Understanding the Interactive Digital Media Marketplace: Frameworks, Platforms, Communities and Issues Sharma, Ravi S.,2011-10-31 Increasingly, multimedia content—from music, movies, games, news, books, and digital art to sharable educational material, e-government services, and e-health services—is delivered over broadband networks. With technological advances, cloud computing applications, and social networking approaches, many exciting applications are emerging to deliver this content as Interactive Digital Media (IDM). Understanding the Interactive Digital Media Marketplace: Frameworks, Platforms, Communities and Issues presents the results of a large, industry-oriented, multi-national research program. This research seeks to discover usable business models, technology platforms, market strategies and policy frameworks for the emerging global digital economy, particularly for digital media researchers and industry entrepreneurs who wish to reach users around the world.

Machine Learning and Big Data Analytics (Proceedings of International Conference on Machine Learning and Big Data Analytics (ICMLBDA) 2021) Rajiv Misra,Rudrapatna K. Shyamasundar,Amrita Chaturvedi,Rana Omer,2021-09-29 This edited volume on machine learning and big data analytics (Proceedings of ICMLBDA 2021) is intended to be used as a reference book for researchers and practitioners in the disciplines of computer science, electronics and telecommunication, information science, and electrical engineering. Machine learning and Big data analytics represent a key ingredients in the industrial applications for new products and services. Big data analytics applies machine learning for predictions by examining large and varied data sets—i.e., big data—to uncover hidden patterns, unknown correlations, market trends, customer preferences, and other useful information that can help organizations make more informed business decisions.

An Introduction to Text Mining Gabe Ignatow,Rada Mihalcea,2017-09-22 This is the ideal introduction for students seeking to collect and analyze textual data from online sources. It covers the most critical issues that they must take into consideration at all stages of their research projects.

Encyclopedia of Criminal Activities and the Deep Web Khosrow-Pour D.B.A., Mehdi,2020-02-01 As society continues to rely heavily on technological tools for facilitating business, e-commerce, banking, and communication, among other applications, there has been a significant rise in criminals seeking to exploit these tools for their nefarious gain. Countries all over the world are seeing substantial increases in identity theft and cyberattacks, as well as illicit transactions, including drug trafficking and human trafficking, being made through the dark web internet. Sex offenders and murderers explore unconventional methods of finding and contacting their victims through Facebook, Instagram, popular dating sites, etc., while pedophiles rely on these channels to obtain information and photographs of children, which are shared on hidden community sites. As criminals continue to harness technological advancements that are outpacing legal and ethical standards, law enforcement and government officials are faced with the challenge of devising new and alternative strategies to identify and apprehend criminals to preserve the safety of society. The Encyclopedia of Criminal Activities and the Deep Web is a three-volume set that includes comprehensive articles covering multidisciplinary research and expert insights provided by hundreds of leading researchers from 30 countries including the United States, the United Kingdom, Australia, New Zealand, Germany, Finland, South Korea, Malaysia, and more. This comprehensive encyclopedia provides the most diverse findings and new methodologies for monitoring and regulating the use of online tools as well as hidden areas of the internet, including the deep and dark web. Highlighting a wide range of topics such as cyberbullying, online hate speech, and hacktivism, this book will offer strategies for the prediction and prevention of online criminal activity and examine methods for safeguarding internet users and their data from being tracked or stalked. Due to the techniques and extensive knowledge discussed in this publication it is an invaluable addition for academic and corporate libraries as well as a critical resource for policy makers, law enforcement officials, forensic scientists, criminologists, sociologists, victim advocates, cybersecurity analysts, lawmakers, government officials, industry professionals, academicians, researchers, and students within this field of study.

Combating Fake News with Computational Intelligence Techniques Mohamed Lahby,Al-Sakib Khan Pathan,Yassine Maleh,Wael Mohamed Shaher Yafooz,2021-12-15 This book presents the latest cutting-edge research, theoretical methods, and novel applications in the field of computational intelligence techniques and methods for combating fake news. Fake news is everywhere. Despite the efforts of major social network players such as Facebook and Twitter to fight disinformation, miracle cures and conspiracy theories continue to rain down on the net. Artificial intelligence can be a bulwark against the diversity of fake news on the Internet and social networks. This book discusses new models, practical solutions, and technological advances related to detecting and analyzing fake news based on computational intelligence models and techniques, to help decision-makers, managers, professionals, and researchers design new paradigms considering the unique opportunities associated with computational intelligence techniques. Further, the book helps readers understand computational intelligence techniques combating fake news in a systematic and straightforward way.

Visual Methodologies Gillian Rose, 2011-11-09 If you need to carry out research into visuals then Rose's book provides straight forward practical assistance for how to do so... She explains clearly how we can deal with the visual from diverse approaches such as content analysis, semiotics, psychoanalysis and discourse analysis, all explained carefully, using examples, in terms of the stages of a research project. - David Machin, Cardiff University The authoritative introductory text on the methods of visual research. Conveying the richness and excitement of visual culture research, Rose expertly navigates across a range of methodologies, explaining in detail their particular usefulness and limitations through practical examples. - Julie Doyle, University of Brighton A welcome overview of the state of the field. Visual Methodologies succeeds both as an introductory text, certain to be widely adopted in the classroom, and as a sophisticated refresher course for those who have followed the rapid maturation of this remarkable interdisciplinary discourse - Martin Jay, University of California, Berkeley With over 25,000 copies sold worldwide, Gillian Rose's book is the bestselling critical introduction to the study and analysis of visual culture. Each chapter provides a rigorous examination and demonstration of an individual methodology, with case studies, colour images, suggested further reading and visual examples throughout. Reflecting changes in the way society consumes and creates its visual content, the updated Third Edition includes: A companion website featuring additional examples of digital media, social media, and moving images. Visit www.sagepub.co.uk/rose An additional chapter and expanded coverage on social and new media, and more information on the mass media in general (TV, print and broadcasting) An expanded focus on how each method can be used in relation to a range of different visual materials A new chapter on how to use visual materials for research and the presentation of research findings. A now classic text, the book will be used by undergraduates, postgraduates, researchers and academics looking to understand and clearly grasp the complex debates and ideas in visual analysis and interpretation.

Revisiting the Yorkshire Ripper Murders Louise Wattis, 2018-12-28 Between 1975 and 1980, Peter Sutcliffe, who became known as the Yorkshire Ripper, murdered 13 women in the North of England. The murders provoked widespread fear amongst women and impacted the public consciousness at both the local and national level. This book revisits the case, applying a feminist and cultural criminological lens to explore a range of criminological concerns relating to gender, violence and victimhood. Combining research findings from oral history interviews, analysis of popular criminological texts and academic commentary, this volume explores what the case can tell us about feminism, fear of crime, gender and serial murder and the representation of victims and sex workers. The volume contributes to a creative cultural criminology, highlighting how excavating recent criminal history and reading across texts presents new ways for understanding violence, gender and representation in the contemporary context.

Methodologies For The Conception, Design And Application Of Soft Computing - Proceedings Of The 5th International Conference On Soft Computing And Information/Intelligent Systems (In 2 Volumes) Gen Matsumoto, Takeshi Yamakawa, 1998-08-25 Soft computing is the common name for a certain form of natural information processing that has its original form in biology, especially in the function of human brain. It is a discipline rooted in a group of technologies such as fuzzy logic, neural networks, chaos, genetic algorithms, probabilistic reasoning and learning algorithms. Today, soft computing has become an acknowledged concept; however, for a long time, such components of soft computing have been debated and individually developed. Since its beginning in 1990, the series of IIZUKA conferences has covered various kinds of technologies that constitute soft computing. This series has played a pioneering role in promoting the development of a symbiotic relationship between the various technologies of soft computing. At IIZUKA'98, the 5th International Conference on Soft Computing and Information/Intelligent Systems, new developments and results in this field were introduced and discussed by researchers from academic, governmental and industrial institutions around the world. This volume presents the opening lecture by Prof. Walter J Freeman, the keynote speech by Dr Gen Matsumoto, the plenary lectures by 5 eminent researchers and about 230 carefully selected papers drawn from more than 25 countries. It documents current research and in-depth studies on the fundamental aspects of soft computing and their practical applications.

Interpretable Machine Learning Christoph Molnar, 2020 This book is about making machine learning models and their decisions interpretable. After exploring the concepts of interpretability, you will learn about simple, interpretable models such as decision trees, decision rules and linear regression. Later chapters focus on general model-agnostic methods for interpreting black box models like feature importance and accumulated local effects and explaining individual predictions with Shapley values and LIME. All interpretation methods are explained in depth and discussed critically. How do they work under the hood? What are their strengths and weaknesses? How can their outputs be interpreted? This book will enable you to select and correctly apply the interpretation method that is most suitable for your machine learning project.

The Web Server Handbook Pete Palmer, Adam Schneider, Anne Chenette, 1996 Even if others abandon you, you must never abandon yourself. This simple truth became Terry Helwig's lifeline as she was forced to grow up too soon. Terry grew up the oldest of six girls in the big-sky country of the American Southwest, where she attended twelve schools in eleven years. Helwig's stepfather Davy, a good-hearted and loving man, proudly purchased a mobile home to enable his family to move more easily from one oil town to another, where Davy eked out a living in the oil fields. Terry's mother, Carola Jean, a wild rose whose love often pierced those who tried to claim her, had little interest in the confines of home and motherhood. In Davy's absence, she sought companionship in local watering holes—a pastime she dubbed “visiting Timbuktu.” She repeatedly left Terry in charge of the household and her five younger sisters. Despite Carola Jean's genuine attempts to “better herself,” her life spiraled ever downward as Terry struggled to keep the family whole. In the midst of transience and upheaval, Terry and her sisters forged an uncommon bond of sisterhood that withstood the erosion of Davy and Carola Jean's marriage. But ultimately, to keep her own dreams alive, Terry had to decide when to hold on to what she loved and when to let go. Unflinching in its portrayal, yet told with humor and compassion, Terry Helwig's luminous memoir, *Moonlight on Linoleum*, explores a family's inner and outer landscapes of hope, despair, and redemption. It will make you laugh, cry, and hunger for more.

Cyberpunk and Visual Culture Graham Murphy, Lars Schmeink, 2017-10-24 Within the expansive mediascape of the 1980s and 1990s, cyberpunk's aesthetics took firm root, relying heavily on visual motifs for its near-future splendor saturated in media technologies, both real and fictitious. As today's realities look increasingly like the futures forecast in science fiction, cyberpunk speaks to our contemporary moment and as a cultural formation dominates our 21st century techno-digital landscapes. The 15 essays gathered in this volume engage the social and cultural changes that define and address the visual language and aesthetic repertoire of cyberpunk – from cybernetic organisms to light, energy, and data flows, from video screens to cityscapes, from the vibrant energy of today's video games to the visual hues of comic book panels, and more. *Cyberpunk and Visual Culture* provides critical analysis, close readings, and aesthetic interpretations of exactly those visual elements that define cyberpunk today, moving beyond the limitations of merely printed text to also focus on the meaningfulness of images, forms, and compositions that are the heart and lifeblood of cyberpunk graphic novels, films, television shows, and video games.

Visual Interface Design for Digital Cultural Heritage Professor Milena Radzikowska, Professor Stan Ruecker, Professor Stéfan Sinclair, 2012-10-01 Browsing for information is a significant part of most research activity, but many online collections hamper browsing with interfaces that are variants on a search box. Research shows that rich-prospect interfaces can offer an intuitive and highly flexible alternative environment for information browsing, assisting hypothesis formation and pattern-finding. This unique book offers a clear discussion of this form of interface design, including a theoretical basis for why it is important, and examples of how it can be done. It will be of interest to those working in the fields of library and information science, human-computer interaction, visual communication design, and the digital humanities as well as those interested in new theories and practices for designing web interfaces for library collections, digitized cultural heritage materials, and other types of digital collections.

Diverse Voices in Chinese Translation and Interpreting Riccardo Moratto, Martin Woesler, 2021-02-02 This book presents a thoughtful and thorough account of diverse studies on Chinese translation and interpreting (TI). It introduces readers to a plurality of scholarly voices focusing on different aspects of Chinese TI from an interdisciplinary and international perspective. The book brings together eighteen essays by scholars at different stages of their careers with different relationships to translation and interpreting studies. Readers will approach Chinese TI studies from different standpoints, namely socio-historical, literary, policy-related, interpreting, and contemporary translation practice. Given its focus, the book benefits researchers and students who are interested in a global scholarly approach to Chinese TI. The book offers a unique window on topical issues in Chinese TI theory and practice. It is hoped that this book encourages a multilateral, dynamic, and international approach in a scholarly discussion

where, more often than not, approaches tend to get dichotomized. This book aims at bringing together international leading scholars with the same passion, that is delving into the theoretical and practical aspects of Chinese TI.

Computer Vision and Recognition Systems Chiranji Lal Chowdhary,G. Thippa Reddy,B. D. Parameshachari,2022-03-10 This cutting-edge volume focuses on how artificial intelligence can be used to give computers the ability to imitate human sight. With contributions from researchers in diverse countries, including Thailand, Spain, Japan, Turkey, Australia, and India, the book explains the essential modules that are necessary for comprehending artificial intelligence experiences to provide machines with the power of vision. The volume also presents innovative research developments, applications, and current trends in the field. The chapters cover such topics as visual quality improvement, Parkinson’s disease diagnosis, hypertensive retinopathy detection through retinal fundus, big image data processing, N-grams for image classification, medical brain images, chatbot applications, credit score improvisation, vision-based vehicle lane detection, damaged vehicle parts recognition, partial image encryption of medical images, and image synthesis. The chapter authors show different approaches to computer vision, image processing, and frameworks for machine learning to build automated and stable applications. Deep learning is included for making immersive application-based systems, pattern recognition, and biometric systems. The book also considers efficiency and comparison at various levels of using algorithms for real-time applications, processes, and analysis.
