The 71F Advantage National Defense University

Press, 2010-09 Includes a foreword by Major General David A. Rubenstein. From the editor: 71F, or 71 Foxtrot, is the AOC (area of concentration) code assigned by the U.S. Army to the specialty of Research Psychology. Qualifying as an Army research psychologist requires, first of all, a Ph.D. from a research (not clinical) intensive graduate psychology program. Due to their advanced education, research psychologists receive a direct commission as Army officers in the Medical Service Corps at the rank of captain. In terms of numbers, the 71F AOC is a small one, with only 25 to 30 officers serving in any given year. However, the 71F impact is much bigger than this small cadre suggests. Army research psychologists apply their extensive training and expertise in the science of psychology and social behavior toward understanding, preserving, and enhancing the health, well being, morale, and performance of Soldiers and military families. As is clear throughout the pages of this book, they do this in many ways and in many areas, but always with a scientific approach. This is the 71F advantage: applying the science of psychology to understand the human dimension, and developing programs, policies, and products to benefit the person in military operations. This book grew out of the April 2008 biennial conference of U.S. Army Research Psychologists, held in Bethesda, Maryland. This meeting was to be my last as Consultant to the Surgeon General for Research Psychology, and I thought it would be a good idea to publish proceedings, which had not been done before. As Consultant, I'd often wished for such a document to help explain to people what it is that Army Research Psychologists do for a living. In addition to our core group of 71Fs, at the Bethesda 2008 meeting we had several brand-new members, and a number of distinguished retirees, the grey-beards of the 71F clan. Together with longtime 71F colleagues Ross Pastel and Mark Vaitkus, I also saw an unusual opportunity to capture some of the history of

the Army Research Psychology specialty while providing a representative sample of current 71F research and activities. It seemed to us especially important to do this at a time when the operational demands on the Army and the total force were reaching unprecedented levels, with no sign of easing, and with the Army in turn relying more heavily on research psychology to inform its programs for protecting the health, well being, and performance of Soldiers and their families.

Political Economy in Haiti Simon M. Fass, 2020-02-13 This important study introduces the conceptual premise that families, like firms, analyze their circumstances, make decisions, and pursue courses of action on the basis of what they perceive to be the most efficient methods for producing and reproducing survival. Combining this premise with an extraordinary assemblage of facts gleaned over the period of a decade from the streets, markets and homes of Port-au-Prince, the author weaves a tapestry of despair and hope which only an unusual degree of intimacy with the details of everyday life in the city could provide. The result is a considerable deepening of understanding about the politics and economics by which family members earn their livelihoods, distribute resources within and between households, produce life and labor from food and water, provide shelter and schooling for themselves, and borrow money to finance these and other activities. These different dimensions of daily existence form a web of interdependency in which change in any one dimension causes change in all the others. As Professor Pass's work demonstrates, research and development assistance practices of public and private organizations, in such areas as employment, health, housing, education and credit are often irrelevant. This is because they are necessarily guided by prevailing concepts and theories with respect to the circumstances of the urban poor, which sometimes do the poor considerable disservice. With the additional insight provided by a decade of participation in the design of policies, programs and projects serving as a tempering influence, the author does not leap to easy criticism of prevailing views and practices. He notes

that ideas and interventions change in response to new understanding, sometimes in ways that the producers of such understanding could never have imagined. The problem is that change is painfully slow, and in desperately poor countries like Haiti, waiting for change exacts an almost intolerable price from the poor. This book is a provocative yet highly original contribution which will require serious attention from scholars and practitioners of development. Appearing as it does soon after the great seaward exodus of Haitians and urban unrest culminating in the flight of the Duvalier family, this timely volume will provide illumination for those seeking to understand the circumstances that press people to risk all in the name of survival.

Innovative Business Practices Alkis Thrassou, Demetris Vrontis, 2013-07-16 This second decade of the millennium finds the world changing at a once unimaginable pace. Businesses, tangled in the interwoven threads of galloping globalization, technological advances, cultural diversity, economic recession and deep-rooted human social evolution, struggle to keep up with incessant changes; consequently and inexorably experiencing severe difficulties and disorientation. Executives, much bewildered, habitually turn to conventional, time-honoured strategies and practices, which increasingly fail to offer the much-sought answers and means to survival, competitiveness and growth. We are currently experiencing a business era of turbulence and dynamic change – an era that inherently rejects conventionality and orthodox business theory to reward businesses embracing agility, reflex-style adaptability, innovation and creativity. This turbulence is, however, not a parenthesis or even a pattern, but the new reality in which each business must reinvent and redefine itself. This is a new reality of stakeholders that shift focus from the external to the internal, from the tangible to the intangible, and from fact to perception. This book presents research and paradigms that transcend classical theory

in order to examine how business practice is positively affected by these conditions. Across a multitude of sectors and organisational types, scholars of different business specialisations set the theoretical foundations of contemporary thinking and present their practical implementations.

Healing the Symptoms Known As Autism Kerri

Rivera,2014-01-23 In the seven months since the release of the first edition of this book, 22 more children have lost their autism diagnosis and returned to a state of health, for a total of 115 recovered children and counting. Hundreds more have lost ATEC points, as well as shown many cognitive, behavioral, emotional and physical gains thanks to the protocol outlined in these pages.

This edition includes all protocol updates and a whole lot more including: (1) how to heal older, self-injurious and/or aggressive children; (2) GcMAF and its role in healing autism; (3) gluten's role in molecular mimicry and autoimmunity; (4) a new method of CD preparation; (5) an improved and easier to follow parasite protocol; along with (6) a special calendar so you know what to do when; (7) many new testimonials from parents sharing their real-life experiences using this protocol; and much more... Dietrich Klinghardt MD, PhD, says... The world of autism is rocking again. Kerri Rivera has done it. In this comprehensive book she has condensed and simplified the core elements of the biomedical approach, those that work 90% of the time on 90% of the children. Her focus on using a unified and affordable approach to reduce the body burden of chronic infections and infestations is addressing the very core issue of most autistic children and adults. It has made her method the most powerful tool to this day to help many children recover safely, inexpensively and solidly. Her research is validated by the enormously positive response from parents from all over the world. Teri Arranga, Executive director of AutismOne, says... In 3 years, 115 children previously diagnosed with regressive autism were able to shed their diagnosis, their symptoms and return to an overall state of health and vitality. If you have any interest in finding out how they were able to heal you need to read this book. Kerri has a heart for children with autism, and she cares greatly about recommending safe, economical interventions that are helping to confront an epidemic.

Woodswoman Anne Labastille, 1991-10-11 Ecologist Anne LaBastille created the life that many people dream about. When she and her husband divorced, she needed a place to live. Through luck and perseverance, she found the ideal spot: a 20-acre parcel of land in the Adirondack mountains, where she built the cozy, primitive log cabin that became her permanent home. Miles from the nearest town, LaBastille had to depend on her wits, ingenuity, and the help of generous neighbors for her survival. In precise, poetic language, she chronicles her adventures on Black Bear Lake, capturing the power of the landscape, the rhythms of the changing seasons, and the beauty of nature's many creatures. Most of all, she captures the struggle to balance her need for companionship and love with her desire for independence and solitude. Woodswoman is not simply a book about living in the wilderness, it is a book about living that

contains a lesson for us all.
