The Vortex Blaster by Edward Elmer Doc Smith Introducing "Storm" Cloud, who, through tragedy, is destined to become the most noted figure in the galaxy -- The Vortex Blaster! We are delighted to publish this classic book as part of our extensive Classic Library collection. Many of the books in our collection have been out of print for decades, and therefore have not been accessible to the general public. The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature, and our view is that this is a significant literary work, which deserves to be brought back into print after many decades. The contents of the vast majority of titles in the Classic Library have been scanned from the original works. To ensure a high quality product, each title has been meticulously hand curated by our staff. Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work. We hope that you will enjoy this wonderful classic work, and that for you it becomes an enriching experience.

The Monoplane as a Lifting Vortex Surface Hermann

Blenk,1947 In Prandtl's airfoil theory the monoplane was replaced by a single lifting vortex line and yielded fairly practical results. However, the theory remained restricted to the straight wing. Yawed wings and those curved in flight direction could not be computed with this first approximation; for these the chordwise lift distribution must be taken into consideration. For the two-dimensional problem the transition from the lifting line to the lifting surface has been explained by Birnbaum. In the present report the transition to the three-dimensional problem is undertaken.

**Sedona** Mikel J. Wilson,2011-09-01 A love adventure with a truly original sci-fi/metaphysical twist. Sedona is a Northern Arizona town visited as much for its legends of mysterious energy vortices, UFO sightings and other paranormal activity as it is for the majestic red rock formations that stand sentry over its landscape. Gregor Buckingham, however, is coming because Sedona has been calling to him. A young metaphysician scarred from a childhood fire, Gregor will soon discover a lost ancient power, his first requited love and a mortal enemy he must fight to save them both.

*The Vortex Blaster* E. E. Smith,2017-10-12 One man against the basic energy of the universe, unleashed in ravaging fury that was Storm Cloud. Unique was the only way to describe him, yet alone in his single-handed battle. The appalling destructiveness of a loose atomic vortex could be cancelled out only by destroying the vortex itself. While not even the most massive and modern of electronic computers could figure out how to destroy a loose vortex, Storm Cloud could and did. To Galactic Civilization, the loose vortices were just one menace among many. It was Storm's unique brain, itself a computer with fantastic powers that enabled him to select and direct a duodecapylatomate bomb with exactly the right energy to snuff each vortex out of existence. The day a runaway vortex exploded in his home was the day Storm Cloud became the Vortex Blaster!

**The Vortex Blaster** E. E. Smith, 2016-08-17 Introducing "Storm" Cloud, who, through tragedy, is destined to become the most noted figure in the galaxy The Vortex Blaster! Show Excerpt t gets me, what the hell? The quicker it does, the better the sooner I'll be with Jo. You believe that? Implicitly. The vortices are as good as gone, then. They haven't got any more chance than Boskone has of licking the Patrol. I'm afraid so, almost glumly. The only way for it to get me is for me to make a mistake, and I don't feel any coming on. But what's your angle? the Lensman asked, interest lighting his eyes. You can't use the customary attack; your time will be too short. Like this, and, taking down a sheet of drafting paper, Cloud sketched rapidly. This is the crater, here, with the vortex at the bottom, there. From the observers' instruments or from a shielded set-up of my own I get my data on mass, emission, maxima, minima, and so on. Then I have them make me three duodec bombs--one on the mark of the activity I'm figuring on shooting at, and one each five percent over and under that figure--cased in neocarballoy of exactly the computed t
