*Professional Visual C++ 5 ActiveX/COM Control Programming* Sing Li,Panos Economopoulos,1997 A book written by programmers, Professional Visual C++ ActiveX Intranet Programming is a guide to creating custom ActiveX components to allow an Intranet to publish non-standard data in a customized format, using controls that allow presentation of and interaction with that data in a completely custom way. The book is for experienced Visual C++ programmers who have used MFC in some depth.

**Web Developer's Guide to Visual J++ & ActiveX** Trevor Harmon,1996 Do you choose the simplicity of Java or the power of ActiveX? Why decide at all? With Visual J++, you can harness the strength of both technologies! Web Developer's Guide to Visual J++ & ActiveX shows you how to integrate ActiveX controls with Java applets, give your code direct access to hardware, and bring the world of ActiveX to your doorstep.

**Microsoft Windows Media Player for Windows XP Handbook** Seth McEvoy,2001 Delivered direct from Microsoft's Windows Media product team, this comprehensive handbook shows how to use the new capabilities in Windows Media Player for Windows XP to tune into streaming media, burn CDs (no plug-in required!), find and play back content from the Web, watch DVDs, and more--everywhere a PC, laptop, or pocket device goes.

**Microsoft Windows Media Player 7 Handbook** Seth McEvoy,2000 With this comprehensive handbook, readers get one-stop information on how to use new Media Player capabilities and quickly create their own digital music, video and art. CD-ROM is packed with tools to help them do everything from ripping tracks from favorite CDs onto their PCs to animating the user interface and porting digital media to a Pocket PC player.

**Designing Interfaces** Jenifer Tidwell,2005-11-21 Provides information on designing easy-to-use interfaces.

**Digital Content Creation** Rae Earnshaw,John Vince,2012-12-06 The very word digital has acquired a status that far exceeds its humble dictionary definition. Even the prefix digital, when associated with familiar sectors such as radio, television, photography and telecommunications, has reinvented these industries, and provided a unique opportunity to refresh them with new start-up companies, equipment, personnel, training and working practices - all of which are vital to modern national and international economies. The last century was a period in which new media stimulated new job opportunities, and in many cases created totally new sectors: video competed with film, CDs transformed LPs, and computer graphics threatened traditional graphic design sectors. Today, even the need for a physical medium is in question. The virtual digital domain allows the capture, processing, transmission, storage, retrieval and display of text, images, audio and animation without familiar materials such as paper, celluloid, magnetic tape and plastic. But moving from these media to the digital domain introduces all sorts of problems, such as the conversion of analog archives, multimedia databases, content-based retrieval and the design of new content that exploits the benefits offered by digital systems. It is this issue of digital content creation that we address in this book. Authors from around the world were invited to comment on different aspects of digital content creation, and their contributions form the 23 chapters of this volume.

*About Face 3* Alan Cooper,Robert Reimann,David Cronin,2007 Aimed at software developers, this book proposes the creation of a new profession of software design. The examples in the text are updated to reflect new platforms along with additional case studies where appropriate.

Frontiers of Human-Centered Computing, Online Communities and Virtual Environments Rae Earnshaw,2001-02-26 This volume presents the results of a joint National Science Foundation and European Commission Workshop which was set up to identify the future key strategic research directions in the areas of human-centred interaction, online communities and virtual environments.

*Software Quality - ECSQ 2002* Jyrki Kontio,Reidar Conradi,2003-08-01 Software professionals and companies live in a new world today. Increasingly complex systems need to be built faster and cheaper. While many of the established approaches in software quality are still valid, the software quality community is going through a paradigm shift that requires a re-assessment of our current method and tool portfolio, as well as creating new and more effective solutions. We have selected two themes for this conference to highlight this paradigm shift. Our first theme, "production of attractive and reliable software at Internet speed" sums up the dilemma many software organisations face. In order to be competitive, software should contain advanced features and run reliably – yet it should be developed quickly and cost effectively for the right market window. Finding the right balance between these objectives is a critical question that will determine business success in the years to come. Our second theme, "production of software with a dynamic partnership network" highlights the current trend of using partnerships and subcontractors as integral players in the software development process. Partnerships sometimes need to be created quickly to respond to a market opportunity, yet the costs and speed of cooperation must be competitive. Different companies have different processes, quality tools and cultures, yet they should cooperate seamlessly for the best result.

*About Face* Alan Cooper,Robert Reimann,David Cronin,Christopher Noessel,2014-09-02 The essential interaction design guide, fully revised and updated for the mobile age About Face: The Essentials of Interaction Design, Fourth Edition is the latest update to the book that shaped and evolved the landscape of interaction design. This comprehensive guide takes the worldwide shift to smartphones and tablets into account. New

information includes discussions on mobile apps, touch interfaces, screen size considerations, and more. The new full-color interior and unique layout better illustrate modern design concepts. The interaction design profession is blooming with the success of design-intensive companies, priming customers to expect design as a critical ingredient of marketplace success. Consumers have little tolerance for websites, apps, and devices that don't live up to their expectations, and the responding shift in business philosophy has become widespread. About Face is the book that brought interaction design out of the research labs and into the everyday lexicon, and the updated Fourth Edition continues to lead the way with ideas and methods relevant to today's design practitioners and developers. Updated information includes: Contemporary interface, interaction, and product design methods Design for mobile platforms and consumer electronics State-of-the-art interface recommendations and up-to-date examples Updated Goal-Directed Design methodology Designers and developers looking to remain relevant through the current shift in consumer technology habits will find About Face to be a comprehensive, essential resource.

**Semiotics and Visual Communication** Evripides Zantides,2014-04-11 This book is the result of selective research papers that were presented at the First International Conference on Semiotics and Visual Communication at the Cyprus University of Technology in November 2011. The conference was structured around the theme from theory to practice, and brought together researchers and practitioners who study and evaluate the ways that semiotic theories can be analysed, perceived and applied in the context of various forms in visual communication. Within a semiotic framework, the book explores research questions under five main thematic areas: Architectural, Spatial Design-Design for Three-Dimensional Products; Design for Print Applications; Design for Screen-Based Media; Pedagogy of Visual Communication; and Visual Arts. This volume will be an asset for people who have an interest in semiotics, not only from a theoretical and historical perspective, but also from an applied point of view, looking at how semiotic theory can be implemented into educational research, design and visual communication practice. The book provides 25 essential contributions that demonstrate how the concepts and theories of semiotics can be creatively adapted within the interdisciplinary nature of visual communication.

**eCulture** Alfredo M. Ronchi,2009-03-10 Do virtual museums really provide added value to end-users, or do they just contribute to the abundance of images? Does the World Wide Web save endangered cultural heritage, or does it foster a society with less variety? These and other related questions are raised and answered in this book, the result of a long path across the digital heritage landscape. It provides a comprehensive view on issues and achievements in digital collections and cultural content.

**Microsoft Windows User Experience** ,1999 It also includes information about supporting international users and users with disabilities.--BOOK JACKET.

**Mobile Cartography** Tumasch Reichenbacher,2004 It established new concepts for mobile cartography and showed the differences, but also the similarities towards traditional cartography and web cartography. The main focus is on the elaboration of adaptive methods for visualisation of geographic information for mobile usage, i.e. on mobile devices. Adaptation takes place in the components such as the mobile user, his/her activities with associated goals, as well as the situation they are placed in. The usage scenarios described were helpful for the implementation of a rudimentary, prototypical adaptive geovisualisation service for mobile users. The service for the example of point symbol maps was implemented based on open-standard formats and served as a proof of concept. It basically demonstrates how a mobile client can send as Simple Object Access Protocol (SOAP) encoded context parameters to a web service
