has worked with over the decades. From a classic Kiwi childhood of outdoor activities and sport, with plenty of time on the farm, through a growing conviction that killing animals wasn't for him, to his embracing of Buddhism and his developing work with animals of all kinds, Mark's life and beliefs unfold in a thoroughly relatable way - with jaw-dropping and laugh-out-loud moments thrown in.

**Virtual Identities and Digital Culture** Victoria Kannen, Aaron Langille, 2023-02-28 *Virtual Identities and Digital Culture* investigates how our online identities and cultures are embedded within the digital practices of our lives, exploring how we form community, how we play, and how we re-imagine traditional media in a digital world. The collection explores a wide range of digital topics - from dating apps, microcelebrity, and hackers to auditory experiences, Netflix algorithms, and live theatre online - and builds on existing work in digital culture and identity by bringing new voices, contemporary examples, and highlighting platforms that are emerging in the field. The book speaks to the modern reality of how our digital lives have been forever altered by our transnational experiences - one of those key experiences is the pandemic, but so too is systemic inequality, questions of digital

privacy, and the role of joy in our online lives. A vital contribution at a time of significant social and cultural flux, this book will be highly relevant to those studying digital culture within media, communication, cultural studies, digital humanities, and sociology departments.

101 Rescue Puppies Kathy Callahan, 2020-09-29 Over the past decade, Kathy Callahan's family has taken in more than a hundred rescue puppies. This delightful photo-filled book features the wonderful stories that emerged as these foster pups were suddenly surrounded by a nurturing family complete with patient adult dogs and curious cats. With a gift for capturing the moment in both words and images, Callahan brings readers inside the poignant and ultimately uplifting work of fostering. This inspiring read is indeed about puppies, but it's also about family and human connection. It's about finding your own way — through that one special thing you can do to light a candle, instead of cursing the darkness.

*Handbook of Research on the Impact of Fandom in Society and Consumerism* Wang, Cheng Lu, 2019-10-25 Fans of specific sports teams, television series, and video games, to name a few, often create subcultures in which to discuss and celebrate their loyalty and enthusiasm for a particular object or person. Due to their strong emotional attachments, members of these fandoms are often quick to voluntarily invest their time, money, and energy into a related product or brand, thereby creating a group of faithful and passionate consumers that play a significant role in multiple domains of contemporary culture. The *Handbook of Research on the Impact of Fandom in Society and Consumerism* is an essential reference source that examines the cultural and economic effects of the fandom phenomenon through a multidisciplinary lens and shapes an understanding of the impact of fandom on brand building. Featuring coverage on a wide range of topics such as religiosity, cosplay, and event marketing, this publication is ideally designed for marketers, managers, advertisers, brand managers, consumer behavior analysts, product developers, psychologists, entertainment managers, event coordinators, political scientists, anthropologists, academicians, researchers, and students seeking current studies on the global impact of this particularly devoted community.

*Young People and Social Media: Contemporary Children's Digital Culture* Steve Gennaro, Blair Miller, 2021-10-05 'Young People and Social Media: Contemporary Children's Digital Culture' explores the practices, relationships, consequences, benefits, and outcomes of children's experiences with, on, and through social media by bringing together a vast array of different ideas about childhood, youth, and young people's lives. These ideas are drawn from scholars working in a variety of disciplines, and rather than just describing the social construction of childhood or an understanding of children's lives, this collection seeks to encapsulate not only how young people exist on social media but also how their physical lives are impacted by their presence on social media. One of the aims of this volume in exploring youth interaction with social media is to unpack the structuring of digital technologies in terms of how young people access the technology to use it as a means of communication, a platform for identification, and a tool for participation in their larger social world. During longstanding and continued experience in the broad field of youth and digital culture, we have come to realize that not only is the subject matter increasing in importance at an immeasurable rate, but the amount of textbooks and/or edited collections has lagged behind considerably. There is a lack of sources that fully encapsulate the canon of texts for the discipline or the rich diversity and complexity of overlapping subject areas that create the fertile ground for studying young people's lives and culture. The editors hope that this text will occupy some of that void and act as a catalyst for future interdisciplinary collections. 'Young People and Social Media: Contemporary Children's Digital Culture' will appeal to undergraduate students studying Child and Youth Studies and—given the interdisciplinary nature of the collection— scholars, researchers and students at all levels working in anthropology, psychology, sociology, communication studies, cultural studies, media studies, education, and human rights, among others. Practitioners in these fields will also find this collection of particular interest.

*Performing Beauty in Participatory Art and Culture* Falk Heinrich, 2014-03-21 This book investigates the notion of beauty in participatory art, an interdisciplinary form that necessitates the audience's agential participation and that is often seen in interactive art and technology-driven media

installations. After considering established theories of beauty, for example, Plato, Alison, Hume, Kant, Gadamer and Santayana through to McMahon and Sartwell, Heinrich argues that the experience of beauty in participatory art demands a revised notion of beauty; a conception that accounts for the performative and ludic turn within various art forms and which is, in a broader sense, a notion of beauty suited to a participatory and technology-saturated culture. Through case studies of participatory art, he provides an art-theoretical approach to the concept of performative beauty; an approach that is then applied to the wider context of media and design artefacts.

Envisioning Robots in Society – Power, Politics, and Public Space M. Coeckelbergh, J. Loh, M. Funk, 2018-11-30 Robots are predicted to play a role in many aspects of our lives in the future, affecting work, personal relationships, education, business, law, medicine and the arts. As they become increasingly intelligent, autonomous, and communicative, they will be able to function in ever more complex physical and social surroundings, transforming the practices, organizations, and societies in which they are embedded. This book presents the proceedings of the Robophilosophy 2018 conference, held in Vienna, Austria, from 14 to 17 February 2018. The third event in the Robophilosophy Conference Series, the conference was entitled Envisioning Robots in Society – Politics, Power, and Public Space. It focused on the societal, economic, and political issues related to social robotics. The book is divided into two parts and an Epilogue. Part I, entitled Keynotes, contains abstracts of the keynotes and two longer papers. Part II is divided into 7 subject sections containing 37 papers. Subjects covered include robots in public spaces; politics and law; work and business; military robotics; and policy. The book provides an overview of the questions, answers, and approaches that are currently at the heart of both academic and public discussions.
