**Czech Republic** ,1999-01-01 ...the relationship between employment growth and output growth...is greatly affected by the functioning, efficiency and institutional structure of the labor market. --Joseph Stiglitz, Chief Economist Despite the resumption of economic growth in most LAC countries since the late 1980s, improvements on the employment/unemployment front have been sluggish at best, with a few notable exceptions. In many countries, renewed growth in LAC in the 1990s has so far failed to generate adequate new jobs in place of those lost during the adjustment, and to restore wages to pre-crisis levels. The focus of this book is on: Â· the performance of labor markets in the LAC region since the beginning of significant structural reforms most countries in the region have undertaken Â· the structure of labor markets, institutions, and incentive structures; Â· the effects of that structure on employment, earnings, income distribution, and poverty levels; Â· the role of labor market institutions in labor market trends; Â· the options for reform and the benefits of comprehensive labor reforms, as evidenced inside and outside the region; Â· labor policy reforms to improve in a sustainable way the employment/unemployment outlook.

*Perspectives on Social Network Research* Paul W. Holland,Samuel

Leinhardt,2013-10-22 *Perspectives on Social Network Research* covers the proceedings of the Mathematical Social Science Board's Advanced Research Symposium on Social Networks held at Dartmouth College, Hanover, New Hampshire, on September 18-21, 1975. This symposium was organized to survey research on social networks as well as review and criticize major research thrusts involving network studies of social behavior. The book covers topics such as the Davis/Holland/Leinhardt studies, structural sociometry, network analysis of the diffusion of innovations, and the deterministic models of social networks. Also covered are topics such as structural control models for group processes, social clusters and opinion clusters, equilibrating processes in social networks, and estimation of population totals by use of snowball samples. The text is recommended for sociologists, anthropologists, and psychologists, especially those who would like to know more about social network and are currently engaged in research in that particular field.
