  Competencias digitales para mayores Jóse Baldomero Martínez,2022-11-11 La competencia digital está enmarcada dentro de la alfabetización digital. Este último concepto se refiere a la habilidad del usuario para encontrar, evaluar, componer y almacenar información a través del uso de los medios digitales. La Unión Europea, a través de diversas resoluciones, ha alentado a la alfabetización digital de los ciudadanos de la Unión. Es por ello por lo que se hace necesario que las personas que puedan estar en riesgo de exclusión laboral y social debido a su falta de conocimientos informáticos básicos adquieran las

competencias necesarias para adecuarse a las
exigencias que requiere el mercado laboral y la
sociedad actual. Con la finalidad de dar respuesta
a estas demandas este manual introduce al lector,
de forma clara y didáctica, en los siguientes
temáticas: Conceptos básicos informáticos.
Configuración básica del sistema operativo.
Tratamiento de la información: navegación y usos
de internet. Ofimática: Word, Excel, Access.
Comunicación: chats, redes sociales. Seguridad

conocimientos resueltos para que el lector pueda
evaluar los conocimientos adquiridos.

   The H.264 Advanced Video Compression Standard
Iain E. Richardson,2011-08-24 H.264 Advanced Video
Coding or MPEG-4 Part 10 is fundamental to a
growing range of markets such as high definition
broadcasting, internet video sharing, mobile video
and digital surveillance. This book reflects the
growing importance and implementation of H.264
video technology. Offering a detailed overview of
the system, it explains the syntax, tools and
features of H.264 and equips readers with
practical advice on how to get the most out of the
standard. Packed with clear examples and
illustrations to explain H.264 technology in an
accessible and practical way. Covers basic video
coding concepts, video formats and visual quality.
Explains how to measure and optimise the
performance of H.264 and how to balance bitrate,
computation and video quality. Analyses recent
work on scalable and multi-view versions of H.264,
case studies of H.264 codecs and new technological
developments such as the popular High Profile

extensions. An invaluable companion for developers, broadcasters, system integrators, academics and students who want to master this burgeoning state-of-the-art technology. [This book] unravels the mysteries behind the latest H.264 standard and delves deeper into each of the operations in the codec. The reader can implement (simulate, design, evaluate, optimize) the codec with all profiles and levels. The book ends with extensions and directions (such as SVC and MVC) for further research. Professor K. R. Rao, The University of Texas at Arlington, co-inventor of the Discrete Cosine Transform

  Frontiers of Multimedia Research Shih-Fu Chang,2018-01-03 The field of multimedia is unique in offering a rich and dynamic forum for researchers from "traditional" fields to collaborate and develop new solutions and knowledge that transcend the boundaries of individual disciplines. Despite the prolific research activities and outcomes, however, few efforts have been made to develop books that serve as an introduction to the rich spectrum of topics covered by this broad field. A few books are available that either focus on specific subfields or basic background in multimedia. Tutorial-style materials covering the active topics being pursued by the leading researchers at frontiers of the field are currently lacking. In 2015, ACM SIGMM, the special interest group on multimedia, launched a new initiative to address this void by selecting and inviting 12 rising-star speakers from different subfields of multimedia research to deliver plenary tutorial-style talks at the ACM

Multimedia conference for 2015. Each speaker discussed the challenges and state-of-the-art developments of their prospective research areas in a general manner to the broad community. The covered topics were comprehensive, including multimedia content understanding, multimodal human-human and human-computer interaction, multimedia social media, and multimedia system architecture and deployment. Following the very positive responses to these talks, the speakers were invited to expand the content covered in their talks into chapters that can be used as reference material for researchers, students, and practitioners. Each chapter discusses the problems, technical challenges, state-of-the-art approaches and performances, open issues, and promising direction for future work. Collectively, the chapters provide an excellent sampling of major topics addressed by the community as a whole. This book, capturing some of the outcomes of such efforts, is well positioned to fill the aforementioned needs in providing tutorial-style reference materials for frontier topics in multimedia. At the same time, the speed and sophistication required of data processing have grown. In addition to simple queries, complex algorithms like machine learning and graph analysis are becoming common. And in addition to batch processing, streaming analysis of real-time data is required to let organizations take timely action. Future computing platforms will need to not only scale out traditional workloads, but support these new applications too. This book, a revised version of the 2014 ACM Dissertation Award

winning dissertation, proposes an architecture for cluster computing systems that can tackle emerging data processing workloads at scale. Whereas early cluster computing systems, like MapReduce, handled batch processing, our architecture also enables streaming and interactive queries, while keeping MapReduce's scalability and fault tolerance. And whereas most deployed systems only support simple one-pass computations (e.g., SQL queries), ours also extends to the multi-pass algorithms required for complex analytics like machine learning. Finally, unlike the specialized systems proposed for some of these workloads, our architecture allows these computations to be combined, enabling rich new applications that intermix, for example, streaming and batch processing. We achieve these results through a simple extension to MapReduce that adds primitives for data sharing, called Resilient Distributed Datasets (RDDs). We show that this is enough to capture a wide range of workloads. We implement RDDs in the open source Spark system, which we evaluate using synthetic and real workloads. Spark matches or exceeds the performance of specialized systems in many domains, while offering stronger fault tolerance properties and allowing these workloads to be combined. Finally, we examine the generality of RDDs from both a theoretical modeling perspective and a systems perspective. This version of the dissertation makes corrections throughout the text and adds a new section on the evolution of Apache Spark in industry since 2014. In addition, editing, formatting, and links for the references have been added.

The Digital Rights Movement Hector
Postigo,2012-10-05 The evolution of activism
against the expansion of copyright in the digital
domain, with case studies of resistance including
eBook and iTunes hacks. The movement against
restrictive digital copyright protection arose
largely in response to the excesses of the Digital
Millennium Copyright Act (DMCA) of 1998. In The
Digital Rights Movement, Hector Postigo shows that
what began as an assertion of consumer rights to
digital content has become something broader: a
movement concerned not just with consumers and
gadgets but with cultural ownership. Increasingly
stringent laws and technological measures are more
than incoveniences; they lock up access to our
"cultural commons." Postigo describes the
legislative history of the DMCA and how policy
"blind spots" produced a law at odds with existing
and emerging consumer practices. Yet the DMCA
established a political and legal rationale
brought to bear on digital media, the Internet,
and other new technologies. Drawing on social
movement theory and science and technology
studies, Postigo presents case studies of
resistance to increased control over digital
media, describing a host of tactics that range
from hacking to lobbying. Postigo discusses the
movement's new, user-centered conception of "fair
use" that seeks to legitimize noncommercial
personal and creative uses such as copying

legitimately purchased content and remixing music and video tracks. He introduces the concept of technological resistance—when hackers and users design and deploy technologies that allows access to digital content despite technological protection mechanisms—as the flip side to the technological enforcement represented by digital copy protection and a crucial tactic for the movement.

   The Library Screen Scene Renee Hobbs,Liz Deslauriers,Pam Steager,2019-06-07 In the past two decades, several U.S. states have explored ways to mainstream media literacy in school curriculum. However one of the best and most accessible places to learn this necessary skill has not been the traditional classroom but rather the library. In an increasing number of school, public, and academic libraries, shared media experiences such as film screening, learning to computer animate, and video editing promote community and a sense of civic engagement. The Library Screen Scene reveals five core practices used by librarians who work with film and media: viewing, creating, learning, collecting, and connecting. With examples from more than 170 libraries throughout the United States, the book shows how film and media literacy education programs, library services, and media collections teach patrons to critically analyze moving image media, uniting generations, cultures, and communities in the process.

A Grammar of Karbi Linda Konnerth,2020-06-08 This is a comprehensive grammar of the Hills Karbi variety spoken predominantly in the Karbi Anglong districts. Karbi belongs to the Trans-Himalayan (Tibeto-Burman) family but its exact phylogenetic status has remained unclear. By providing a diachronically-oriented functional analysis of all structural levels of Karbi, this grammar offers a

reference work that provides a thorough account of this language. The data in this grammar come from fieldwork that was primarily carried out in the district capital of Diphu although the corpus includes recordings of speakers from all over the two Karbi Anglong districts. This corpus is freely available both as fully glossed text in Himalayan Linguistics (Konnerth and Tisso 2018) and as original media files in ELAR (SOAS University of London). Now also including a glossary, this grammar is a thoroughly revised version of the 2014 dissertation of the author, which won the 2015 Pāṇini Award of the Association for Linguistic Typology (ALT). In this revised version, a few new sections have been added and numerous other sections have been thoroughly updated.
