  Detection and Identification of Rare Audio-visual Cues Daphna Weinshall,Jörn Anemüller,Luc van Gool,2011-10-16 Machine learning builds models of the world using training data from the application domain and prior knowledge about the problem. The models are later applied to future data in order to estimate the current state of the world. An implied assumption is that the future is stochastically similar to the past. The approach fails when the system encounters situations that are not anticipated from the past experience. In contrast, successful natural organisms identify new unanticipated stimuli and situations and frequently generate appropriate responses. The observation described above lead to the initiation of the DIRAC EC project in 2006. In 2010 a workshop was held, aimed to bring together researchers and students from different disciplines in order to present and discuss new approaches for identifying and reacting to unexpected events in information-rich environments. This book includes a summary of the achievements of the DIRAC project in chapter 1, and a collection of the papers presented in this workshop in the remaining parts.

Teaching Reading Across the Day, Grades K-8 Jennifer Serravallo,2024-04-12 Reading well across disciplines and within varied contexts will help students to be versatile, flexible, deep readers who can better learn from their reading, transfer skills across subjects, and use strategies to meet the unique demands of reading in each content area. – Jennifer Serravallo Research-based, easy-to-use lesson structures for explicit and engaging teaching In Teaching Reading Across the Day, literacy expert Jennifer Serravallo provides nine effective, predictable, research-based lesson structures that help busy teachers save planning time and focus their teaching—and student attention—on content rather than procedures. Each of the nine lesson structures (read aloud, phonics and spelling, vocabulary, focus, shared reading, close reading, guided inquiry, reader's theater, and conversation) has its own chapter and features a wealth of resources that let you see the lessons in action in ELA, Science, and Social Studies classes, including: An annotated teaching vignette, lesson explanation, and research notes Tips for planning, structure and timing suggestions, and ideas for responsive teaching Detailed planning templates and 22 accompanying online videos covering over 3 hours of classroom footage Jen's

reflections, key look-fors, and ideas for next steps The nine lesson structures can be used with any curriculum or core program, text, and subject, making it easier for teachers to maximize explicit and engaging teaching time across the day, and simplify planning and preparation. Jen incorporates a wide range of compelling research about how best to teach reading to every student in your class and translates the research (or the science of teaching reading) into high-leverage moves you can count on to deliver powerful lessons again and again. She also honors the art of teaching reading, helping teachers tap into their experience and hone their expertise to make quick, effective classroom decisions that take student learning to the next level.

Spelling K-8 Diane Snowball,Faye Bolton,1999 Spelling K-8 meets the needs of schools and districts that want to put systematic teaching in place without compromising the principles of constructivist learning. Recognizing the professional expertise of classroom teachers, the authors consistently urge teachers to consider the suggested plan in

relation to their children's spelling needs. Children are actively engaged in spelling explorations, being guided by their teachers, forming generalizations that reflect their current understanding about how written English works. Specific suggestions are also offered for children whose first language is not English. Spelling K-8 addresses the issues that administrators and parents are concerned about - especially phonics and learning high-frequency words - and offers teachers a wealth of strategies and resources to draw on. Spelling K-8 assists teachers in:understanding current beliefs about teaching and learning and means of translating these into classroom practice;implementing specific types of spelling investigations, such as sounds, spelling patterns or suffixes, by clearly outlining the general process involved in spelling explorations;identifying the possible spelling focuses for children in each grade level, taking into consideration their needs and the explorations they have been introduced to in previous years;relating the teaching of spelling to reading and writing experiences in a variety of curriculum areas;knowing the generalizations children need to learn to enable them to understand how written English works. Spelling K-8 will help you plan the teaching of spelling at a whole-school level and at each grade level.

The Demonstration Society Claude Rosental,2021-10-12 Today, as in the past, public demonstrations are not only tools to prove, persuade, and promote, but also fundamental forms of social interaction and exchange. YouTube demos of makeup products by famous influencers, demonstrations of strength during street protests, demonstrations of military might in North Korea: public demonstrations are omnipresent in social life. Yet they are often perceived as isolated events, unworthy of systematic examination. In The Demonstration Society, Claude

Rosental explores the underlying dynamics of what he calls a "demonstration society." He shows how, both in today's world and historically, public demonstrations constitute not only tools to prove, persuade, and promote, but fundamental forms of interaction and exchange, and, in some cases, attempts to lead the world. Rosental compares demos with other forms of public demonstrations, drawing out both their peculiarities and common features. He analyzes the processes through which demonstrations are conceived and carried out, as well as the skills of their producers. He also compares contemporary demos with historical demonstrations including theaters of machines in the Renaissance, public demonstrations of natural philosophy in the seventeenth century, and demonstrations of the magic lantern in the nineteenth century. Above and beyond the entertainment they sometimes provide, demonstrations are experienced as intense moments that broadly involve alliances, material and symbolic goods, and, more generally, the future of individuals and collectives. Rosental elucidates the many ways in which we live today, as in the past, in a society of demonstration.
