Transmission Electron Microscopy C. Barry Carter, David B. Williams, 2016-08-24 This text is a companion volume to *Transmission Electron Microscopy: A Textbook for Materials Science* by Williams and Carter. The aim is to extend the discussion of certain topics that are either rapidly changing at this time or that would benefit from more detailed discussion than space allowed in the primary text. World-renowned researchers have contributed chapters in their area of expertise, and the editors have carefully prepared these chapters to provide a uniform tone and treatment for this exciting material. The book features an unparalleled collection of color figures showcasing the quality and variety of chemical data that can be obtained from today's instruments, as well as key pitfalls to avoid. As with the previous TEM text, each chapter contains two sets of questions, one for self assessment and a second more suitable for homework assignments. Throughout the book, the style follows that of Williams & Carter even when the subject matter becomes challenging—the aim is always to make the topic understandable by first-year graduate students and others who are working in the field of Materials Science. Topics covered include sources, in-situ experiments, electron diffraction, Digital Micrograph, waves and holography, focal-series reconstruction and direct methods, STEM and tomography, energy-filtered TEM (EFTEM) imaging, and spectrum imaging. The range and depth of material makes this companion volume essential reading for the budding microscopist and a key reference for practicing researchers using these and related techniques.

Multimedia Data Mining and Knowledge Discovery Valery A. Petrushin, Latifur Khan, 2007-10-20 This volume provides an overview of multimedia data mining and knowledge discovery and discusses the variety of hot topics in multimedia data mining research. It describes the objectives and current tendencies in multimedia data mining research and their applications. Each part contains an overview of its chapters and leads the reader with a structured approach through the diverse subjects in the field.

Zebrafish Protocols for Neurobehavioral Research Allan V. Kalueff, Adam Michael Stewart, 2012-06-06 Zebrafish (*Danio rerio*) play an integral role in biomedical research, enabling researchers to examine physiological mechanisms and pathways relevant to human pathogenesis and its therapy. That, along with their low cost, easy manipulation, short reproductive cycles, and physiological homology to humans, has made zebrafish a vital model organism for neuroscience research. *Zebrafish Protocols for Neurobehavioral Research* addresses protocols for both larval and adult models, written by the leading experts in the field of zebrafish research. Part I of this book takes advantage of the high-throughput nature of larval models to offer protocols for research requiring high output, easily manipulated screens. The second half of the book focuses on the robust and sophisticated behaviors of adult zebrafish, suitable for the neurophenotyping of complex traits and multi-domain disorders. Importantly, these models complement each other, working together to provide researchers with valuable insights into neurobiology of normal and pathological behavior. Thorough and cutting-edge, this volume is a useful, authoritative reference guide that should hold a coveted spot in zebrafish laboratories across the globe.

Circular Economy and Fly Ash Management Sadhan Kumar Ghosh, Vimal Kumar, 2019-10-25 This book presents a number of innovative uses of fly ash. Fly ash is a fine powder that is a byproduct of burning pulverized coal in thermal power plants. It is a pozzolan – a substance containing aluminous and siliceous material that when mixed with lime and water forms a compound similar to Portland cement. Though fly ash was a problem in terms of its disposal, it now has a variety of uses, such as a prime material in blocks, bricks, and PCC paving, and further applications are being investigated. As such, the recovery and reuse of fly ash wastes plays an important role in the implementation of the circular economy concept. Featuring selected, high-quality research papers presented at IconSWM 2018, the book provides valuable insights for the recycling industries, power plants, researchers, and governments.

Multimedia Data Mining Zhongfei Zhang, Ruofei Zhang, 2008-12-02 Collecting the latest developments in the field, *Multimedia Data Mining: A Systematic Introduction to Concepts and Theory* defines multimedia data mining, its theory, and its applications. Two of the most active researchers in multimedia data mining explore how this young area has rapidly developed in recent years. The book first discusses the theoretical foundations of multimedia data mining, presenting commonly used feature representation, knowledge representation, statistical learning, and soft computing techniques. It then provides application examples that showcase the great potential of multimedia data mining technologies. In this part, the authors show how to develop a semantic repository training method and a concept discovery method in an imagery database. They demonstrate how knowledge discovery helps achieve the goal of imagery annotation. The authors also describe an effective solution to large-scale video search, along with an application of audio data classification and categorization. This novel, self-contained book examines how the merging of multimedia and data mining research can promote the understanding and advance the development of knowledge discovery in multimedia data.

Molecular Neuroanatomy Fred W. Leeuwen, 1988 For a thorough study of the dynamics of particular brain compounds it is now possible to use and combine various molecular neuroanatomical methods (e.g. in situ hybridization, receptor localisation and immunocytochemistry) in a quantitative way on whole brain sections maintaining morphological details. *Molecular Neuroanatomy* deals with the many practical aspects and recent developments in these areas. The theoretical background of many techniques is presented, as well as clear, step-by-step instructions on the preparation and application of all the methods and techniques described in this book. It will be invaluable to all those working in the field of neuroscience. Available in both hardback and paperback, with colour illustrations.

Introductory Readings in Ancient Greek and Roman Philosophy Patrick Lee Miller, C. D. C. Reeve, 2015-03-15 This concise anthology of primary sources designed for use in an ancient philosophy survey ranges from the Presocratics to Plato, Aristotle, the Hellenistic philosophers, and the Neoplatonists. The Second Edition features an amplified selection of Presocratic fragments in newly revised translations by Richard D. McKirahan. Also included is an expansion of the Hellenistic unit, featuring new selections from Lucretius and Sextus Empiricus as well as a new translation, by Peter J. Anderson, of most of Seneca's *De Providentia*. The selections from Plotinus have also been expanded.

Hearing Impairment and Disability Ariel Tenenbaum, Joav Merrick, Mohd N. Zakaria, 2020 Much research has been conducted to provide researchers and hearing healthcare professionals with updated information in regard to hearing assessments, results interpretation and case management. This ongoing research is particularly imperative to guide clinicians with optimized methods in assessing and managing pediatric patients with hearing impairment and disability. As such, tremendous research efforts have been made in determining the most optimum methods in assessing hearing using both subjective and objective tests. Since hearing loss can occur due to disrupted peripheral and/or central auditory pathway, there is also a growing interest to study children with auditory processing disorder (APD). Even though notable achievements have been observed in understanding APD, more research is required, particularly in establishing a gold standard APD test and its specific interventions. Additionally, having an objective test such as speech-evoked auditory brainstem response is beneficial to understand how speech sounds are encoded within the brainstem region in hearing-impaired children, as well as in those with compromised neural function. In this book, we have gathered research from Malaysia and India in this field and hope it will be of interest to our readers--

Handbook of Video Databases Borko Furht, Oge Marques, 2003-09-30 Technology has spurred the growth of huge image and video libraries, many growing into the hundreds of terabytes. As a result there is a great demand among organizations for the design of databases that can effectively support the storage, search, retrieval, and transmission of video data. Engineers and researchers in the field demand a comprehensi

Understanding Nonlinear Dynamics Daniel Kaplan, Leon Glass, 2012-12-06 Mathematics is playing an ever more important role in the physical and biological sciences, provoking a blurring of boundaries between scientific disciplines and a resurgence of interest in the modern as well as the classical techniques of applied mathematics. This renewal of interest, both in research and teaching, has led to the establishment of the series: *Texts in Applied Mathematics (TAM)*. The development of new courses is a natural consequence of a high level of excitement on the research frontier as newer techniques, such as numerical and symbolic computer systems, dynamical systems, and chaos, mix with and reinforce the traditional methods of applied mathematics. Thus, the purpose of this textbook series is to meet the current and future needs of these advances and encourage the teaching of new courses. TAM will publish textbooks suitable for use in advanced undergraduate and beginning graduate courses, and will complement the *Applied Mathematical Sciences (AMS)* series, which will focus on advanced textbooks and research level monographs. About the Authors Daniel Kaplan specializes in the analysis of data using techniques motivated by nonlinear dynamics. His primary interest is in the

interpretation of irregular physiological rhythms, but the methods he has developed have been used in geo physics, economics, marine ecology, and other fields. He joined McGill in 1991, after receiving his Ph.D from Harvard University and working at MIT. His undergraduate studies were completed at Swarthmore College. He has worked with several instrumentation companies to develop novel types of medical monitors.

Adobe PageMaker 6.5 ,1997 Classroom in a Book: Adobe PageMaker 6.5 is a cross-platform, self-paced training guide to all the power and features of the top-rated DTP software. In a matter of hours, users can fully comprehend the complexities of the software by doing rather than reading. The CD contains the art files, text files, fonts, and training materials needed to complete the tutorial lessons.

Handbook on Measurement, Assessment, and Evaluation in Higher Education Charles Secolsky,D. Brian Denison,2017-07-31 In this valuable resource, well-known scholars present a detailed understanding of contemporary theories and practices in the fields of measurement, assessment, and evaluation, with guidance on how to apply these ideas for the benefit of students and institutions. Bringing together terminology, analytical perspectives, and methodological advances, this second edition facilitates informed decision-making while connecting the latest thinking in these methodological areas with actual practice in higher education. This research handbook provides higher education administrators, student affairs personnel, institutional researchers, and faculty with an integrated volume of theory, method, and application.

Assessing Language Through Computer Technology Carol A. Chapelle,Dan Douglas,2006-04-20 Publisher description
Sensory Biology of Aquatic Animals Jelle 1987,Richard R. Fay,William N. Tavalga,2012-12-06 This volume constitutes a series of invited chapters based on presentations given at an International Conference on the Sensory Biology of Aquatic Animals held June 24-28, 1985 at the Mote Marine Laboratory in Sarasota, Florida. The immediate purpose of the conference was to spark an exchange of ideas, concepts, and techniques among investigators concerned with the different sensory modalities employed by a wide variety of animal species in extracting information from the aquatic environment. By necessity, most investigators of sensory biology are specialists in one sensory system: different stimulus modalities require different methods of stimulus control and, generally, different animal models. Yet, it is clear that all sensory systems have principles in common, such as stimulus filtering by peripheral structures, tuning of receptor cells, signal-to-noise ratios, adaption and disadaptation, and effective dynamic range. Other features, such as hormonal and efferent neural control, circadian reorganization, and receptor recycling are known in some and not in other senses. The conference afforded an increased awareness of new discoveries in other sensory systems that has effectively inspired a fresh look by the various participants at their own area of specialization to see whether or not similar principles apply. This inspiration was found not only in theoretical issues, but equally in techniques and methods of approach. The myopy of sensory specialization was broken in one unexpected way by showing limitations of individual sense organs and their integration within each organism. For instance, studying vision, one generally chooses a visual animal as a model.

Terms of Surrender Lorrie Farrelly,2010-08-11 The War Between the States not only destroyed all Michael Cantrell loved, it left the young, former Confederate cavalry officer without faith or hope, a solitary, haunted man trying to escape his demons in the vast western frontier. Then, one spring day along the Wind River, he finds himself suddenly in the thick of another life-and-death struggle -- Annie Devlin's war. Desperate to hang on to her ranch and her life, waylaid by gunmen hired by a powerful rancher who covets her land, Annie and her young brother, Robbie, fight a furious, rapidly losing battle for their lives. When all seems lost, into the fray steps a cold-eyed, steel-nerved stranger -- Michael Cantrell -- who saves Annie and Robbie, but is himself grievously wounded. With Annie's care, Michael recovers not only his strength but a portion of his embittered soul as well. Fighting his powerful feelings for her, convinced he has nothing to give, Michael determines to stay with the Devlins only long enough to ensure their safety against the treachery that would destroy them. Reluctantly, Michael, who for years has known only loss, allies himself with a stubborn, courageous young woman who will take his heart by storm and test the limit of his honor, his mettle -- and his passion. A finalist for the prestigious Orange Rose Award, *Terms of Surrender* takes the reader on a stirring adventure that is also a heartfelt, emotional journey.
