Introduction to Francophone African Literature Olusola Oke, Sam Ade Ojo, 2000 The first title of a new African literature series, this is a lively, accomplished collection of essays about modern African literature in French. It aims to address the need - of both the anglophone African and the non-African reader - for literary criticism of francophone literature in English, and thus bridge a prevailing, prohibitive language and cultural barrier. The collection covers a comprehensive range of genres - from the epic tradition and oral literature, to poetry and the modern novel. Its contributors are all specialists in French literature and African literature in French, and include for example the prominent Nigerian critic of feminist literature and feminism, Adule Adebayo. Subjects include: negritude poetry as a process of protest, revolt and reconciliation; the biographies and autobiographical novels of women writers and their comparative late arrival on the literary scene; and perspectives on the debate surrounding the tradition and status of the African novel.

Real-Time Shading Marc Olano, John Hart, Wolfgang Heidrich, Michael McCool, 2002-06-26 This book covers real-time shading systems, their design and how they work. Procedural shading, long valued for off-line rendering and production animation is now possible on interactive graphics hardware. These developments are important for areas such as game development, product design, and scientific visualization, among others. The authors include examples of techniques for achieving common effects efficiently in a real-time shading language ranging from full procedural shading on advanced specialized hardware to limited, yet surprisingly flexible shading on unextended OpenGL, to modern PC graphics accelerators.

Synthetic Actors Nadia Magnenat Thalmann, Daniel Thalmann, 2012-12-06 This book presents the making of computer-generated films using three-dimensional synthetic actors. It is based mainly on the production of the film *Rendez-vous a Montreal*, an animated film that uses advanced computer techniques to achieve such effects as reincarnating film stars Humphrey Bogart and Marilyn Monroe. The main purpose of *Rendez-vous a Montreal* is to show that true synthetic actors can be created. This film represents a technological breakthrough which opens up new vistas in motion pictures, television, and advertising. With this technique, it will now be possible to produce short films or motion pictures featuring any celebrity in any situation. The book explains in detail how such a film can be produced using numerous drawings and color pictures. In particular, the following topics are presented: - Preparation of object construction: documentation search, and plaster models preparation - Object construction: digitizing and modeling - Body animation - Hand animation and object grasping - Facial animation: expressions, phonemes and emotions - Choreography: decors, actors, cameras, and lights - Realism: colors, lights, shading, shadows, and textures - Image recording: special effects Finally, an extensive appendix describes in detail the HUMAN FACTORY system.

Guidelines for Bias-free Writing Marilyn Schwartz, 1995 Katz (English, North Carolina State U.) examines the correlation between Reader Response Criticism and the philosophy of science engendered by the Copenhagen School of New Physics, and assesses the scientific empiricism that controls the parameters of reading and writing theory to look at the possibility of teaching reading and writing as rhetorical music. He reinterprets Cicero's rhetorical theory in light of recent revisionist scholarship, and sketches a temporal model of affective response in reading and writing.
